M., and leave Alexandria for Georgetown at 1 o'clock, (Sundays excepted), and leave Georgetown for Alexandria at 2 o'clock. JOHN WILSON, Captain. nov 19

FOR SALE. The undersigned, intending to leave the Middleburg, wishes to sell the HOUSE and LOT he now occupies, situated a few hundred yards from the village. The dwelling house is of brick, 3 story, (including basement), well arranged for comfort. There are 5 Acres of Land, of the best quality, with a good brick kitchen, brick stable, ice house, and granary; with a never failing spring of fine water, besides a first rate well in the yard. If application be made immediately, a bargain may be had in the present terms, accommodating. W. B. BROADBENT, Middleburg, Loudoun Co., Nov. 23—1f

FOR RENT. The Wharf and Warehouse, late Tucker's, between Cameron and Queen Street, both are in good order and immediate possession can be given. W. C. GARDNER, Ex. of Jos. Manville. 19 10

FOR SALE OR RENT. The House and Lot, late in the occupancy of David Middleton, located on Broad Creek, in Prince Georges County, Maryland. This property is considered a good situation for a Tavern and Grocery, it having been long used as such. And as the premises are out of repair, it will be sold a bargain; or, to a good tenant, it will be rented on moderate terms. The rent for the year may be expended in the improvement of the premises. Any person wishing to buy, or rent, will please apply to the subscribers, who will make known the terms. BENONI WHEAT & SON, aug 16—1f

FOR RENT. A convenient two story Brick Dwelling HOUSE, in good repair, on Water Street, between King and Prince streets. The rent will be moderate. Apply at the store of W. N. & J. H. McVeigh. dec 16—1f

DISTRICT OF COLUMBIA. Orphan's Court Alexandria, ser. November Term, 1840.

The petition of Peter Hewitt, representing that Elizabeth Mills, late of Alexandria County, departed this life intestate, leaving a considerable personal property, in the county aforesaid, and praying that administration thereon, may be granted him as one of the said Elizabeth Mills' distributees; and doubts having arisen as to whom administration should be granted—she being feme covert, at the time of her death, under a doubtful marital contract. It is therefore ordered by the Court here, that the aforesaid application be published in the Alexandria Gazette, six times, previously to the first Monday in December next, in order to afford those who may be interested, an opportunity of showing cause, if any they can, why administration as prayed should not be granted the petitioner aforesaid. A Copy. Tests, A. MOORE, Reg. Will. nov 27—6t

GLAD TIDINGS TO THE AFFLICTED.

HAMPTON'S VEGETABLE TINCTURE.

THE most safe and certain remedy ever known to the world for various chronic diseases, after they have reached a state, and assumed a character, hitherto considered desperate and incurable.

Scrofula, King's Evil, attended with swellings, and ulcers; sore eyes and loss of sight, to a frightful extent, have been cured. Females purging away by reason of deranged secretions, &c., even when attended by spasms or fits, have been readily relieved.

Dyspepsia, yields without a struggle to its mild, yet powerful action upon the stomach. In Catarrh, or Cough, Rheumatism, Fistula and Syphilis, it never fails to cure, as we have fully proved.

This Tincture tends directly to excite a healthy action in the stomach, liver, lungs, and kidneys—to purify the blood and other fluids by expelling every particle of morbid matter from the system, and therefore never fails, (with its accompaniments), to prove a valuable remedy for the diseases for which calomel has been invariably used. Old sores and ulcers, or any chronic affection—and for the calomel disease, it is an infallible remedy.

This remedy is perfectly vegetable, mild, agreeable and safe for persons of any age, either sex, or in any condition, acknowledged by those who have tried it, to be the best known family medicine.

This justly celebrated tincture creates a craving appetite, and the patient is left at liberty to indulge it—indeed, he is particularly requested to do so. The use of this medicine will change the complexion from a pallid to a blooming one. After using this Tincture for six weeks, a person of any age may eat anything that a child of ten years of age, in full health, could eat without the least inconvenience.

From a large number of certificates attesting the astonishing and blessed effects of my Vegetable Tincture, I select the following, from individuals well known to many persons in Georgia and South Carolina, as men of distinction, influence and sterling integrity:

Lexington, Ky. Nov. 15, 1838.

Nov. 15, 1838. I, James E. Davis, of Lexington, Ky., certify, that I believe, and am confident, that the medicine of Mr. Jesse Hampton, of Lexington, Ky., is a complete cure for the disease called the Scrofula, a complaint considered almost as fatal, if not as much so, as the consumption.

The facts that came under my observation, are simply these: I had a mulatto girl, about fifteen years of age, upon whom the disease broke out in a malignant form, she having been threatened with it for some time previous. The best medical aid was first applied to after-wards she was sent to the Indian Doctor—she also took four bottles of "Swann's Panacea"—she constantly got worse—became, in short time, entirely blind, and was pronounced by physicians to be irreversibly so in one of her eyes. After labouring under this disease about six months and getting worse and weaker every day, having used every effort to save her, I was informed by her nurse, a very skillful woman, that it was her opinion the girl could not survive ten days longer. She was so disfigured about her face, and so perfectly exhausted, that I had no hopes of her—I would have given her to any one that would have held out any hope that he could save her. In this extremity I commenced using Hampton's medicine, and it has saved her. In three weeks after she began using it, she looked so well that she could see a little. Before she had used one bottle of the medicine, it seemed to produce the effect of throwing the disease to the surface of the skin—she broke out from head to foot, so much so, that she had to have her limbs wrapped up in linen cloths. This breaking out returned upon her three times within four months. It has been about six months since she commenced taking the medicine—she is now walking about attending to business. I do not consider her entirely restored to general health and strength, but I consider her cured of the Scrofula, and restored to sight, and I believe her health and strength will in a short time, be fully restored. I have no hesitation in saying, that I am perfectly satisfied it is a complete and perfect cure for the Scrofula.

I would not hesitate to give half price for a young Scrofulous negro, if I had the command of this medicine—I should feel an absolute certainty inflicting a cure.

JAMES E. DAVIS.

From W. C. Bell, Esq., author of Analysis and Theory.

Lexington, Nov. 24, 1838.

Mr. Jesse Hampton, I take pleasure in bearing testimony to the virtues of your medicine, which has been used in my family.

It exceeds any thing I have ever used as an appetizer and purifier of the blood. I was induced first to take it in consequence of a severe pain in my side, arising no doubt, from deranged liver, which had become so annoying as to prevent my lying on that side. I am convinced that your medicine has contributed to the removal of the pain.

Every individual with whom I have conversed about the medicine, speaks in the very highest terms of its wonderful, health restoring powers, and from what I have seen and felt in its operations, I am convinced that there is no vegetable medicine ever yet offered to the public, more truly deserving patronage.

WM. C. BELL.

LEXINGTON, KY., April 9, 1838.

This may certify, to all it may concern, that I, Levina Henry and Daughter, of Baton Rouge, in the State of Louisiana, have been, for the last eight or ten years, laboring under the complaint of blindness. We came to Lexington for medical aid, and called on the most eminent physician for the same, who informed me that he could do nothing for us, and recommended us to return home and diet for two years, and then we might possibly be able to see so as to go about the house, but never to be able to see to do any thing, or our eyes restored so as to be of any use to us.

We were, however, so fortunate as to fall in with Mr. Jesse Hampton, who advised us to take his "Vegetable Tincture." I am happy to state, that after taking the same, eight weeks, our sight is so far restored as to enable us to read the smallest print, and to work with our needles, and I have no doubt, after taking two bottles more of his medicine, which he has presented me, for the purpose of taking home with me, and using the same, that we shall be perfectly restored to our sight.

LEVINA HENRY.

Health Court, Nov. 28, 1838.

Believing it to be the duty of those who have witnessed the beneficial effects of Hampton's Vegetable Tincture, in the cure of various chronic diseases, to speak of it as it justly merits, I have been induced, as well in justice to Mr. Hampton, as from motives of humanity, to make the following statement and certificate.

I had a negro boy, about seven years old, who was afflicted with the scrofula for two or three years. The sight of one eye was, to all appearance, lost, with a discharge of something resembling thick cream. He also had a hard

lump on his neck, the size of a goose egg—his general health entirely deranged. I consulted a good physician, and used his prescription for several months without any good effect.

I was at length induced to try Hampton's medicine. After using two bottles, his eye was entirely restored to sight—the lump on his neck became soft, broke, and discharged copiously bloody matter; his general health appears to be perfect, and I have no doubt the disease is entirely eradicated. I also state, that a negro child, 18 months old, was afflicted with Tetter, (or scald head,) the hair came off, and the entire surface, from the eyes to the back of it neck, was in one solid scab. In one month, the use of Hampton's medicine performed a perfect cure—the child has a fine suit of hair, and its health good.

I also state, that my daughter, twelve years of age, was in extremely delicate health for two years, attended with loss of appetite and extreme debility, pale and emaciated. The use of Hampton's Tincture, in one month, restored her appetite, her strength daily increased, and she is now in robust health.

I further state, that my son, sixteen years old, has been in bad health for several years, having all the symptoms attending Dyspepsia. Acid stomach, weak digestion, torpid state of the bowels, with great debility. The use of Hampton's Vegetable Tincture, for three months has greatly improved his health, and he now has every appearance of becoming robust and healthy.

"T. H. SHELBY.

On another case which came under my own observation, is worthy of mention:

Two gentlemen from Georgia, came to this country in August last, pale, and so weak that they were scarcely able to walk. They were Dyspeptic—they visited all the watering places, and found no benefit, and were about returning, quite despondent. I recommended Hampton's medicine—they concluded to remain and give it a trial—in 6 weeks, they purchased 100 mules and horses, delighted with a speedy prospect of vigor and health, and returned to Georgia. This I witness.

T. H. S.

Dr. Hampton, I have had all the symptoms of Consumption for five years; a distressing cough, with great weakness. I applied to various eminent physicians, (I think five or six.) I underwent a course of treatment from each of them, without any good effect; indeed, from the last of them, I grew much worse, and was not flattered by any of them, but told, I could not live; they told me that abscesses had formed on my lungs; at this time I was discharging copiously, a yellow sputum, and say, I had come to the same conclusion of my physicians, and thought that I must die. I was, however, so fortunate as to hear of your Tincture, and concluded to give it a trial. I am happy to state to you, and the world, that it has cured me. I am now in fine health and vigor. I would therefore recommend it to the afflicted, believing it to be unequalled in the world.

March 12th, 1839. HENRY C. WINN.

I shall remain permanently at Mr. Tibbitts', Marshall House, Alexandria, where the citizens and its vicinity can consult me, and be furnished with the Tincture, at any hour in the day. Letters post paid, addressed to me, at this place, will receive prompt attention, and the medicine put up to order.

JESSE HAMPTON. Alexandria, Nov. 19—e3m

REV. I. COVERT'S BALM OF LIFE.

THIS celebrated article, which, for the last two years, has proved itself so valuable a remedy for Coughs, Colds, Consumption, Bronchitis, Asthma, Whooping-cough, and all diseases of the lungs and windpipes, may now be had of druggists and merchants in most of the towns in the Northern and Eastern States.

Hoadley, Phelps, & Co. Wholesale Druggists, 142 Water St., New York, have been appointed general agents, and are prepared to supply vendors on the proprietor's best terms. Price \$1 per bottle. A liberal discount made to vendors. From the Boston Medical Journal of Aug. 28, 1840.

The following is an extract from an article in that paper on "Morbus Laryngis Constrictionis" or Bronchitis, by Frank H. Hamilton, M. D., Professor of Materia Medica and General Pathology in Geneva Medical College.

"The Rev. I. Covert's Mixture, also now used so extensively for this affection by clergymen, belongs to the class of stimulating expectorants, being one of those lucky combinations of medicinal agents which, while it promotes expectoration, does not impair the tone of the stomach. Of this medicine we feel at liberty to speak, since its composition is not held from the profession, and we hope the proprietors will soon see fit to give it to the Public. We venture to recommend it, therefore, having employed it in our own case, and in the cases of many others, with decided benefit."

From the Auburn Conscience and Family Recorder of September 4, 1839.

"Covert's Balm of Life bids fair to rank among the first of specifics for most cases of pulmonary disease. From having tested its salutary tendency, and more especially from the knowledge that it has won the confidence and received the recommendations of many highly respectable medical gentlemen, some of whom are well known as the ornaments of their profession, we have no hesitation in speaking well of it. We have reason to believe that it is employed in the practice of some of the most scientific and judicious of the physicians of this place. The Rev. Mr. Covert, the inventor and proprietor of this valuable medicine, is a respectable local minister of the Methodist Episcopal Church in this place."

The nature of the composition of the Rev. I. Covert's Balm of Life having been fully explained to the following medical gentlemen, they have consented that they may be referred to as authority for its utility as an expectorant in those chronic cases of pulmonary diseases in which that class of remedies is indicated.

D. M. Reese, M. D. Professor of the Theory and Practice of Medicine in the Albany Medical College.

J. M. Naughton, M. D. Professor of Anatomy and Physiology in the Fairfield Medical College.

Amos Stevenson, M. D. New York city. Dr. M. M. Knight. J. Mitchell, M. D. Philadelphia.

For numerous other testimonials, see circulars in the hands of all the vendors.

This medicine may be had of most of the Druggists in the District of Columbia, and generally throughout the country, where the circulars in reference to it may be had gratis. nov 30—6m

DR. G. R. PHELPS' COMPOUND TOMATO PILLS.

THE vegetable Remedy for Diseases arising from impurities of the Blood, Dyspepsia, Scrofula, and all Chronic Diseases; also a substitute for Calomel, as a Cathartic in Fevers, and all Bilious Affections.

Often have the cures performed by this medicine, been the subject of editorial comment in various newspapers and journals, and it may with truth be asserted, that no medicine of the kind, has ever received testimonials of greater commendation, than are attached to this.

They are in general use as a Family Medicine, and there are thousands of families, who declare, they are never satisfied, unless they have a supply always on hand. They are no rival in curative efficacy, dyspepsia, liver complaint, sick headache, jaundice, rheumatism, heartburn, acid stomach, palpitation, loss of appetite, costiveness, &c.

Taken either a short time before or after exposure, they render the system less liable to contract contagious or epidemic diseases, and should be resorted to by persons residing in low and marshy situations, or when traveling, or exposed to contagion. Also, persons attending the sick, who by long watching and fatigue, or exposure to the effluvia of the sick room, become debilitated, and lose their appetite, will find great assistance from these Pills, in renovating and purifying the system, and restoring the functions to a healthy state.

Persons debilitated by intense and long application to business, and study, and those also of sedentary habits, will derive great benefit from an occasional use of them. No traveller should be without them.

For that congested and deranged state of the system, which occurs in the Summer, these Pills are particularly applicable, in preventing diseases of the Bowels, Bilious Complaints, congestion of the Liver, &c., and if timely used, may prolong many lives, that otherwise would fall a sacrifice to the changes of the seasons.

Those persons liable to sore throat, swelling of the glands, coughs, and other symptoms indicating scrofula or consumption, should take warning in season, and embrace a remedy, which, while it is searching out and eradicating disease, makes no deductions from the vital powers of the system.

Recommendations from Physicians in every variety of climate in the United States, Texas and the Canadas, bear witness to the peculiar and potent effects of this Medicine;—in fact, they are prescribed by physicians generally, in preference to any other Cathartic and Alterative Medicine, and having acquired an unprecedented celebrity as an ANTI-DYSPEPTIC and ANTI-BILIOUS REMEDY, and this reputation being fully sustained by the high character of its testimonials, and the increasing demand for the Medicine,—it is only necessary for the Proprietor to continue the Caution, that the public may not mistake other medicines, which are introduced as Tomato preparations, for the true COMPOUND TOMATO PILLS.

*Enquire for PHELPS' TOMATO PILLS, and be particular to observe that the label is signed G. R. PHELPS, M. D. Price 37 1/2 cts.

For sale by authorized Agents in most of the Towns in the U. S.

Orders directed to the Proprietor, Hartford, Conn. will be attended to, and a liberal discount made to dealers. nov 30—6m

ALEXANDRIA MUSEUM, open daily.

COLUMBIAN COLLEGE, DISTRICT OF COLUMBIA.

THE Lectures in the Medical Department of this Institution will commence on the first Monday in November, annually, and continue until the 1st of March.

During this period, full courses will be delivered on the various branches of Medicine by Thomas Sewall, M. D. Professor of Pathology and the Practice of Medicine.

Harvey Lindsay, M. D. Professor of Obstetrics and the Diseases of Women and Children. Thomas Miller, M. D. Professor of Anatomy and Physiology.

John M. Thomas, M. D. Professor of Materia Medica and Therapeutics. J. Frederick May, M. D. Professor of Surgery, late Professor of Surgery in the University of Maryland.

Frederick Hall, M. D. Professor of Chemistry and Pharmacy. Samuel C. Smoot, M. D. Demonstrator of Anatomy.

The Medical College is situated at the corner of 10th and E streets, equidistant from the Capitol and President's House.

In the arrangements of this building, and the organization of the School, particular reference has been had to the study of Practical Anatomy, a branch which the student will enjoy peculiar facilities for cultivating.

The Professor of Surgery will show all the operations upon the recent subject, and afford the student an opportunity of repeating the more important ones with his own hand.

The Professor of Chemistry has a complete Chemical and Philosophical Apparatus. The Professor of Obstetrics will illustrate his lectures by obstetrical apparatus, and an ample collection of preparations and drawings.

The entire expense, for a Course of Lectures by all the Professors, is \$70. Dissecting Ticket \$10; optional with the student.

All persons who have attended two full courses of Lectures in this school are entitled to attend succeeding courses free of expense.

The degrees are conferred by the authority of the Columbian College, incorporated by an act of Congress of the United States.

Good board can be procured at from three to four dollars per week. J. M. THOMAS, M. D. Dean of the Faculty. WASHINGTON CITY, June 2, 1840. oct 21—1f

YOUNG HYSON TEA.

3 HALF Chests, just received and for sale by A. J. FLEMING. nov 24

Miscellaneous.

TOUGH TRIPE.

A sort of original character of a servant girl, belonging to this neighborhood, engaged as dairy-maid at Craighill, in Argyleville, last summer; and the first night after going home, as the family had supped on tripe before she could get her work in the byre brought to a close. Kate was told by her mistress that she would find her share in a pot on the fire. Impelled by a pretty sharp appetite, which the fresh air of the Highlands had imparted, Kate approached one of the two pots on the fire, carrying it off into a corner, and then, and there, commenced an attack on what she conceived to be about a square yard of tripe. She found it darkish in the colour, and about the toughest fabric of human provender which had ever encountered her ivory, but as she was young and brawny, and moreover, had never before tasted tripe, she felt ashamed to reject that of which she had been told all the family had partaken and, therefore, tore away at it, now doing her teeth, now her hands, and at times, breaking it over her knees, till she managed to bolt the whole of it inwardly ejaculating "it was mair like the hide, than the inside of any beast ever saw." All night her horrible night-moans so loudly indicated that Kate's digestive powers were being severely tested, that the goodwife, cannily administered a bead of the small stix aqua to master the tripe. It was found next morning, when the household assembled at breakfast, that Kate had taken the wrong pot from the fire, and had swallowed the dish about, which had been left in the water to wash the dishes! Kate thinking it was a trick, her blood got up, and she seized an old clant, with which she unceremoniously dislocated the shoulderblade of the farmer's eldest son, and shouting as a sort of war cry, that 'neabody snid make a ropework' of her stomach, let sleep at all and sundry, and charged them from one room to another, till she fairly put the whole establishment to rout. A consultation was ultimately effected, but till the day she left the house, the "brawniest tripe" among them dared not mention the word tripe in Kate's presence.—Argy Advertiser.

All for Glory.—Since the invasion of Algiers by the French, about ten years ago, upwards of 50,000 French soldiers have been slain. There are about 70,000 soldiers in that country 10,000 of whom are in hospitals. It requires the sum of \$100,000 per week to pay and support them.
