MINING NOTES .- During the suspension last summer a considerable of water accumulated in several portions of Hoffman mine. Since resumption of work much trouble has been encountered in consequence. It appears that in any event this result was anticipated and the local management of the Consolidation coal company had already instituted massures to drain the flooded workings. This week the work looking to the end desired was accomplished, and all the headings are now accessible.

PROPHECIES .- Mr. Vennor combate Mr. Wiggins' prophecy of a great storm next March. He thinks the weather of that period will be of "no more than ordinary severity."

Apropos of the season, it is stated that "one of the papers in the Antiquary for December is Mr. Leathom's historical article on Christmas, in which he quotes from the Harleian MS. an emen applicable to this year If Christmas on a Monday be, A great winter that year you'll see And full of winds both loud and shrill; And in the summer, truth to tell, Full of tempes is lasting long; While battles they shall multiply, And great plenty of brasts shall die They that be born that day I ween.
