grades are all reaffirmed with the single exception of the note that was interpolated last year, which reads: "Hardy, flinty wheat containing n appreciable admixture of soft wheat may be admitted into the grades of No. 2 northern spring and No. 3 spring wheat, provided the test weight of the same is not more than one pound less than the minimum weight required by the existing rules for said grades, and provided further that such wheat is in all other respects qualified for admission into such grades."

This rule was adopted because the crop last year was hard, but it was somewhat lighter than the prescribed weight. This explains the change and also why the "note" was dropped when it is known that the wheat crop just harvested is heavy and conforms to the weight schedules of former years.

The so-called Peterson bill, regulat ing the elevators and warehouses at interior points in the state, is now in full operation. There are something like 1,000 such elevators in the state. The new law compels all elevators located on rights of way of railroads in the state to take out licences and come within state control. SIGHTS OF A CITY.

"I HAVE seen, at one time and another, all sorts of things hanging on washlines," said a citizen, "but to-day, for the first time, I saw among the shirts and stockings an American flag." In the shopping districts one some-times sees a newsboy, with his bundle of papers under his arm, gravely holding open the door of a carriage for my lady. Sometimes she gives him some Sometimes she gives him something, sometimes not; he takes the chances on that.

As a general thing the newsboy, when on duty, devotes himself strictly to hustling, but there crossed Madison square, New York, the other evening, a newsboy who, between cries of his papers, smelled at a sizable bouquet of red flowers with evident pleasure. THE year 1772 was a fearful one in

New York. One hundred and fifty-five cases of sunstroke occurred on July 4, of which seventy-two proved fatal. The principal thoroughfares were like fields of battle. Men fell by the score, and ambulances were in constant requisition. AFFAIRS OF THE HEART.

A HEARTLESS and unprincipled West Virginia girl challenged her lover to a foot race, which she won, and then rejected the vanquished man "because she could not wed an inferior." MARRIAGE is evidently not considered

THE legend runs that the fruiting of the almond tree beside the house whence a bride-elect departs is a happy omen. Princess May was probably glad to see that the almond tree at White Lodge was in full bloom when she said good-by to her old home.
