His movements are as a indication of the way the wind is as is the position of a shuttle cock on a barn. For instance, at Ironton, he deelared himself against the Sub Treasury 'aw, and asserted that he could beat Judge Ranney one hundred thousand votes upon that question, but in Muskingum county, where he was aware that the people were strongly in favor of such a law, he is reported to have expressed himself in an entirely different manner, and to have given them to understanding, and foughts and same that he did not object to its provisions:

the entire contained of all those who desire skillful treatment for their diseases.

DR. CHAMBERLIN.

The application of Electro-galvaniam to the human system for diseases by medical men in our country, have never (except by accident) produced such favorable results as were expected, hence practitioners, not anowing that in its application it was govered by fixed and immutable laws, have had their confidence in eitch an agent lessened upon alsets; each application in their way. Recent demonstrations, nowever, in our own city, and in neighboring places, have produced results the most convincing, that when applied according to the principles regulating it to the human system, it realizes by the operator the most sangulor experientions, as when so applied it intariably acts in the direction of health.
