The Surest Dry Land Grain.

Milo is the surest yielding grain crop that is grown in Eastern Colorado, Western Kansas and Oklahoma, the Panhandle of Texas and Eastern New Mexico.

The U. S. Department of Agriculture reports the average yield for five years at Amarillo, Texas, and other dry land experiment stations at 40 bushels of grain per acre a year. Farmers in the same section report yields of from thirty to eighty bushels per acre.

A bushel of milo will produce from ten to eleven pounds of pork. This makes the average annual pork production from the dry lands of the southwest equal to 400 and upwards pounds of pork per acre where milo is grown and fed. Ten pounds of milo have the same feeding value for horses, beef and dairy cattle, hogs and sheep as nine pounds of corn.

Milo is the corn for the plains of the Southwest and should be grown instead of corn where the annual rainfall drops below twenty-five inches. Farmers in the Panhandle of Texas say that it never fails to yield a crop of grain, and that it will yield twenty bushels an acre in years so dry that wheat is an absolute failure. Milo should have the same place in dry land farming that corn has in Iowa and Illinois. It has nearly the same composition as corn, like feeding qualities, and can be used with profit for the feeding of every class of farm animals to which corn is fed.

Every farmer in this section this year should plant and thoroughly cultivate at least 40 acres of milo. It will insure his prosperity and the prosperity of the entire community. Milo, well cultivated, is a sure crop and a large acreage means well fed teams, and plenty of grain to fatten steers and hogs and to feed dairy cows.

Warning to Railroad Men.

Look out for severe and even dangerous kidney and bladder trouble resulting from years of railroading. Geo. E. Bell, of 639 Third St., Fort Wayne, Ind., was many years a conductor on the Nickel Plate. He says, "Twenty years of railroading left my kidneys in terrible condition. There was a continual pain across my back and hips and my kidneys gave me much distress, and the action of my bladder was frequent and most painful. I got a supply of Foley Kidney Pills and the first bottle made a wonderful improvement, and four bottles cured me completely. Since being cured I have recommended Foley Kidney Pills to many of my railroad friends.

For sale by all druggists.

Santa Fe Will Build Cutoff

Dodge City-Colmor Line Will Save Seventy-One Miles in Distance.

From The Denver Post.

Las Vegas, N. M. Feb. 20.—It was learned here today from an authoritative source that the Santa Fe has begun the purchase of a right-of-way for its Dodge City-Colmor cutoff. The proposed cutoff will run in almost an air line from Dodge City, Kansas, to Colmor, N. M., and will reduce the distance now traversed by the road's main line between the two points seventy-one miles, besides avoiding the steep Raton mountain grade and tunnel. It will open up a new territory for the output of coal mines along the Santa Fe.

This cutoff likely will be the first section of the Santa Fe's new road shortening improvements to be built. The second will be the Sulzbacher-Vaughn cutoff, a distance of 100 miles, which will form a connecting link in the Santa Fe's Galveston-to-Denver line. Surveys for both cutoffs were completed late last fall.

A man in Missouri by the name of Moon got married and that was a change of the moon. In due time his wife presented him a daughter, and that was a new moon; then he went to town and got drunk for joy and that was a full moon; when he started home he had only 25 cents and that was the last quarter. His mother-in-law met him at the door with a rolling pin, and that was a total eclipse.
