### Going Some.

The big Bolin-Hall mill which was thoroughly overhauled last month is enjoying a remarkably good business these days. The business was established here last fall by J. R. Bolin and Robert Hall, who had other interests here at the time. From the very first the business has been a successful one, and now the mill is running day and night with a double shift of men trying to keep from getting too far behind in filling orders. This is the only flour mill on the

Rock Island between Pratt and Dalhart, so a great territory is open to the mill here. By putting out an excellent flour at a fair price the business has increased by leaps and bounds, so that right now, enough orders are piled up to keep the mill running day and night during the entire month of August. While there is but little wheat coming in, it is of an excellent quality. Some old wheat is still coming in and the mill is paying a premium for this, as it is the most desirable for milling purposes.

H. V. Tucker will leave soon for his old home at Smith's Grove, Kentucky. Mrs. Tucker will accompany him home the last of August.

### CULTIVATE KINDLY VOICE

Let Only Your Affectionate and Cheerful Feelings Be Vocal in Your Home.

The comfort and happiness of home and home intercourse depend very much on the kindly and affectionate training of the voice. Trouble, and care, and vexation will and must, of course, come, but let them not creep into your voices: Let only your kinder and happier feelings be vocal in your homes. Let them be so—if for no other reason, for the little children's sake. These sensitive little beings are exceedingly susceptible to the tones. Let us have consideration for them. As we advance in years our life becomes more interior. We are abstracted from outward scenes and sounds. We think, we reflect, we begin gradually to deal with the past as we have formerly lived in the present. Our ear grows dull to external sounds! It is turned inward and listens chiefly to the echoes of past voices. We catch no more the merry laughter of the children. We hear no more notes of the morning bird. The brook that used to prattle so gayly to us rushes by unheeded—we have forgotten to hear such things. But little children, remember, sensitively hear them all. Mark how at every sound the young child starts and turns and listens! And thus with equal sensitiveness does it catch the tones of human voices. How were it possible that the sharp and hasty word, the fretful and complaining tone, should not startle and pain, even depress, the sensitive little being, whose harp of life, so gently and delicately strung, vibrating ever to the gentle breeze and thrilling sensitively ever to the tones of such voices as sweep across it? Let us be kind and cheerful spoken, then, in our homes.

### HOTELS GREATLY IMPROVED

Service and Surroundings Far Out of Proportion to Advance in Expense.

"Do you know why we came here?" asked a young married woman at a downtown hotel. "It is because everything is fresh and clean and new, with the best kind of service, for all of which we do not pay a cent more than we did at the old musty hotel where we stopped last winter. Now, isn't that a very natural reason for coming? And isn't that just why the old hotels are being gradually torn down. People have outlived them, as it were. Here we have good music in the evening, and I was surprised to see how men and women linger about in little groups to listen, just as they might down at Garden City, which is a very good atmosphere for a hotel, I think."

It is a fact that the service and surroundings in the present day hotel are far out of proportion to the advance in expense. For instance, stop at a country hotel where you pay the same price as in the city and note the difference in service and convenience. It is the prototype of the old city hotel. The adoption of the European plan has been largely responsible for the advance in conditions.

### THREE GREATEST GENERALS

Alexander, Caesar and Napoleon Were All Distinguished in the Realm of Letters.

The three greatest generals the world has ever produced—Alexander, Caesar, Napoleon—were all men of letters. Alexander was a friend of Aristotle, and annotator of Homer. Caesar's Commentaries are still classic books. Napoleon would have been a man eminent in science had not he been an emperor. "Do you think," he said, "that if I had not been general-in-chief and the instrument of fate to a mighty nation, I would have accepted place and dependence? No! I would have thrown myself into the study of the exact sciences; my path would have been that of Galileo and Newton; and since I have always succeeded in my great enterprises, I should have highly distinguished myself also in my scientific labors. I should have left the memory of beautiful discoveries."

### AMUSING EXPERIENCE.

When Miss Jennie-Lee was on tour with the dramatic version of "Black House," she met with an amusing experience. One night she was in the midst of the long and harrowing death scene of poor Jo. The stage was darkened and the limelight illuminated the pale features of the death stricken boy. People were sobbing all over the house. Suddenly, to her consternation, Miss Lee heard the limelight man addressing her in a brawny Scotch whisper, audible to half the house. "Dee quick, Miss Lee—dee quick!" he roared softly. "The limelight's green out!" She did die "quick" but it was for the purpose of making a speech to that limelight man which he said he would never forget.—Detroit Free Press.
