**\$75**

### A STATEMENT

By the Factory Representative

For more than ten years Automatics have been washing in Liberal. No statement I can make, no proof I can offer, can be so convincing of Automatic durability as the record established here in Liberal.

The machine we offer now is more convenient, safer, easier on clothes than the earlier models, but we still use the fine materials that made the old Automatics so long lived and Automatic mechanics still build the machine so that they will be remarkably free from breakdown.

The motor is still water-proof so that the user is saved the considerable expense of re-winding should water be spilled; it is still the clutchless type to avoid the frequent burn-outs caused by cheap construction, but it is more powerful than the old one.

The wringer rolls are the best that money can buy. They are made for electric service and are guaranteed by the maker for three years.

And about the work it does—Just ask a friend who has one. Look at the clothes on her line. Notice how white they are, and how clean.

The old way of washing was too hard for a woman, but \$5 will now enable you to have cleaner clothes the easier way.

Only a few machines are offered at special terms. They will probably go quickly and no more can be secured from the factory to sell at so low a price.

SEE MR. HETTIC

### Only a Few Machines Left

At this price and the next shipment will be higher. Better buy yours now.

### You Take No Chances

The factory guarantees the machine. We endorse the guarantee.

There are over 300 Automatics in Liberal. Ask your neighbor about hers.

## CHIROPRACTIC

Consists Entirely of Adjusting the Movable Segments of the Spinal Column to Normal Position

### IS CHIROPRACTIC SCIENTIFIC?

Science is classified knowledge. It does not depend upon chance, or luck, or guesswork. If a method is scientific it must work out—not sometimes, but ALL the time. No method of combating disease has ever deserved to be called scientific until Chiropractic was developed. The treating of disease by remedies is an ART in which skill in diagnosis and in predicting the rather dubious reaction of the patient to the remedy MAY bring good results.

Chiropractic is a SCIENCE. The Chiropractor is trained to detect spinal abnormalities by hand and verify by X-ray until he knows, with absolute certainty, the position and relation of the spinal bones. His methods of adjusting these are so exact, so specific, that he can be absolutely positive that the adjustment will be followed by just one result—the utmost effort of Nature to cure. The only element of uncertainty left—the only reason why a Chiropractor cannot promise a complete cure to every patient in the world—is the possibility that the case has gone so far that Nature herself will not cure it, which means that no treatment on earth would be of any avail.

Chiropractors do not depend for their success upon the uncertain elements which form a basis for other methods. The very simplicity of the system makes for accuracy. For instance, the Chiropractor knows—not guesses—but KNOWS—what organs in the body are weak or diseased after he has analyzed the spine. Conversely, he also knows which organs are healthy and sound. His word is the word of authority. There are things about disease which he cannot find out in this way, but these things are not essential to the cure, and here again the scientific nature of the system shows itself. He knows, with a certainty from the beginning, what is hidden from him. He never mistakes a guess for a fact.

It is because Chiropractic is exact, specific and definite, that Chiropractors achieve a higher percentage of results than any other profession.
