

# NEW REGISTRATION FOR CITY ELECTION

## Women May Qualify as Electors As Soon as the Official Proclamation Is Issued.

(From Saturday's Daily.)

That the women of Prescott will be able to vote at the coming city election, was practically assured by the action of the City Council last night in ordering a new registration. Women, however, will not be able until after the results of the election have been officially proclaimed, and this may not take place until after the city primary on December 7.

Registration is ordered to open on next Wednesday, November 13, and will close on December 1, six days before the primary. On December 9 registration will be re-opened and continue until December 28. Then the books will close in order that the printer may get out the great register for use on election day.

The last legislature had enacted so many peculiar and puerile election laws that Mayor Goldwater was at first in doubt whether the Council retained the usual right to order a re-registration, but finally a clause was found on the statute which provided that the new law relating to great registers did not apply when in conflict with the charter or the ordinances of a city. Had it applied the women would have been barred from voting at any election for two years.

It was stated last night that the nomination papers of Mrs. Mary Loy as a candidate for Mayor are illegal, because of the fact that she is not yet a qualified elector.

The city superintendent of water works was instructed to lay a 6-inch water main from the corner of Montezuma and Goodwin street, along Goodwin across Granite creek and connecting at McCormick street. This

### MUCH SILVER IS BEING SHIPPED AT TURKEY

(From Friday's Daily.)

Turkey station, on the Bradshaw Mountain railway, is assuming very much interest at present as a shipping center for silver ores, and during the coming week it is estimated that at least four carloads will leave that place.

Those who are preparing to market their output are Nellis and Cleator who are developing the Silver Chord. This property is a regular shipper and has several thousand dollars to its credit under the leasing system. Richard Umlah is loading a car of very high grade silver ore, and it goes to El Paso. Daniel & Sanderson will ship to Humboldt nearly a car, while J. R. Wells is loading a car for the Needles smelter. That section of Turkey creek at present is the greatest mineral producing region of the country with the possible exception of the Commercial mines of Copper Basin.

The yield is exclusively silver, and some of the highest grade ore known in the state of its character is to the credit of that famed district. All of the mines are being operated under the leasing system, with the exception of the Wells group.

### IDLE MILLS LOOTED OF COPPER PLATES

(From Thursday's Daily.)

Reports are reaching the city of the most systematic line of thievery ever known to occur in the county, in which idle quartz mills, hoist houses and other buildings of abandoned companies are being made the prey of a well conceived plan of robbery.

Copper plates seem to attract the attention of the thieves. Two of these were taken from the Annie mill on the Big Bug, together with a miscellaneous assortment of tools. The same gang entered the Brooklyn plant near Dewey and committed similar depredations. Other points have been looted, also, and in the aggregate the losses are reported at from \$20,000 to \$30,000. The supposition exists that the robbers are traveling through the country with a light wagon, and invariably do their work at night, when they drive away and cache their goods and wares.

The loss of two Burleigh drills from the Copper Basin highway is attributed to this source. Other valuable property is reported lost at several outside camps that are idle.

gives West Prescott a double water supply.

A letter from the Secretary of the American Mining Congress to be held in Spokane, November 15, authorized the Mayor to appoint two delegates. The Mayor wishes to hear from those interested who wish to go to the Congress as delegates.

J. A. Petit was awarded the contract for rebuilding the transmission line between Prescott and Del Rio at \$4.50 per pole, upon his filing a bond for \$500.

The application for the remission of taxes on the Baptist Church was denied by a vote of 2 to 1.

The sum of \$10 a month, for six months, was allowed to the Associated Charities.

Collector Williams reported collections as follows: Taxes \$12,152.22; Alarcon street fund, \$102.20; licenses, \$1,657.75 of which \$950 were for 19 liquor licenses; water, \$3,171.07.

There were seven death and seven births during October, according to the report of Health Officer Southworth.

Chief Heisler reported 44 arrests during the month of which 10 were for drunkenness and 27 disorderly women.

Recorder Robinson reported the collection of \$156 as fines.

According to the City Treasurer, the receipts were \$21,457.94 and the disbursements \$6686.83 with \$13,710.72 for the interest fund, leaving a balance on hand of \$36,765.53.

Water was billed out during October to the amount of \$3,647.02, while the expenses were \$3,594.78, according to Superintendent Hall's report.

### HOME HISTORIAN IS CALLED BY DEATH

(From Friday's Daily.)

The grim reaper has again entered the Pioneer's Home in this city and Florence O'Leary has answered the summons, his death taking place Wednesday at about midnight.

He was among the first to be admitted to the home, arriving from Pima county. At that time he was in feeble health which continued, until a stroke of paralysis several weeks ago hastened the end. Characteristic of the Hassayamp, Mr. O'Leary was a man of wholesouled generosity. In a residence of over forty-five years in Arizona, he was always industrious and a short time before he was admitted to the home, he was engaged in cultivating a farm in Pima county. He was the historian of the Pioneers, and his many articles of early day doings brought out his literary ability that received commendation in and out of the state, as of a high order. He was born in Ireland seventy-three years ago, but when a mere boy he emigrated to America, and ever since had been a useful citizen. He has a son residing at Little Rock, Arkansas, and after he is heard from will the funeral take place. The remains are at Ruffner's.

### FUNDS AMPLE TO FINANCE THE CLIMAX

(From Thursday's Daily.)

R. M. Martin, president of the Climax Mining Company, after a hurried trip to his camp on the Hassayampa to investigate road conditions preparatory to shipping in several carloads of new machinery, returned to Los Angeles Tuesday. He states the new equipment is ready to be shipped in, and had not the road been in deplorable condition, it would have left the above city several weeks ago. The plan of development for the Climax, he states, has been outlined on a permanent basis and ample finances are available.

### OLD MINE RESUMES.

(From Thursday's Daily.)

A crew of six miners was sent to the Mark Twain mine near Jersey Lily yesterday to begin development. L. C. Gould having assumed charge under a bond and lease. John McDonald will be the foreman, and is conversant with underground conditions, having recently been associated with the property. The Mark Twain was operated in early days and was a success. The reviving of this old time producer is attracting very much attention in that field.

# GIVEN CHANCE TO DO ASSESSMENT WORK

## Suit of Williams et al Against Pascoe Successful

(From Saturday's Daily.)

In the Superior Court yesterday a favorable decision was given F. H. Williams, B. H. Smith and Mrs. Augusta Simpson against E. J. Pascoe, in injunction proceedings granted to restrain the defendant from interfering with the plaintiff in the performance of annual assessment work on the Ingersoll group of mines in the Bradshaw mountains.

The plaintiffs alleged that they sent men to the camp to begin the legal work, but that the defendant interfered and would not permit their agents to enter the ground. The Ingersoll mines are more familiarly known as the Tuscumbia in which all of the above parties are interested. The temporary injunction granted was also made permanent.

When the case of Logos Mining Company vs. Lon D. Hall was called P. W. O'Sullivan was substituted as counsel for defendant, Reese M. Ling, withdrawing.

### CATTLE MARKET STILL CONTINUES FIRM

KANSAS CITY STOCK YARDS, Nov. 4.—There was a good many readjustments of values in the various classes of cattle last week, price changes being governed by the volume of the supply in each class. More short fed steers came in than in any two weeks previously this fall that kind lost 15 to 40 cents. Prime steers are not considered to have been involved in the decline, though there were none of the finished variety offered. Cows and heifers continue scarce, and they closed the week 10 to 15 cents higher. Veal demand got ahead of the supply, and prices went up 25 to 75 cents. Stocker and feeder demand fell off a little and values slumped off 20 to 30 cents. Quarantine steers sold readily, and closed with the same advance noted on cows and heifers. Range cattle from the Panhandle, New Mexico and Colorado were offered freely, and had to stand the same mutations as the offerings from native territory. Killing kinds sold quickly today at 10 to 25 cents higher prices, the 10,000 head received not being enough to go round. The condition today is largely fictitious, but it reflects a healthy basis. Stock and feeding cattle were content with a slight advance today, and cows and heifers likewise sold merely strong, veal calves up another quarter. Top short fed steers \$10.00, quarantine steers \$6.15, range beef \$7.25, feeders \$7.25, stock steers \$6.75, range cows and heifers \$6.00, panhandle cows \$5.25, wet cows, \$4.40, veal calves \$9.75.

The hog break was stopped the middle of last week, and considerable repair work has been done since then, continuing today. Run is 5000 here today, price 5 to 10 higher, top \$7.90, bulk \$7.65 to \$7.85. Country buyers are advised to beware of breaks this month, as prices are said to be too high to warrant heavy packing operations.

Sheep and lambs are looking up somewhat, runs having fallen off from the range country. Dealers have been expecting a rise for some time, which was defeated by unexpected heavy receipts up to this time. Run is 10,000 today, market 10 to 25 higher. Demand for feeding stock is good. Fat lambs bring \$7.00 to \$7.35, feeding lambs around \$6.25, yearlings up to \$6.00, wethers \$4.75, ewes \$4.25.

### SAYS DYNAMITE WAS PLANTED BY OWNERS.

SALEM, Mass., Nov. 7.—In the trial today of Urbano Diprate, a shoemaker who was arrested when dynamite was found in his shop, said it was the belief among the strikers that the dynamite was "planted" at the instigation of the mill owners to prejudice the cause of the strikers.

William H. Wood, president of the American Wood Company who was indicted on the charge of "planting" dynamite, was summoned as a witness and will appear in court on Monday.

### Journal-Miner—High class job work

# MILLIONS INVOLVED IN BIG MINING DEAL

## Frank Murphy About to Sell to Guggenheims the Christmas, Imperial And Congress Properties.

PHOENIX, Nov. 8.—Negotiations for the sale to the Guggenheim interests of the Christmas, Imperial and Congress mines and the Sasco smelter, all owned by the Development Company of America, have been practically completed. Several million dollars are involved in the deal, which has been engineered principally by W. T. Earle who was formerly manager of the El Paso smelter, a Guggenheim plant.

Frank M. Murphy, president of the Development Company of America, Mr. Earle and a large party of persons affiliated with the Guggenheims in one way and another, passed through Phoenix early yesterday morning, bound for Christmas. It is stated that their purpose was to make a complete examination of the Christmas mine, which is probably the most valuable of the three to be taken over. The names of all the members of the party were not made known, but it is understood that B. P. Cheney, a director of the Atchison, Topeka & Santa Fe and one of the principal creditors of the Development Company, is among the capitalists now traveling with Mr. Murphy. J. Pierpont Morgan, who holds a million dollar mortgage on the Imperial mine, is also represented in the party, which probably will go from Christmas this afternoon.

It is reported on good authority that a working bond and option is to be taken on the three mines and that the Christmas will be worked first. It already has an immense tonnage of copper ore developed. The ore will be treated at the Hayden smelter of the American Smelting & Refining company, a Guggenheim subsidiary. The Christmas sulphides are needed as flux for the ore from the Ray mines, also owned by the Guggenheims. If the deal goes through it means that the Guggenheims will hold the biggest properties in the Christmas and Ray districts. It means that Frank Murphy, who successfully promoted the Crown King, Congress and other big Arizona mines, will once more be on his feet. Since the slump of 1907, Murphy has had a hard time to keep his head above water. The Imperial and Tombstone Consolidated holding companies of the Development Company of America, went through bankruptcy proceedings. This was mainly because of Murphy's unbounded faith in the Tombstone Consolidated. Between six and seven million dollars were spent there, combating the heavy flow of underground water. The fight has not been a successful one and it is doubtful if the Tombstone mines will ever produce again to any extent.

# LAST OF CATTLE NOW BEING SHIPPED

(From Saturday's Daily.)

Joe Rudy, R. W. Coughran and Ed. Contreras are in the city from Skull Valley, completing the last cattle shipment for the season of about 500 head, which are consigned to J. C. Wright of Phoenix. Since the middle of September the total shipments made from the western part of the county will reach at least 5,000 head, they state, and the average price per head has been \$35. At no time in the history of the cattle industry has such a prosperous year been in evidence. The range has been good and the prices received have never been equaled.

### CHINESE ROBBED AND BRUTALLY ASSAULTED

(From Friday's Daily.)

Jin Chong, who conducts the restaurant in the rear of the New State liquor house, was brutally assaulted on Wednesday morning about 1 o'clock by a countryman named Yung Ching, with the object of robbery. His assailant used an iron bar, inflicting wounds on the head that are pronounced as serious. The robber secured \$53.15 from the person of Chong, and has not as yet been captured. The wounded Chinaman is delirious most of the time, but during intervals of consciousness gave an account of the attack made upon him and also disclosed the name of the robber.

### CIVIL SERVICE EXAMINATION.

An examination for clerk and carrier will be held at the post office in this city on November 27, 1912. Age limit, 18 to 45 years, on the date of the examination.

Applicants must be physically sound, and must be not less than 5 feet 4 inches in height without boots or shoes and weigh not less than 125 pounds without overcoat or hat.

For application blanks and for full information relatives to the examination, qualifications, duties, salaries, vacations, promotions, etc., address immediately.

ALBERT M. WELLWOOD, Secretary, Board of Civil Service Examiners, Prescott, Ariz.

Read the Journal-Miner.

### SUPERIOR COURT.

(From Thursday's Daily.)

The calendar was called in the Superior Court yesterday and the following cases set for trial on the dates named:

November 18.—Water Hill vs. W. L. and J. T. Richards.

Dowdy and Gibson vs. Edward Ziegler.

November 19.—C. B. Genung vs. S. F. P. & P. Railway Company; Coates vs. S. F. P. & P. Railway Company; Mrs. Marcon vs. S. F. P. & P. Railway Company.

November 20.—Ziegler vs. Bullard. November 21.—Seaton vs. Woodburn; Big Stick Mining Company vs. J. L. Howells; Frost vs. Arizona Blue Bell Mining Company.

The case of McCrum vs. Barlow-Massicks, by agreement of counsel, was dismissed.

In the case of McCauley vs. Broyles, et al., the order made setting the trial for November 22, was set aside.

The case of F. H. Williams et al., vs. E. J. Pascoe, was called for trial and continued to November 8.

In the probate court, the following hearings were set for November 18: The estates of John Tiedeman, deceased, Matthew Welch, deceased, and David Evans, deceased.

A special venire of thirty trial jurors was ordered returnable on November 12.

### JUDICIAL PRECINCTS TO BE INCREASED.

(From Friday's Daily.)

The Supervisors have abandoned their set principle of having three-justice-of-the-peace precincts for Yavapai county. Strong petitions protesting against the former action taken, together with the official representations made by County Attorney O'Sullivan, requesting a modification of the former orders, brought the board face to face with a situation that was resisted sternly by the many communities affected.

Upon the heavy pressure from outside points it is probable that within the next two weeks remedial action will be taken, when the outlying districts will be placed on an official rating that will prove a great convenience as well will the various districts be accorded the consideration asked. Twelve additional precincts are to be established, and the boundaries of each closed up to permit of expeditious judicial action.

The board has rescinded its previous action, at any rate, and that the precincts will be moulded into fifteen instead of three as originally contemplated is assured from the official action taken.

# MONARCH MINE SHOWING UP WELL

## Tailings Yield Well And Ores Average \$16 Per Ton

(From Saturday's Daily.)

Operations on the Monarch mines of Cherry Creek district are under full headway in all departments, was the announcement made Thursday by V. A. Smith, who arrived from the camp. The initial running of the mill and cyaniding plant is proving successful.

This well known gold-producer of early days was recently acquired by Mr. Smith and C. W. Hooover, of Indianapolis, Indiana, and the former will remain to personally direct development. He stated yesterday that the returns from the old tailings dump, estimated to contain about 500 tons, was giving returns of \$5.50 per ton, or within thirty cents per ton of the assay values. Crosscutting from the 170-foot shaft east and west was also going ahead to tap two veins which on the surface contain free milling ores that will average \$16 per ton, in a pay streak of about thirty-four inches. Mr. Smith is enthusiastic over the outlook and the purpose is to follow a line of practical and energetic development. Associated with the good showing on the Monarch he has decided to make Arizona his home in the future, and later will be joined by his wife, who was a visitor a few months ago.

# BAGDAD CAMP IS VERY LIVELY JUST NOW

## Many Men Being Put And Other Signs Of Activity

(From Saturday's Daily.)

Robert E. Miller, whose cattle range is in the vicinity of the Bagdad Copper Mining Company camp on the Santa Maria, reports that many miners and laborers are being placed at work, and it is semi-officially given out that a large line of development is to be conducted.

Big stocks of supplies are being brought in and there is every indication that extensive work is to be performed under a new management. It was also reported that churn drilling was to go ahead with two machines, as well was mine work to be continued at points formerly opened up. With the activity noticeable around headquarters, other mine owners were preparing to resume, and it is probable a very active winter will be the outcome. The damaged wagon road from Hillside to the main camp is being repaired and the bringing in of material and supplies is to be pushed ahead at the earliest date possible.

### EIGHT HUNDRED PER CENT IS THE PROFIT

SAN FRANCISCO, Nov. 7.—Testimony before the State Railroad Commission today in the investigation of express rates shows that the Wells Fargo Express Company on an investment of one million dollars in California earned more than two millions in the state in but two months of 1911. At the same rate the gross earnings for the year would have netted the company a return of eight hundred per cent on the original investment.

### LIVELY COUNTRY.

(From Friday's Daily.)

T. C. Snider, John Berggren, and the latter's accountant, Eric Lindhult, are in the city from Clarkdale, in the Verde Valley, where they report all railroad, smelting sites and other contracts under full swing, with over 500 men on their pay rolls. In a short time the different forces will be added to, and before the first of the year it is believed there will be over 1,500 men at work.
