Friday Evening, Oct. 3, 1873.

THE FEVER.
Yesterday afternoon the General Council met and, we are sorry to say, adjourned without doing what was expected of them towards giving battle to the pestilence which is wasting and destroying both our strong and helpless. For the edification of those indifferent official gentlemen, we beg to paint a little word picture which we heard fall from the lips of a very prominent citizen of this city.

THE PESTILENCE DISCUSSED.
House Sharp Talk for our Editors to Listen to.
Three forms of pestilence have visited our city during the current year. We have found the requisite conditions of siph, apathy and ignorance in their favor, and have developed into epidemics. Epidemics are not misfortunes—they are crimes. Educated men know that they are preventable. Neither cholera, small pox nor yellow fever can become epidemic in a city where proper sanitary precautions are used.

THE CITY LEGISLATURE.
A meeting of the Boards of Aldermen and Councilmen was advertised to meet at 2 o'clock yesterday afternoon in the Second Circuit Court room, but there was a lull in the path in the shape of a small pox case at the head of the stairs, which nobody in the city had the power or inclination to move; so the meeting was held in the Second Chancery Court-room. The following:

THE GOODRICH AFFAIR.
Brooklyn, October 2.—Mrs. Lucille Meyers made the following statement yesterday at the King county jail: "I have been engaged in the Goodrich case since I was released the first time. My only wish has been to aid the police to find the persons they are looking for. These persons are John Henry Beach and another man whose name I will not give at present. Beach is the man who caused my arrest by writing an anonymous letter to the police. He wishes to get me out of the way. They are both very important witnesses."

THE BECKWITH \$20 PORTABLE Family Sewing Machine, On 30 Days Trial.
With strength and capacity equal to any, regardless of cost. The Machine does away with all complications, and with the movement of only two parts makes the Stitch, feeds the Goods, half guides the Cloth, fastens the Beams, sews on Braids, Gatherers and Trunks, and Embroiders. Remember, the movement of only two parts does all this, which enables it to get out of order, and so often the source of annoyance to the operator, besides the ruthless expenditure of force in propelling them. Our Semi-Guiding Feed requires the assistance of only one hand over any other.

HUMAN HAIR GOODS MADE TO ORDER.
Largest and Cheapest Stock in the City
