Tennessee Historical Society.

The February meeting of the Historical Society of Tennessee, occurred on Tuesday afternoon, at the Capitol.

Quite a number of contributions were made, and we regret that we have not room for a detailed list. Among the books presented, was one from Prof. GEORGE S. BLACKIE, an active member of the Society, printed in the year 1552. It is the Lyons edition of the Materia ter, born in Cilicia, who flourished in the days of Nero. The first edition of the Greek text of Dioscorides was published at Venice, 1499. A better edition was issued at Paris in 1549, and a still better one at Lyons in 1552, of which the copy given to the Society is one. This copy possesses unusual interest, as it contains the set of thirty rare engravings. which were destroyed after a few copies had

The Hon. JOHN BELL contributed some thirmong which we find the 1st and 2nd volumes of Commodore Perry's Japan Expedition, beautifully illustrated; Explorations for a Pacific Railroad; David Dale Owen's Geological Survey of Wisconsin, Iowa, &c.; Report of the Superintendent of the United States Coast Survey, &c., &c.

Our friend, Capt. E. D. Farnsworth, contributed a small section of a branch of the Charter Oak, (Hartford, Conn.) Also a letter from ARCHY FIELDS, a half-breed Cherokee, to Capt. MATTHEW MARTIN, of Bedford county, Tenn. It is dated Cherokee Nation, Chickamauga District, June 12th, 1828.

Capt. THOMAS CLAIBORNE, of the Mounted Rifles, U. S. A., contributed a spoon made from the horn of a mountain sheep, obtained near Fort Laramie in 1853, from an O-gal-lal-lah. (Sioux or Dacotah) Indian. The bowl of the spoon is 9 inches long by 64 wide, and is 34 inches deep.

Mrs. CLEMENTINE H. HOLMAN, of this city, sent in one of the epaulettes worn by Col. RICHARD BOYD, in the battle of Talladega. Also, the bullet with which he was wounded. in the same battle. Mrs. H. also contributed various papers and manuscript letters, formerly in the possession of her father and grandfather. They contain the autographs of Exgovernors Blount, McMinn, and Carroll, and

SINGULAR PHENOMENON.—At Bangor, Jan. 20th, a most singular exhibition was visible in the heavens. The sky was almost entirely clear, except a slight haze, and the sun was very brilliant. On each side of the sen, and Mrs. C. J. F. Wharton, Mrs. Hart, equidistant from it about five or six degrees. Mrs. Gleaves. were two brilliant mock suns, vulgarly called sun-dogs, from which sprung a well-defined bow of light, which formed a complete semicircle over the sun. Several degrees above Mrs. Lewis Lanier. the centre of this semi-circle, toward the zenith, was a beautiful bow, showing the prismatic colors and turned opposite the semi-circle. This beautiful phenomenon continued all the forenoon, and was witnessed by thousands. At one time there was also a small bow with prismatic colors, but much fainter than the one we have described, at the right of the right mock sun.

Annual Report of the Secretary of the

Protestant Orphan Asylum. On an anniversary filled with touching reminiscences, our first emotion is deep and heartfelt gratitude to the author of all our blessings, for his watchful care and guidance since the commencement of our enterprise to the present hour. Most truly gratifying to us is the contemplation of our orphans in the enjoyment of health and a comfortable home. We congratulate ourselves on the aid we continue to receive from the Free School, towards their steady advancement in intellectual improvement, leaving to us the industrial and moral portion of their education, thus happily co-operating in the formation of their characters for future usefulness.

Ample grounds surrounding the Asylum afford them, in the short intervals of leisure, the opportunity of relaxation necessary to health and cheerfulness. They still perform all the manual labor of the household, and make their own clothing. The neatness and order that prevail evince the judicious superintendance of the Matron, Mrs. Spencer, who, since her short stay with us, entitles herself to

our thanks and kind consideration. The happy arrangement of transferring some gone, and prepare for the side-ache. The bill of our orphans to desirable situations in respectable families by adoption, will, we trust, secure to them, the vigilant care and attention they have received from us, and we hope will result in mutual friend-hip that may in-

fluence their future destinies. We have, as yet, no cause to regret placing some of our larger girls in the "house of Industry," thus qualifying them by a knowledge of useful needle-work to obtain a respectable independence when they will be wholly thrown on their own resources.

We cannot be too thankful to those who, from time to time, have kindly assisted us in placing books on our shelves; and indulge the hope of similar favors. By encouraging our girls in reading well-selected authors, we hope to establish a permanent claim on their kind recollection, when in future, they may be called to persue a path which will require the direction such moral guides point

The contemplation of an almost exhausted treasury, for some time past, would have filled us with fear and dismay, had we not relied on the sympathy that has never failed in the trying hour. Our patronizing friends respond in the usual way, and we can give no more earnest assurance of our grateful appreciation of their attendance, than the wish that they may have many enjoyments of as pure and elevating a nature as were elicted on that occasion. There can be no higher benevolence than that extended to young children. When we fold around them, in their innocence, the arms of charity, do we not imitate that encouraging notice of them expressed by our Savior. What better impulse than the wish to "light

a smile" on their young faces. There can be no more important trust laid on our responsibility than the care of the rising generation. Our little girls have within them the germs of future excellence. Transplanted to a genial soil, with watchful care and culture, we trust they will expand in beauty of character, and in their usefulness spread a moral influence around them. To qualify them to fill respectable stations will be the consummation of our

Thus far have we witnessed the answer to our orphan's prayer, "give us our daily bread." We humbly trust we shall be the instruments of giving support and shelter to those whom the late visitations of Providence have given a claim to our sympathies. To all cases of destitution we cheerfully open our doors, assured of the kind co-operation of our friends and the public. Such timely appreciation of our wants at this inclement season, will swell the tide of gratitude, lifting up our hearts to that Great Source of mercy to whom the mariners cried in their peril, "save or we perish." To our benevolent friend, Dr. R. C. K. Mar-TIN, we would acknowledge our deep sense of obligation for physical services in cases of ill-

ness at the Asylum. Dr. J. Brown entitles himself to our repeated thanks for medicines furnished during the

The publishers of the city will accept our grateful sense of their kindness, with sincere wishes for their prosperity. All who have made us donations we include n our present hope that blessings may attend

Paraffine Cannel Coal Oils for Lubricating Machinery.

Is Scotland the Cannel Coal-Oils have been very fa vorably known and extensively used in the place of Sperm, for the last few years. Oils of a similar nature and quality are now being made by the Union Coal and Oil Company, and are very highly valued wherever known. This Oil has the same weight and will bear the same temperature, when winter strained, as the best Sperm, and is fully equal to it as a Lubricator; having been subjected to the severest tests upon both heavy and light machinery, and given entire satisfaction. This Oil is peculiarly adapted to Railroads, Cot-Spindles. Machine Shops, and all machinery where a fine Oil is required. It is more economical than ordinary Oils, as it is sold at about the same price. and as half the quantity will do an equal amount of lubrication and do it better.

This Oil being entirely without gum, should be used the same manner as the finest sperm. The openings of the cans and feeders used for ordinary coarser Oils should be reduced, otherwise, the Oil will be wasted. These Oils will be furnished to dealers at the factory prices, adding freights, insurance, and exchange, and all Oils sold by this company are fully guarranteed as

This will certify that we are using the Paraffine Cannel Coal Oil made by the Union Coal and Oil Com-pany, Maysville, ky., in our Machine Shop and on the locomotives on the road, and have tested the Oil very carefully to discover its qualities; we are entirely con-vinced it is a very line Oi' for machinery, and that one on of this Oil is fully equal to two gallons of the est Lard Oil. It being entirely free from gum, our machinery will run with less power than with any Oil we have used. Although the Oil has a thin appearance, it has a inbricating body superior to any Oil in ordinary use and it is well adapted to Railroads.

Nashville, Tenn., Jan. 30, 1858. We are using the Paralline Cannel Coal-Oil in our Ma hine Shop, and take great pleasure in stating that we best quality of Lard or other ordinary oil, is free from gum, and is just such an oil as is needed for machinary. We doubt not it must come into general use. We think this oil fully equal to the best Sperm, and that one gallon is worth more than two of the best Lard Oil. J. B. ROMANS.

MASTER MECHANIC'S OFFICE, M. & C. R. R. Memphis, January 9, 1858. This will certify that I am using the PARAFFINE CANNEL-COAL OIL manufactured by the Union Coal and Oil Company of Mayaville, Ky., in our machine and on the locomotives on the Memphis and eston Rallroad, and have given it the several ests, in order to prove as qualities as a lubricating oil. I have no hesitation in recommending it as a suerior oil for Railroad purposes, both in regard to conomy and as a perfect Enbrigator. I believe it to e the best oil I have used, and that one gallon will go as far as two gallons of Lard Oil. The machinery is now running in the shops with twenty per cent. less power than is required for ordinary oil. The fluidry of the oil arises, I am convinced, from the total absence of gum, and does not effect its lubricating proand feeders should be reduced in order to use the oil

WM. R. NICHOLS, Master Machinist. MAYSTREE Ky . November 14 1857 To the Union Coal and Oil Company: Gentlemen—Having used your Lubricating Oil, made rom Cannel Coal, on the machinery of our Cotton Mills (including Engine and Spineles), for the last few weeks, we are prepared to say that we have found it reatly superior to any other, excepting the heat rm, and fully equal to that article, for which we two dollars and twenty five cents per gailon. The wears long, and is free from gum, which causes from on, and consequently heat. In view of the superior quality of this Oil, we have dopted it for our Mills. From the low price at which

t is sold we doubt not it must come into general use.

VICTORIOUS FOR FAMILY USE!

Opinion of the Judges of the late Mechantes' Fair. AT the late Mechanic's Fair, held in the City of Nashville, in October, 1857, the Judges appointed to examine articles in Class 43-No. 17, GROVER & BAKER'S Sewing Machines: No. 164, SINGER'S-REPORT upon the PRINCIPAL points and merits of the two machines as follows:

The machines are both two-thread machines, that is, using two separate threads for making the stitch; that of GROVER & BAKER using the thread from COMMON SPOOLS WITH TWO NEEDLES; and that of Singer's using one spool and one needle, the other thread working from a BOBBIN INCLOSED IN A SHUT-TLE, and, in the opinion of the committee, i best adapted to FINE CLOTHING, SAD-

COMPLICATED MACHINERY, AND, OF COURSE, EASIER MANAGED; advantage of USING SPOOLS WITHOUT RE-WIND-ING; and, with the exception of fine clothing, saddlery, &c., in the opinion of the Committee is BEST SUITED FOR FAMILY USE The part of this report referring to

the Singer Machine as best adapted to fine Clothing was intended to be UNDERSTOOD BY THE COMMITTEE as best FOR MANU-FACTURING CLOTHING BY TAILORS, IN WORK-SHOPS, &C. THE SAME IN REFERENCE TO SADDLERY, &C. NASHVILLE SEWING-MACHINE COMPANY. NO. 4. PUBLIC SQUARE, Nashville, Tenn. Nashville, Tenn., January 20, 1858-tf

WHEELER & WILSON SEWING MACHINES A ND would respectfully invite the Ladies of Nash-ville and surrounding counties to call and examine them, before buying, as one examination only is neces-cary to satisfy any one that these Machines are just what are wanted in every family.

The following are some of the good qualities of the

Wheeler & Wilson Machine, Peauty and excellence of nitch, alike upon both sides of the fabric sawed; economy of thread; simplicity and thoroughness of construction, pertability, case of operation and management, speed, quickness of movement, strength, furnises, and durability of scam that will not rip or ravel; applicability to a variety of purposes and materials, compactness and elegance of model and finish. Call and see them.

A BUSINESS this year, we feel that a word of explanation may be necessary to some of our very perfection friends, who have had accounts with us, ever since we commenced business, and we are proud to say we have many such friends, who have always paid their accounts promptly. We feel confident we can make it greatly to the interest of all, by buying our goods cheaper, and of course selling them very much chapter, and of course selling them very much would prefer buying for cash, if it could be made to their interest to do so. We know many who do not have accounts, and we think it acfair that persons who buy on credit. It is with these considerations we have adapted an exclasive cash system, as well as all those who are in favor of boying goods cheap to give us a call.
