

Our Nation's Wealth.
Gold and silver are poured abundantly into the lap of the nation, but our material wealth and strength is rather in iron, the most useful of all metals, just as the wealth of a human being lies in a useful stomach. If you have overworked yours until it is disabled, try Hostetter's Stomach Bitters. It will relieve the clogged bowels, improve the appetite and cure constipation and dyspepsia, biliousness, liver and kidney disease.

The twentieth century will have about 380 eclipses, the solar being to the lunar in about the ratio of four to three. For the first time in any calendar year since 1823 the year 1935 will have seven eclipses, the largest possible number. The total solar eclipses visible in the United States will occur in 1918, 1923, 1925, 1945, 1954, 1979, 1984 and 1994.

The lights have been placed on each side of the tunnel on a level with the windows of the cars, so that during the daytime it will not be necessary to use the lights in the cars.

ITEMS OF INTEREST.

A regular carrier pigeon service has been established between the different islands of the Hawaiian group.

Japanese servants are more and more in demand every year in New York. They are looked upon as more capable than any other kind of domestic help. There is one serious objection to them. They lavish their politeness and courtesy on the masculine members of the household in which they are employed, and cannot be induced to treat the women with respect.

Two plucky sisters, the Misses Marion and Lena Josselyn, aged respectively 18 and 22, found an intruder in their house at Manchester, N. H. The elder locked the front door and shouted to her sister to similarly attend to the rear door. Then both of them simultaneously attacked the burglar, and in a few minutes had him bound to a heavy bedstead. In this condition the police, who had been summoned by telephone, found him.

SMALLPOX DISTRIBUTORS.

How the Germs are Nurtured and the Disease is Spread.

It would seem that people will never learn to be careful. The recent alarming spread of that dire epidemic, smallpox, throughout different sections of the country has been traced by physicians and sanitarians in many instances directly to the moldy and rotting layers of paper and paste which cover the walls of many houses. The practice of laying layer after layer of paper on a wall, using common flour paste, is especially calculated to create homes for disease germs. People could not do more to effect such a result if they tried. The rotting vegetable matter affords caves from which are ready to dart forth the infection at every opportunity. There is no excuse for this practice, as walls and ceilings can be coated with a pure, clean and sanitary material like Alabastine, for instance, at no greater expense. Alabastine is a rock-based cement, which incorporates itself with the wall or ceiling. It is easily applied, comes ready to mix with cold water, requires no washing or scraping before renewing or retinting, is beautiful, long-lasting and safe.

For walls that have been infected, nothing is equal to Alabastine as a disinfectant to render them pure and clean and the rooms once more habitable.

NOT UP IN THE CLASSICS.

A Congressman Who Was in the Dark as to Title and Colophon.

A certain member of the house of representatives, nameless hence to honor the other day and mysteriously invited him to his committee room. The correspondent cast a chevron of tobacco out of his mouth in anticipation, and followed the statesman to the seclusion of the place designated. "Say," said the member, looking carefully to see that only the two of them were present, "I want to ask you a question in confidence."

"Oh," responded the correspondent in a tone of disappointment, "is that what you wanted?"

"Yes; and if you can give me the information I am after you will do me a great favor."

"All right," said the correspondent, recovering his wonted spirits, though the other kind were lacking, "what is it? Go ahead with your rat killing."

"Well," began the member in a manner reminding one of the prefect to honor, "I had one of the boys look over a speech I am going to make, just to see what he thought of it and make a suggestion or two to improve it, if necessary, and he's got something into it that I'm not up to."

"What is it?" asked the correspondent, as the member hesitated.

"Well, I'm fairly wily on the Bible, and when I come across the sentence 'anywhere from Dan to Beersheba,' I know what it means well enough, and also know about Dan and the other one. I had that in the speech, but he said it was a chestnut by this time, and it would sound more tony and abrupt if I changed it to 'anywhere from Dan to Beersheba,' but didn't let on. Now, you are a friend of mine, and I want to ask you about this. As I said, I'm up on the Bible, but I don't know the classical business a little bit, and while I can kind of catch on to Title, I'd like to know in thunder Colophon was. Do you know?"

The correspondent explained, and the member saw to it that his cast-out chew of tobacco was not wasted.—N. Y. Sun.

Could Change His Mind.

Prof. Hendershott is well known in Pittsburgh as a man of affable temper, and it is rare that he shows even impatience. One day while traveling on a suburban trolley car to call on a friend, he asked the conductor to transfer him to the city street cars at a certain point. Soon afterward the car stopped and he was surprised to see outside the very friend he was seeking. He started to leave the car, when the conductor accosted him. "You can't change for your car here," he said, brusquely. The professor passed him, taking no notice. "Can't change cars here, I tell you, snapped the conductor again. The professor, deep in conversation with his friend, merely waved his hand to signify that the car might go on without him. "Here," cried the man in brass buttons, angrily, "don't I tell you that you can't change cars at this place?" Then the good old professor answered with severity: "But I can change my mind at this station, can't I?"—Golden Days.

He Dealt in His Dream.

"May you take this lesson home with you to-night, dear friends," concluded the preacher at the end of a very long and wearisome sermon. "And may its spiritual truths sink into your hearts and lives to the end that your souls may experience salvation. We will now bow our heads in prayer. Deacon White, will you lead?"

There was no response.

"Deacon White, this time in a louder voice," Deacon White, will you lead?"

Still no response. It was evident that the good deacon was slumbering. The preacher made a third appeal and raised his voice to a pitch that succeeded in waking the drowsy man.

"Deacon White, will you please lead?"

The deacon rubbed his eyes and opened them wonderingly.

"Is it my lead? No—I just dealt."—Detroit Free Press.

Readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

It is hard for a crooked man to tell a straight story.—Chicago Dispatch.

The above illustration shows one of the mammoth buildings occupied by the great Mail Order House of the John M. Smyth Company of Chicago.

For one-third of a century this Company has been in business. Beginning in a small way they supplied their neighbors in the near-by towns, each year widening their field. They are now selling merchandise direct to the consumer at wholesale prices throughout the United States.

Some years ago they began supplying their customers with an illustrated catalogue. As the business expanded they were obliged to increase the size of this catalogue, until to-day it exceeds 1,000 illustrated pages, quoting the lowest prices on everything from Hat, Wear and Use. By a superior process of color photography they illustrate many of their goods in natural colors, bringing out the rich color value of curtains, carpets, draperies, and the latest designs in wall papers, etc., thus enabling the customer to see exactly what he is selecting goods at his own fireside, knowing by the description, illustration and price the class of goods he may expect.

This feature of their business is becoming more and more popular each year, for it not only saves long and tiresome railroad journeys but is a great time saver. It leaves out the profit of the jobbing house, the retailer, the expensive commission merchant, the general agent, the sub-agent, and thus eliminates a great deal of profit.

In addition to the catalogue, the company has a great store of goods brought to the home. The catalogue is a great store of goods brought to the home.

A California Medicine.

THAT IS GUARANTEED TO PREVENT AND CURE

MALARIA and CHILLS and FEVER.

There is manufactured in San Francisco, California, a medicine that is sold under a positive guarantee to cure all forms of malarial poisoning, chills and fever, swamp fever, dumb ague, etc. This remedy in Casca Ferrine. It is not a secret patent medicine, but, instead, the formulae of the preparation is made known to all. One of the chief ingredients of Casca Ferrine is Casca Sagrada, the bark of a small tree that grows nowhere in the world but in California. Casca Sagrada has no equal as a liver and intestinal tonic among all the drugs known to medicine. All physicians throughout the world regard it as one of the most valuable of all drugs. It is strictly tonic in its action and effect on the liver and bowels, and there is positively no reaction from its use, as is the case with every other medicine that acts specifically on the liver, such for instance as calomel, aloin, jalap, podophyllin and similar drugs. It is impossible to cure malaria, chills and fever, etc., unless the liver is kept active, and the bowels open so that the poison can be expelled from the body through these natural channels. This is one reason why Casca Ferrine is so effective in preventing and curing all forms of malarial poisoning. It acts as a natural tonic to the liver and bowels, tones them up, and in a short time places them in such a healthy condition that they will act naturally without the aid of medicine.

In addition to Casca Sagrada, the only other ingredients of Casca Ferrine are Cinchona, the bark of quinine is made from, and which is as valuable in medicine as a general system tonic; Malt Extract, the greatest of nutrient and reconstructive tonics, Iron, the food of the blood, the bowels, which so often result from infected air and impure water. If your druggist does not carry Casca Ferrine in stock, write us.

Casca Ferrine also prevents biliousness, makes digestion perfect, enriches and purifies the blood, gently relaxes the bowels when constipated, and causes the action to become permanently regular. These results, which it can be depended upon with an absolute certainty to effect, render the system proof against malaria. Casca Ferrine not only fortifies the system against malaria, but also prevents and cures all disorders of the stomach, liver and bowels, which so often result from infected air and impure water. If your druggist does not carry Casca Ferrine in stock, write us.
