### FACTS ABOUT FRUIT.

Huckleberries are Ripening too Fast—Plenty of Blackberries.

Swamp huckleberries are very plentiful and ripening early and very fast. Too fast the pickers think, and they say the crop will soon run out on that account. They hold them at two quarts for a quart or fifteen cents a single quart.

Blackberries are rather small, but plentiful and very sweet and of excellent flavor. Some parties are selling them at eight cents per quart. No doubt but the larger berries will bring a better price as some of the berry pickers think eight cents too little.

A few ripe tomatoes have been picked by one of the farmers near the borough and Mr. Kingham, of the Heights, has already sold some very fine early beets to one of the vegetable men who supplies people in the borough with vegetables. So the farmers are not doing so badly notwithstanding the peculiar weather we have had. Peaches are a failure, it is said, and the birds have helped themselves to most of the cherries.

### A QUIET WEDDING.

One of South Amboy's most charming young ladies, Miss Gertrude Morrill, the only child of Mrs. Phoebe Morrill, was united in marriage to Mr. August C. The bride was attired in a handsome pearl colored cloth, tailor made traveling suit, trimmed with silk. The happy couple left town on the 7.28 Central train for a wedding trip, destination unknown at present. On their return they will reside with the bride's mother for the summer season.

The show left about 1 o'clock for Camden.

### LOUBET RETURNS HOME.

Leaves London Amid Shouts of "Long Live the President!"

LONDON, July 10.—President Loubet's visit to London was brought to a close when the French visitor left the Victoria station for Dover. The scenes and incidents of his departure testified to how the republican president by his unassuming dignity and cordial sincerity has captured all classes and won popular good will.

Crowds lined the route from St. James' palace to the railway station and British "hurrahs" and French "vive Loubet" re-echoed through the streets until the president had entered the station. Here the nation's guest was met by the king, the Prince of Wales, the Duke of Connaught, Lord Lansdowne, Premier Balfour and other notables.

King Edward grasped M. Loubet's right hand and shook it with extreme cordiality.

After renewed handshaking his majesty showed the president into the royal car and stood chatting with him until the train pulled out amid cheers and shouts of "Vive Loubet" mingled with the strains of the "Marseillaise." President Loubet stood at a window of the car waving his hat in his gloved hand until the royal special disappeared from view.

Upon his arrival at Dover M. Loubet embarked on the French cruiser Gulchen and the vessel sailed at once for Calais, escorted by a British torpedo flotilla and followed by salutes from the fleet and castle.

### THE JEWISH PETITION.

Roosevelt Wants the Issue Entirely Outside of Manchuria.

WASHINGTON, July 10.—The president has decided that the matter of the Jewish petition must be finally disposed of before any further effort is made here to compose the issues arising out of the Manchurian situation. Therefore it is now said that nothing is likely to be done in regard to Manchuria until next September, by which time, according to the last Russian engagement, the evacuation of Manchuria by Russian troops, save railroad guards, should be complete.

It is understood that the Russian government has set up as one reason for not sanctioning the opening of new ports in Manchuria the necessity of allowing her first to complete the evacuation of Manchuria, and although the reasoning is rather obscure on that point it is understood that our government is willing to wait until September before making the next move.

### THE MOSQUITO PEST.

In Swarms They Sing to and Prey Upon Jerseyites.

NEW YORK, July 10.—From many points in New Jersey and from practically every section of Long Island come reports of swarms of mosquitoes, more numerous and more ferocious than ever known before. In Long Island the pest is smaller than heretofore, and means of protection usually effective have failed. In New Jersey town authorities are planning an energetic scientific warfare to obtain relief.

Newark residents for several days have been suffering from a particularly severe plague of mosquitoes. They are of a small, dark variety, more vicious and numerous than any previously known there, and at night come into the city from the meadows in clouds. The local board of health is preparing to begin the work of extermination by ditching about 500 acres of meadows and thus destroying the breeding places.

Reports from many sources indicate that within the last few days myriads of the tiny pests have been swarming in clouds from Montauk point to Long Island City. Natives who have withstood the annual mosquito campaign for years without a murmur have capitulated before the present onslaught, while newly arrived summer guests at the many summer resorts are in despair.

Fifty members of a Brooklyn regiment now encamped on the shore of Lake Ronkonkoma, N. Y., before they had a chance to pitch their tents were attacked by myriads of mosquitoes. They were kept busy during the night smoking the enemy out of the tents. The soldiers will leave the place.

### Warrants For Murder.

NEW YORK, July 10.—The presence of an irritant poison, probably acetic, was discovered in the small section of intestine taken from the body of Colonel William J. Best at the autopsy. Dr. Herbert B. Baldwin, chemist of the Newark (N. J.) board of health, who made the test, assured Charles Sumner Best, a son of the dead man, that he had found enough to be certain that Colonel Best's death was due to poison. Warrants will be issued on the charge of murder for the arrest of John Donald Woods and Alice Cloy Woods by Thomas P. Boyd, public prosecutor of Marin county, Cal.

Mr. Herbert recommended that a committee be appointed to represent the Editorial association at that congress, and the suggestion was adopted.

#### BUILDINGS BURNED.

Fire Rages on a Farm Near Port Reading—Neighbors Work Hard.

Fire broke out in a barn on Theodore Leber's farm near Port Reading on Wednesday night about 11.30 o'clock. It was discovered by one of his men who slept in a building near by. He called Mr. Leber and then ran to the stable and saved some of the cattle and horses. A valuable driving horse was lying down and every means was used to get him out, but it was impossible. He and two cows were burned.

In the meantime a number of neighbors appeared and worked heroically, but it seemed impossible to stop the rush of the flames as they leaped from building to building. As it approached the buildings near the house, the men tore off boards from the nearest building and by the time the flames reached it, they had it almost down. Buckets of water were thrown on the roof of the house and the fire did not harm it. The carriage house was also saved.

An alarm was sounded and a telephone call was sent to the firemen at Carteret, but they were directed the wrong way and the buildings were almost destroyed when they reached the scene. Two wells were pumped dry and an unused one had to be brought into service by means of a rope.

A word of praise should be given the Italians and Hungarians as well as the American citizens who worked as for their lives.

The farm hand, who gave the alarm, lost \$17 and all of his clothing except those that he wore. He was slightly burned.

Alleging that her husband deserted her, Magdale Howe, of Carteret, has instituted a suit for divorce in the Court of Chancery at Trenton, against her husband, John Howe, Jr., who is now residing at Shanghai, China.

About the time of their removing to Carteret, it is alleged, Mrs. Howe was deserted by her husband, and he has never returned to her, and she has since learned that he is living at the Astor House Hotel, Shanghai, China.

Mrs. Howe's maiden name was Allen. Counsellor George Berdine represents Mrs. Howe.
