## WAR ALARM HERE FAST DISAPPEARING

Trade Conditions in the United States are Steadily Improving, is General Opinion.

Washington, Aug. 9.—The feeling of apprehension, the fear that "something is going to happen" to the United States because of the European war, has almost entirely disappeared, according to a special report submitted by the committee on statistics and standards of the Chamber of Commerce of the United States.

Even granting the possibility of the United States being entangled in the world conflict, there is evident now, according to the committee's report, a pronounced belief that business is bound to improve and show distinct advancement.

Confidence in the future has grown with the steady progress of the crops and the slow but continual improvement in industrial affairs.

The committee finds that in the main the thoughts and interests of the great mass of producers, whether in the city's industrial life or in the country's agricultural pursuits, are in constructive measures which will benefit their particular communities rather than in either the great national or international problems.

## AIR SPECIALISTS FOR BOARD.

Two Named by Engineer's Society With Advisory Committee.

New York, Aug. 9.—There will not be room for all the aviation specialists on the navy advisory board, Secretary Daniels' mobilization of the country's inventors. So in nominating two members of the board the American Society of Aeronautic Engineers has named a special committee composed of eleven experts to help its nominees.

The society has named to sit on the navy board Henry A. Wise Wood, its president, and Elmer A. Sperry, inventor of the gyroscopic stabilizer for aeroplanes.

J. N. Carlisle Quits State Job.

Albany, N. Y., Aug. 9.—John N. Carlisle retired formally today from the position of adviser to the state highway commissioner and will resume the practice of law.

Modern plowing.

In the United Kingdom steam plowing is generally carried on by the engine system, introduced by John Fowler in 1865. The most improved plow in the United States consists of large engine drawing behind them a number of plows, sometimes covering a space of thirty feet.

## GET PRINCESS IN A SPY NET.

Sister of Prince of Wales Held in France For Four Hours.

London, Aug. 9.—A member of the British royal family, thanks to the espionage net of the allies at the front, has been arrested charged with being a German spy. For four hours Princess Mary was held under guard.

Having gone on an incognito visit to the hospitals at the front, Princess Mary, accompanied by Miss Dussau, started to meet her brother, the Prince of Wales, at the British headquarters. Unluckily they had forgotten their passports and permission papers, nor did the patrol recognize royalty in the name of Lady Chester, which Princess Mary gave. Their auto was held up until their identity could be established.

## UNION TO FIGHT FOR LAWSON

Gompers Asks Federation to Help Convicted Colorado Leader.

Washington, Aug. 9.—President Samuel Gompers of the American Federation of Labor announces arrangements for a nation wide campaign to obtain the freedom of John Lawson, the Colorado strike leader who was sentenced to life imprisonment. Mr. Gompers sent his instructions to all unions affiliated with the American Federation of Labor, which has a membership of 2,000,000.

## SISTERS SEE BOLT KILL BOY.

Youth in Bathing and Laughing—When He Is Stricken Suddenly.

Phillipsburg, N. J., Aug. 9.—George Feas, fifteen years old, of 41 Howard street, was killed instantly by lightning as he was bathing with several hundred persons at Sand Island, in the Delaware river. None of the others was even stunned. Feas' sisters, Hazel and Emma, saw him laughing when the bolt hit him.

Weather Forecast.

Unsettled today; probably thunder showers; fair tomorrow; moderate south and southwest winds.

## WEATHER EVERYWHERE.

Observations of the United States weather bureau taken at 8 p. m. yesterday follow:

Temp.	Weather.
Albany..... 70	Cloudy
Atlantic City..... 74	Cloudy
Boston..... 78	Cloudy
Buffalo..... 70	Cloudy
Chicago..... 70	Clear
New Orleans..... 84	Clear
New York..... 71	Cloudy
St. Louis..... 82	Clear
Washington..... 72	Cloudy

Obviously misleading.

Passing a swimming pool in a small city one day two country women read this sign at the entrance: "25,000 Gals. In and Out Every Hour." "That's all nonsense," said one of the women. "There ain't that many women in this whole county."

## U. S. WILL MAKE HAITI SECOND CUBA

General Caperton is Paving the Way for Stable Government on the Island.

Washington, Aug. 9.—Reports from Haiti indicate that the island is tranquil and that official circles and the people generally are accepting in a friendly spirit the effort of the United States to assist in the establishment of a stable government.

It is now accepted for a certainty that as things are now drifting the United States will in due season establish practically the same relations with Haiti that exist between it and Cuba. It will adopt something in the nature of a Platt amendment, under which the United States will assist in creating a stable government in Haiti, reserving the right to occupy the island in the event of the recurrence of disorders, guaranteeing Haiti against outside interference at the same time.

Admiral Caperton, who is at Port au Prince, advises the navy department that conditions are excellent at Port au Prince, Cape Haitien and elsewhere in the island, with the possible exception of St. Marc, which is forty miles from Port au Prince. A force may be sent to St. Marc if conditions there warrant such action.

## BEGINNINGS OF NEW YORK.

Except One, Its Early Colonial Governors Were a Sorry Lot.

Queer were the instruments with which the early history of Manhattan island was fashioned. Of the four Dutch governors not one was competent. Minuit was fairly wise, but was active in furthering the patron system, feudalism pure and simple. Wouter van Twiller, who was five feet six inches tall and six feet five inches in circumference, was a fool; William Kieft was peevish, avaricious and dishonest, and old "Silver Peg" Peter Stuyvesant was a despot.

Of the English governors all but one, and he a shining exception, were as bad as the Dutch. Lord Bellomont was the partner of Kieft, the pirate; Lord Cornbury was a degenerate who painted his face and went slithering through the streets; Slaughter was a notorious drunkard; Lovelace, Hunter, Burnet, Montgomerie, Cosby and Clark were worthless; Nicolls and Andros have little to their credit.

The exception was Thomas Dongan. Few perhaps appreciate the debt America and the world owe to Dongan. The bill of rights or charter of liberties, which he drafted while governor and gave to the colonists, formed the basis of the Declaration of Independence which Thomas Jefferson wrote nearly a century later. It marked the first step in the march of events that led to the birth of this nation of freemen.

Little, perhaps, did Dongan know of the mighty consequences of his act. How could he? He ruled but a portion of Britain's colony in America. New York, named for that ill fated Duke of York who became James II., was a mudhole. Berlin was a marsh. Constantinople vied with London for the title of greatest city of the world. Boston and Philadelphia were more populous than New York. The trade of Salem was larger—Commerce and Finance.

Practice Doing Right.

Doing is the greatest thing. For if resolutely people do what is right, in time they will come to like doing it.—Ruskin.

## SEEKS FAME ON THE STAGE

Chinese Girl Aspires to Be the Sarah Bernhardt of the Oriental Race.

For all of her Irish name, Peggy O'Wing has never seen Ireland, nor, for that matter, have her father and mother had any Irish ancestor. Peg is the daughter of Mr. and Mrs. Wing Book of Newark, N. J. Of course one wonders why, if her father's name is Book, she is called O'Wing. The Chinese do things which we Americans seem to be puzzled over. It is because her father and mother are Chinese that her name is O'Wing. That signifies daughter of Wing, Wing being Mr. Book's surname. Though she is thoroughly Americanized, some of the oriental ways which she has not forsaken added charm to the fair Celestial.

Would Be Bernhardt of Race.

maiden who is seeking a husband. Peg is, according to the manner of Chinese reckoning, eighteen years old, but only seventeen according to the American method. Now eighteen in China is considered an old age for an unmarried girl, and her father has endeavored in every possible way to aid Dan Cupid, chinamen by the scores have come to the Book home and have been captivated by the charms of the fair maid, but she would have none of them, because she has made up her mind to have none but an American husband. Her charming features resemble those of a Spanish beauty, and that is saying something, for when a Spanish girl is a beauty she is "some pippin." Peg O'Wing has other aspirations besides securing an American husband, for she aspires to be the Sarah Bernhardt of her own race. It was against the wishes of her father, who is a prominent merchant, that she studied for the stage, for in China the parent of a girl frowns on any attempt of his child's disposing herself for the admiration of the crowd. Consequently a stage life for the Chinese woman is never encouraged. So rare is the Chinese actress in China that men often play the roles of women. Miss O'Wing will be the only Chinese actress in the United States. Her three sisters are praying that she will meet with the success she deserves on her initial appearance in New York. She speaks Italian, Chinese, German and French as well as English, and she feels that an American of her ideal type will appreciate her more as a wife, than a Chinaman.

## POLICE DOG MAKES ARREST

Gets Vagrant While on Nightly Stroll and Proves Right to Be on Payroll.

Detroit.—Franz, the police dog, earned his right to be on the payroll a few days ago when he arrested one Dave McCarthy, a vagrant, who sought alms from the traveling men emerging from the Pontchartrain hotel.

Dave's appearance and the smell of his breath did not appeal to Franz, so he backed the derelict up against the wall and barked for his attendant, Patrolman Thomas Hudson, who had Franz out for an airing.

On Franz's complaint Dave was taken to central headquarters, where he was registered as a vagrant.

## KIDS ROUT CATERPILLARS

Twenty Thousand Nests Are Destroyed by Fire and Acids in Washington.

Everett, Wash.—Fifteen hundred school children participated in organized warfare against tent caterpillars during the week past in Everett, with the result that about 20,000 nests were destroyed by fire and acids. Interest in destroying the pests was aroused by the principals of schools, and now that the children have learned to burn them it is believed the school youngsters will be an effective means of defeating the annual invasion of the caterpillars.

Has a Hard Time.

Someone is quoted as having said that of all the letters in the alphabet "E" is the most unfortunate, "because it is always out of cash, always in debt, never out of danger, and in hell all the time." It is also the most frequently used letter in the alphabet.

## REAL ESTATE FOR SALE

\$250,000 worth of property ranging from \$1,000 to \$1,600—Prices to suit all customers. THORN

## SECRET OF STEADY GOLF.

It Lies in Proper Use of the Club and Nerve Control.

There is no such thing for any man as eternal steadiness, but there is no reason why most golfers shouldn't develop a much greater steadiness than is shown. It is all a matter of practicing two things—the proper use of the club and concentration, or nerve control.

Remember at each practice or during each friendly round to try to make your brain work as well as your arms and legs. Remember, above all other factors, that it is vital to the success of the shot that you keep your head still.

Instead of a "looking at the ball." Make it a point to school your brain as well as your muscles, for the brain is in control of the muscles. The golfer who can't concentrate, who doesn't bring concentration, will never be able to develop steadiness, although he may be a fine shot maker and may be capable of some wonderful rounds.

So, to put a few suggestions into compact, concrete form, the following are offered to those who desire a change for the better in their golfing steadiness or unsteadiness:

First—Practice concentration—keeping your mind on the ball as well as your eye.

Second—Make up your mind to accept a bad lie or some bad luck as part of the game and to be expected.

Third—Play each shot as it comes, without regret over past mistakes or worry over future troubles.

Fourth—Practice the short game, shots around the green, at every possible chance. It is here that scores are reduced.

Fifth—Practice with the brain as well as with the arms and legs. Cultivate brain control over muscle—Jerome D. Travers in American Magazine.

Man's Debt to the Candle.

After the lamp came the candle, whose modest ray we are inclined to regard with a considerable amount of kindness and esteem. But for the candle the dark ages of the world would have been dark in a still more literal sense than they already were, and to this humble servant civilized mankind was indebted for the very best illuminant it possessed, certainly until the latter end of the eighteenth century, and probably right up to the time of the invention of gas.

Daily Thought.

The duty of a man is still that of a man—fear—Carlyle.

## SITUATION WANTS—FEMALE

WOMAN would like to have washing and ironing to do at home. Inquire 452 Convery Place. 8-9-3t.

GIRL 14, wants situation to help with general housework or take care of children. 393 Park Ave. 8-6-3t.

FOUR NICE ROOMS for small family. Rent \$11.00. Inquire 380 New Brunswick Ave. 19051-7-7-1t.

LIGHTING OUR LIVES.

Lines Along Which Physicians of the Future May Work.

Some day there will be a new physician who will be part engineer and part medical student. He will ask you no personal questions, and his prescriptions will be filled by a dealer in lamps and lighting fixtures; yet he is a man who can cure the world of half its grouches and ill temper.

The new doctor will investigate your home from the standpoint of lighting efficiency. Have you enough or too much light? Is the wall paper soothing to your eyes, yet economical from the standpoint of lighting efficiency, or does the color of it and its figures cut your nerves like a ragged edged knife?

Medical men have said that many a murder has been the result of a glaring incandescent light and red wall paper. When the denizen of a flat building curses the pianist across the way his ill temper may be caused by his desk light and not by the piano at all. The eye can stand less abuse than the ear, and were it in repose the grouch would probably fall to notice the doubtful music. The lighting doctor probably will find the cause of that grouch and remove it.

Instead of a stethoscope he will use an Illuminometer. The illuminometer is a device to tell in figures just how bright the light on your book is as you sit and read. It is used by lighting engineers, municipal lighting departments, building inspectors and others for determining the brightness of natural or artificial illumination. Portable, easily and quickly used and utilizing the familiar methods of measurement, it is a complete outfit for making photometric measurements.—Technical World.

New Medical Term.

"Homograde" is the latest addition to the confusion of thermometers. It is designed for the physician, and gives variations from the normal body temperature in figures that can be instantly read and interpreted. With zero at the freezing point, 100 degrees is the accepted normal blood heat, and 270 degrees is the boiling point of water.

NOTICE TO CREDITORS

Adrian Lyon, Executor of Mary E. Barton, deceased, by direction of the Surrogate of the County of Middlesex, hereby gives notice to the creditors of the said Mary E. Barton, to bring in their debts, demands and claims against the estate of the said deceased, under oath or affirmation, within nine months from this date, or they will be forever barred of any action therefor against the said executor.

Dated August 7, 1915.
