Wait a Little Longer.

There's a good time coming, boys, A good time coming-

When printers shall be paid their dues— Their children wear new frocks and shoes, In the good time coming: The devil's pittance shall be paid,

His pantaloons sewed stronger, And a bran new hat to crown his head-Wait a little longer!

There's a good time coming, boys, A good time coming-Subscription lists shall swell in size, Proportioned to the enterprise, In the good time coming; And every farmer in the land Shall feel his mind grow stronger, By taking agricult'ral prints-

Wait a sittle longer!

There's a good time coming, boys, . A good time coming-When at editor can pay his debts, (Which now too often he forgets,) In the good time coming; He'll settle off his old accounts, To make his credit stronger-With half dimes in his tob tor change-WAIT A LITTLE-LONGER!

AGRICULTURAL.

Wintering Sheep.

It is a prevalent notion among many of our farmers that sheep need no protection during winter, and will not do well if confined to yards. The centrary is the fact; and although it is better, perhaps, to give sheep more exercise than other stock, especially the Merino and South-Down breeds, yet they do very well in small yards, and require, at least, the protection of roofed sheds, open only on one side, and when it snows, such as can be closed all around. The sleets and rains of a northern climate, during the months of March and Daugherty, Daniel April, are worse for sheep than the snows of winter. Snow they easily shake off, and leave their fleeces dry; not so with the rain. This penetrates to the skin of all but the Mering breeds, and superadded to the drenching overhead, when not protected, they are obliged to stand or lie down on cold, wet ground, than which, nothing can be more pernicious for sheep. To prove that sheep will do well in much clo-

eer yards than they are usually accustomed to be kept in, when we were in Orange county, Mr. Pelton, of Montgomery, showed us his sheep barn, 20 feet by 48, the under story of which he devoted for shelter to a flock of 70 sheep. On the south side of this is a yard, also 20 feet by 48, boared up so close and high as to make it dog-proof. Here Mr. Pelton has kept his sheep for two winters, allowing them to go out twice a day to drink at a spring a short distance from the yard. He takes at a spring a short distance from the vard. He takes townships in said county, on the first Tuesday, care to salt them regularly, and feed them well; being the 7th day of November next, and then and tered better than he ever knew it to do before. We saw the sheep, and their appearance corroberated all that Mr. P. said of them. It has been proved by repeated experiments, that sheep, when sheltered, keep on much less food than when left to run at large; and when we consider the saving of fodder, their superior health and condition, and above all, their security from destruction by dogs, no humane man or good farmer will grudge a trifling outlay to properly shelter his flocks .-New York Agriculturist.

From the Connecticut Farmers' Gazette, New Method of Grafting Apple Trees

Plant the seed in rows at a suitable distance from each other, and the hills say about five feet apart to each row. But one tree should be suffered to grow in a place. Now when the young tree is sufficiently grown, in the spring of the second or third year, any quality of fruit may be grafted into it in the following manner: First, bend the tree over and obtain for it a firm resting place, either on a block or a board resting on the knee, (after it has been divested of its branches,) and with a stout sharp-pointed knife, pierce holes directly through the centre of the tree, about five inches epart, into which the scions are to be introduced... leaving above, two or three buds. A trench is then to be dug, in a direct line between the trees, about four inches deep, and the whole tree bent down and buried, leaving the tops of the scions above ground. In this new condition, the scions become uniformly thrifty young trees, supported and nourisbed from the buried tree, fram which imue, in due time, roots from its entire length. The second year from this operation, the whole parent tree may be dug up, the new growth sawed sport, and transplanted. It will thus be seen that if the tree is five feet in height, ten or twelve young trees, of whatever quality is chosen, may be obtained in this way, whereas by the ordinary method of grafting, there could be but one, provided the graft lived. The young scion will bear fruit thus transplanted, in the same time it would had it been grafted into a tree fifteen years old.

I know not whether this process is new among your agricultural community at the north; but I have repeatedly witnessed it in Georgia and Alabams, and I have been informed by some of the best horticulturists in those states, that it is always ouccessful. Yours, respectfully,

HENRY LEE.

From the Cultivator.

Fall Transplanting.

Persons of limited experience differ in their and Fall for transplanting trees, while the most rdy kinds.

Some believe that the apple, pear, plum, &c., can be moved with the least injury in the Fail; while the peach and apricot will succeed best in the Spring. Mr. Downing says, in relation to the peach, "north of New York, it is better always to nake plantations in the Spring. South of that mit, it may usually be done with equal advan-

My experience has confirmed me in the opinion. that in our latitude fall planting for the peach is hetter than spring, if set on dry ground; and they

should be placed on no other. On the 5th, 6th, 8th and 9th of November last, set in the orchard one thousand five hundred. worked on budded peach trees; and now, on examining them, find that all are alive but ten; the trees are not only alive, but are making a good growth, so that the rows can be seen half a mile. I have six hundred peach trees, which have been in the orchard from three to five years, the most of which were transplanted in the fall, with success equal to those set last Autumn.

The manner of preparing the ground, and treatment of those set last fall, has been ar follows:-The field was sowed to buck wheat last se ason; after that was harvested, straight furrows were plowed one rod apart, then furrows were run the other way the same distance; where the furrows crossed ed each other was a mark for a tree, and the plowing assisted in digging the holes. The roots were set no deeper than the plow run; they were filled up a little more than would be required for spring

Early in the spring they were examined, to see whether all had kept their position, and if the frost had started any during the winter they were attended to. About the middle of June each row was plowed, the same as a row of corn, with a two horse team, having a short whiffletree for the off side horse; two men followed the plow and hoed

The ground has since been plowed clean and sowed to buckwheat, but none allowed to grow within two feet of the trees.

This field occupies a high and bleak position; front being a level eminence, the balance sloping E. C. FROST. north and west.

Sheriff's Office, Woodsfield, ? September 23, 1848.

Sunfish Mill.

The subscribers would respectfully inform their friends and the public generally, that they have built

A NEW GRIST MILL on Sunfish creek, about four miles east of Woodsfield, on the direct road from Woodsfield to Clarington, where they are now prepared to do merthant and country work, at the shortest notice. Their works are entirely new, and of the best quality, and they assure the public that flour made at their mill shall not be inferior to any other in the

country.

Merchants wishing to have a quantity of grain reduced to flour and packed ready for the eastern or southern market, or desiring to have their grain stored, will find it to their advantage to call on t subrcribers. Wm. & LEVI RICHNER be

DRY GOODS AT WHOLESALE .-WHEELING, VA , are now receiving their fall stock of Dry Goods for Jobbing, comprising a very large and desirable assortment, adapted to the country trade, bought at the present very reduced prices, to which they respectfully invite the attention of merchants; being prepared to offer great

NO CHANGES IN THE WEATHER WILL materially affect the body if the blood is pure. — Every individual, even the most diseased, has within him a germ or root of that original pure blood of our common mother Eve; which germ of pure blood is the supporter of his life, and is in constant struggle to throw off the heterogeneous, corrupt humors, which are the cause of disease in the in dividual. By purging the body of this diseased individual of its bad humors, you allow the gern of pure blood to gain ground and to make blood of a better quality, and so on progres-ively till the whole mass is regenerated; for the good principle r good pure blood, is always striving to be pre dominant over the bud or diseased humors. Let all who wish to be of a fine healthy habit; who vish to have a sound mind in a sound body; who lesire to be able to stand without injury the coninual changes of this climate; who desire to have ealthy children, use the Brandreth Pills, which will effectually cleanse the blood of all bad or corrupt humors, and restore the huma a body to the state of health enjoyed before the introduction of mineral medicines. Remember Brandreth's Pills place within the reach of all health and long life.

BEWARE OF COUNTERFEITS Be very careful and go to the Agent when you want Brandreth Pills; then you are sure of the genuine article. When you purchase otherwise. inquire whether the person selling them knows the Pills he offers you are genuine Brandreth Pills.— Every man knows whether the article he offers you is true or false. Beware of chests!

To insure the full benefit of these celebrated Pills, they should be kept in the house, so that upon rans of limited experience differ in their at once resorted to. One dose then is better than one, as to the relative advantage of Spring a dozen after disease has become established in the

40,000 Volunteers Wanted!

WOOL CARDING. Hellou, Jack! where did you get the igreat big bunch of tolls carded? At my Boss's new carding establishment on big Sunfish Creek, 5 miles East of Woodsfield, 5 miles South of Beallsville, and one mile below Richner's Mill. Jack, who is your boss? He is the very lad that carried on the carding business at Armstrong's Mills on Captina, he has left there and has established himself on Stinfish, where he intends to carry on the above business, in the best style. Is he a good carder? Yes, sir, you might know that, for he beat all the carders on Captina Creek and Sunfish too, and can do it sgain—s-o e-a-s-y. Has he got good cards suitable for fine wool? Yes, sir, he has the best quality of Eastern cards, suitable for all grades of wool. He says if his customers will put their wool in good order he will warrant good be? Five cents it paid when the rolls are taken away. Must be have all cash? O ao, he will take every thing; only some things he don't want. He will take wheat, corn, bees-wax, tallow, dried apples, peaches, wool, &c. He is ready to receive wool for carding, and will be ready to commence carding about the 25th inst. Customers from a distance can have their rolls home with them, by waiting awhile. Well, Jack, what did you say your Boss's name was? JOEL M, OXLEY. Sunfish Creek, July, 29, 1848.

WRIGHT'S

WNDIAN VEGETAB E PIL'S IN THE AMONG THE VOLUNTEERS!-LETTER FROM A HIGH SHERIFF OF SOUTH CAR-OLINA.

Extract of a letter from the editor of the Green-

ville Mountaineer, S. C.
DR. W. WRIGHT—Dear Sir:— * * * A week or two ago I sent you a Mountainer, containing a letter from one of our Volunteers in the City of Mexico, in which he pays WRIGHT'S INDIAN VEGETABLE PILLS, under the circumstances, the highest meed of praise I have ever known a medicine to receive. The Volunteer, William W. Goodlett, Esq., is a gentleman of fine standing-an accomplished and well educated man,

and was recently HIGH SHERIFF of this District. By one of your advertisements in a Charleston paper, I happened to notice the location of your office, and thought you might extract an article of some value in regard to your medicine, therefore I sent the paper. Tde following is an extract from the letter re-

ferred to above: "My health is very fast improving. I procured a few days ago, some of Dr. Wright's Indian Veg-etable Pills, and they have acted on my system LIKE MAGIC!"

Thus it appears that the brave and patriotic Volunteers who have gone to Mexico, to defend the rights and honor of their country, already begin to realize the extraordinary value of this in comparable medicine. Long life to them! HORRIBLE MISTAKES!!

Are sometimes made by confounding one medi-cine with another, and administering the wrong article. Equally horrible are those mistakes which are made in supposing that all Pills are alike, and that therefore it is indifferent which are taken, and if one kind is bad all are bad together. is a very great mistake. There is as much differ-ence between Wright's Indian Vegetable Pills and other articles, as between midnight and noonday! We do not wish any one to take our word merely for this statement. Let any one, having taken other medicine, try this. Nothing more will be

Many persons have been lead away by a COAT ING OF SUGAR, as if they anticipated that it would remove the nausea of the medicine. But they are generally mistaken. Without the SUGAR hose articles have nothing to recommend them. and would not be sold a single day. But with the sugar, and by giving the article a name statlar to Wright's Iudian Vegetable Pills, they gain a temporary notoriety. Wolves they are, in sheep's clothing, of whom the public should steer sufficiently clear.

Let it be remembered that WRIGHT'S INDI-AN VEGETABLE PILLS are prepared with special reference to the laws governing the human ody. Consequently, they are always good, always useful, always effective in rooting out diseas-Every family should keep them, on hand. AGENTS IN MONROE COUNTY.
