MARKET BEARS UP UNDER THE SHOCKS

Close Quite Firm at Top Level of the Day

REPUBLIC STEEL TUMBLES

Stiffness for Call Money a Deterrent Factor, Call Loans Touching 71/2 Per Cent-Bonds More Active, But Irregular.

New York, November 23.-Today's stock market stood up well in the face of a number of untoward circumstances and closed quite firm at the top level of the day and on the most active level of the day. Southern Pacific assumed the leadership of an early advance, which was rather decidedly checked by an outpouring of United States steel preferred, which carried that stock down to 501/4 and awakened renewed apprehension of its further demoralizing effect on the whole stock market. The persistance with which assertions have reappeared that the dividend on the common stock is to be suspended and that on the preferred is to be reduced has made its impression upon speculative sentiments since the authorities in the corporation who have been appealed to for information go no further than to say that the question is one remaining for the future to decide.

The suggestion which found its way to the public today, with the appearance of being inspired, that a reduction of the dividend on the preferred would consort poorly with the corporation's privilege to issue \$50,000,000 of second bonds to restore preferred stock seemed to have a more reassuring effect on the speculators and helped in the recovery of the United States steel preferred. The stock closed with a net gain of a point.

The stiffness of the call money market

was another deterrent factor toward the rise. Call loans touched 7½ per cent. While the demand for money which caused this rise was unmistakable it seemed to be viewed with equanimity. The premium established for New York exchange at Chicago is taken to point to an early return flow to this center, which the high call rate money would help to induce. Confidence is felt also that any real need for money would draw further gold from London. Saturday's arrivals of gold amounted to \$3,390,631, which will therefore be the figures for the full week's averages in next Saturday's bank state. ment. The demand for money is regarded as nominal for the last week of the

month. For these reasons the current firmness of the call money market does not seem to disturb sentiment.

Another factor of possible disturbance was the collapse in Republic steel pre-ferred, which lost seven points. There was no sympathetic response to this, outside a few of the other iron and steel stocks. Circumstantial reports were in circulation of the necessities of the company for additional capital, which, it was alleged, would be met by a bond issue, as well as by relucing the dividend of the preferred stock. A considerable sustaining influence in the market was the strong tone of the local traction stocks, led by Metropolitan securities, with an extreme rise of 41/2. The privilege extended to Brooklyn transit to extend its lines over the new East River bridge and through a New York street in which Metropolitan street railway tracks already lie was accepted by speculators as confirmatory of rumors much prevalent lately of a general merger of New York traction companies. A more cheerful tone on the London market was a help to the May 781/2 787/8 781/4 781/2

The bond market was more active but quite irregular. Total sales, par value \$2,-529,000. United States bonds were un-

CLOSE SHOWS A RECOVERY

Trading Is Not So Active as the Recent Average and Both Classes of Traders Await the Bureau Report.

New York, November 23 .- The cotton market opened firm at an advance of 9 to 17 points on better cables than expected, a bullish crop estimate by a local house, and prospects for rather lighter receipts prime steers, \$5.10@\$5.60; poor to medium for the day.

After a little further firmness, the market became less active and the estimates for tomorrow's receipts of Houston reflected a very large movement, the general ruling becoming rather easier. There was liquidation and soon the advance had been cut down to a matter of 6 to 9 points on the active months. Then came a paron the active months. Then came a par-tial recovery on a renewal of covering \$2.75@\$4.00; native lambs, \$3.50@\$5.50; western sheep by room shorts, but with the weather of | tern lambs, \$3.50@\$4.75. a favorable average and the estimates for tomorrow's receipts at New Orleans and Galveston also very heavy, the market soon began to sag off. While more or

the range being net 1 to 5 points higher, with the tone easy. Sales estimated at 250,000. Trading was not so active as the steady, \$2.10; tar firm, \$1.80; receipts, 257. recent average and there still seems to be a disposition among both classes of traders to await the bureau report before operations of the bureau report before operations. Self-control of the bureau report before operations of the bureau report before erating.

New York, November 23.—Cottonseed oil steady. Petroleum firm. Rosin quiet.

Turpentine quiet.

Alexander & Co., and to covering caused by the failure of irresponsible Texas correspondents to deliver some 20,000 bales to English spinners. The dry goods market presents the usual uninteresting features; sellers are granting no concessions, with buyers operating only for immediate needs. The new wage schedule was put into effect by a majority of New England mills today and is approximately a cut of about 10 per cent and effects some 50,000 employes in the state of Rhode Island, Massachusetts, Connecticut and New Hampshire. A similar reduction is expected to go into effect on next Monday at other mill centers. While this action tends to reduce the earning capacity of the masses, it will be a sustaining

giving the mill man a better margin on which to operate. The farmer is the real problem and his action will count as never before. Interior spots display connever before. Interior spots display considerable strength and while this condition exists it will be difficult to cause any extended decline and while the demand for spots during the last week displayed a slackening tendency, this feature will be more than over-balanced should the movement this week be moderate, as now appears likely. It is unquestionably harder to force down prices than it is to put them up, and we do not advise short sales under any circumstances, but prefer purchases on breaks with the idea of realizing on strong periods.
