EITHER WAY HURTS. A Cross Fire on Coffee Users.

The breaking away from coffee is an exceedingly serious problem to many peo-ple, especially when headaches follow leaving off the drug, and dyspepsia and bowel trouble grows more and more serious if the coffee is continued. So there you are between two fires.

A comparatively easy way-out was taken by a lady from Franklin, Pa., who says, "We had a curious experience with coffee. Husband had been, for many years, a sufferer from dyspepsia, with neart-burn, headaches and general neryous trouble. You see the trouble was we had both used coffee so long that our nerves were in a state of collapse without the usual stimusuch a slave to coffee, but we had to do comething to quit, so the next morning I resed Postum with part coffee and we missed the headaches, then I used less coffee every morning for about two weeks, and then Postum alone for nearly n year now, and I just wish you could see the change in my husband. At a meeting of the Sunday-School Association of Upper Henrico, held last Sunday, to determine whether it was advisable to offer prizes to scholars of the school, it seems that the prize men won. Their argument was that by the offering of prizes children would be induced to come to the school who otherwise might never start. In this manner more would be enrelled and good might be done after they were in the school.

THE WAR ON CANINES.

The wagon for the collection of homeless and unlicensed dogs and goats will this morning begin its work of relieving the city of these worthless animals. The wagon will start early, probably before day, when the dogs are on the move, and when the men can work without being molested by a curious crowd, which would follow if the work were done in the day. This, however, was not decided yesterday evening, and what may be done to-day is not necessarily a permanent arrangenecessarily a permanent arrange

The Finance Committee will meet on Friday evening for the purpose of considering the request of the School Board for an additional appropriation of \$5,600 to enable it to begin the work of completing Randolph School at once. An appropriation of \$15,000 was made in the recent budget, and that was thought at the time to be ample for the proposed work, but on account of prevailing prices of building materials all of the bids are in excess of the appropriation. If the additional amount is not given by the Council the School Board will hardly undertake the work this year.

COUNCILMEN QUALIFY.

The following members of the new City Council qualified yesterday as members of the Council, and will be ready to assume their duties on July 1st: E. W. Miner, T. H. Ellett, H. C. One of the hottest fights that will come up before the caucus of the City Council next week will be that for Police Commissioner from Jackson Ward. The fight is between D. A. Weinbrunn, incumbent; D. The fight seems to be between the incumbent and Mr. McCarthy, Friends of both are claiming victory, but it looks as though Mr. McCarthy will be the winner.

It was comparatively quiet to-day in the Wyoming Valley. There was the usual gathering of crowds at starting and stopping time, but nothing of a serious nature occurred. Some men were stoned on their way to and from work, and several were thrown into pools of water. The fear of bodily harm is causing more men to quit work than are the arguments of the strikers.

President Mitchell was kept busy all

the strikers.

President Mitchell was kept busy all day in his headquarters. He had nothing to say regarding his visit to Scranton last night, where he met Frank P. Sargent, chief of the Locomotive Firemen. Regarding the general strike situation, he said everything was progressing satisfactorily.

The national president had no comment to make when informed that the New York Board of Trade had decided to ask President Roosevelt to take up the task of trying to end the great struggle.

New York Board of Trade and Transportation Asks President to Appoint a Commissioner.

NEW YORK, June 4.-At a meeting of the New York Board of Trade and Transportation to-day, Oscar S. Straus presiding, resolutions were adopted, urging President Roosevelt to appoint a commissioner to investigate the situation in the anthracite regions, and to see if the miners and operators could not be induced to arbitrate their differences. Such power, it was declared, was vested in the Chief Magistrate by Chapter 1963 of the Federal laws, dealing with differences or controversies which may affect interstate transportation and com-

PRESIDENT MAY ACT.

WASHINGTON, June 4.—President Roosevelt spent some time this afternoon, considering the proposition of the New York Board of Trade and Transportation that he appoint a commissioner to investigate the strike situation in the anthracite regions, with a view to effecting an arbitration of the differences between the miners and operators. It is stated that the President has not yet decided what action he will take in response to the suggestion.

HANNA WILL BE COMMISSIONER. Senator Hanna, of the Civic Federation, when interviewed to-night, professed to know nothing of the New York Board's action, but it is intimated in official circles that if a commissioner is appointed, the President will look to the Senator to undertake the task. Convention Committee Votes Down Proposition to Prolong Its Life.

The Convention Committee of Final Revision held two sessions yesterday at which it considered matters relating to the schedule. The last session continued until 11 o'clock last night, at that time the committee was near the end of its'labors on the schedule.

About half of the counties and nearly all the cities of the State have turned in their registration board recommendations.

stated however, that the matter would TO-MC come up again in the committee.

Some of the most influential men of tend. the convention, including some of those who are satisfied of the validity of the proclaimed Constitution, favor this pro-longation of the life of the convention contending that it will cost the State nothing and will safeguard the work of the body and provide for any contingency that

may arise.
Of course the question will ultimately have to be fought out in the convention itself, and at this time it seems probable that the forecast in yesterday's Dispatch will be borne out by the action of the body.

ENGINEERS ADJOURN UNTIL MAY, 1904

Pension Report Adopted-Proposition Made by Federation of Labor Not Likely to Be Accepted.

NORFOLK, VA., June 4.-After having been in session for over three weeks, the National Convention of the Brotherhood of Locomotive Engineers adjourned to-day, until the second Tuesday in May, 1904. when they will again convene in Los Angeles, Cal.

The principal work of the past week has been the consideration of committee reports and resolutions affecting the byaws of the order, and this was concluded this morning, when the Committee on Pensions submitted its report, calling for members of the Brotherhood. The report was unanimously adopted by the conven-tion. It requires the expenditure of several thousand dollars annually.

Few of the delegates would express themselves after adjournment, regarding the proposition of the American Federation of Labor, which has been laid over until the next convention. Those who did talk were strong in the epinion that the brotherhood would never enter the federation. They regard the independence of the order too highly to sacrifice it by affiliation with other organized labor, by which they might be brought into unpleasant complications, by reason of sympathetic strikes.

Grand Chief Arthur expresses himself as satisfied with the work of the convention, and the progress of the brotherhood during the past two years.
