The Situation.

The situation, with reference as to who will control in the coming legislature of Wisconsin, is looked into by a Chicago Record-Herald reporter, who writes from Milwankee as follows.

"With the session of the legislature but a few weeks away everyone is as much at sea as to who is to be United States senator and how the senate is to be organized as they were six weeks ago. The organization will in a measure influence the other question. The caucus of administration senators at Madison a week ago failed entirely of its effect for the reason that but sixteen senators attended and it takes seventeen for a majority. Furthermore, it is by no means certain that all those who attended will support any cut and dried program when it comes to the make up of committees, which are usually selected by a caucus of the senators of the majority party. This year, however, the republicans are divided between LaFollette men and stalwarts, the former having thirteen certain and the latter eleven, with four claimed by both sides. The administration forces expected to organize the senate, as seventeen of the senators were elected as being of that wing of the party. The trouble comes from its being found that all "will not stay put" when it comes to implicit obedience to the administration plans regarding the distribution of the committees and the senate offices. The four Froemming, of Milwaukee; Wilcox, of Appleton; Stevens, of Oshkosh and Sanborn, of Ashland. It is safe to say that these four senators will support the rate bill, and measures which enter into the platform, but in organization of the senate and the election of a United States senator they may or may not be with the administration. Two of these senators will undoubtedly balk at the plan of discipining stalwart senators, who in most cases happen to be old members, and under the traditions, evtitled to place on such committees as

The organization question may again | them. cause trouble when it comes to the elec tion of a United States senator, through friction engendered in caucus, and the disputes over committee selections."

THE plan to create an interstate commerce, court says a Washington correspondent, to act as a court of appeals from the interstate commerce commission seems to meet with favorable comment. The principal feature of the present day discussion is not in ing too much for transportation. The latest plans for courts to determine questions regarding reasonable rates are receiving serious consideration in quarters where it will count for much in the final hearings on the subject here. Representative Cooper of Wisconsin was quoted here as being opposed to interstate commerce questions. He contends that the suggestion means

"Up to the present time," said Mr. Cooper, "I am in favor of authorizing the interstate commerce commission to fix rates. This right of fixing rates is purely a legislative function, and cannot be delegated by congress to a judge. The railroads must understand that they will be forced to choose between government regulation and government ownership, and if they are wise they will hurry to accept the former instead of waiting to be forced into the latter.'

"The right to regulate rates," said Senator Quarles, "Is an administrative function, and as such should be performed by a federal commission rather than by a court. The railroad managers have changed their opinions rapidly and are now assisting the president in his efforts to provide means for giving relief to the shippers of the country."

How a Porcupine Fights a Snake. A man who witnessed a fight be-tween a porcupine and a blacksnake thus describes the battle: "I came upon the scene just as the hedgehog began the attack upon the snake, which was lying stretched out on the road asleep. The hog advanced cautiously upon the reptile and seized its tail in its mouth giving it a sharp bite. Then he quickly withdrew a few feet and, rolling himself into a compact, spiny ball, awaited developments. The snake upon being thus rudely awakened turned in fury upon his antagonist striking the hog again and again with its fangs. The wily hedgehog, secure remained perfectly motionless all the while, allowing the snake to keep up the attack. At every stroke the jaws of the snake would become filled with the spines until at last, exhausted and bleeding from dozens of wounds caused by the needlelike spines of the hog, the snake gave up the battle. This was evidently what the hedgehog was waiting for, as he immediately proceeded to roll over the snake again and again until he had completely disem boweled his victim."

The "Illustrious Hybrid." George Sand, or Mme. Dudevant, the famous French woman writer, scandalized her literary friends by wearing men's clothes. "A long gray overcoat, she herself says she wore, "a woolen tie and-and-a pair of boots." boots were her joy. "I longed to sleep with them. It was this outward mannishness that won for her the title of "Illustrious Hybrid." ever, her hands were beautifully feminine. "It was," says one who knew her, "a delicate hand, all grace, tact, dream of a more perfect combination of the French working class woman's and the aristocratic or royal lady's hand." It will be recalled that George Sand boasted, "The blood of kings is mixed in my veins with the blood of the poor and lowly." She was, as she termed it, "astride" of the two classes,
