

THEY MUST HUSTLE

THIS YEAR SENATORS HAVE TO GO DIRECTLY TO THE PEOPLE FOR RE-ELECTION.

WANT EARLY ADJOURNMENT

Coming Campaign Promises to Be Unusually Interesting and May See President Wilson, Taft and Roosevelt All on Stump.

By GEORGE CLINTON.

Washington.—One reason why congress is anxious to have an adjournment which will enable the members to get back into the political campaign field early is that this year United States senators who wish to be re-elected must go directly to the people for their votes. This is the first time in the history of the country that senators have been on a plane with the representatives in the manner of election.

As Washington politicians view it, the coming campaign is to be an unusually interesting one, notwithstanding that the Democrats claim that they will get back into the political campaign field early is that this year United States senators who wish to be re-elected must go directly to the people for their votes.

The Republicans of course are worried over the continuance in the field of the Progressives. They think perhaps that amalgamation of the two parties will be a matter of the near future, but as Washington views it, amalgamation is just as far off as ever, and perhaps farther off than ever in one sense since the return of Theodore Roosevelt to this country.

It seems likely President Wilson will take the stump to make speeches for his party after congress adjourns, or, at any rate, at a time just prior to the elections. The fact that Theodore Roosevelt is to campaign has spurred the Democratic leaders to urge the president to do likewise.

While the interest in the congressional campaign even at this time, is marked in Washington, there are times when it is overshadowed by the interest in the campaign which is to come two years hence.

President Makes Them Stick. There are many men over in the capitol whose greatest concern today is whether or not they will be able to hang on to their jobs in congress.

Mean Old Uncle Sam. Stamp Clerk—This letter is overweight, madam. Woman—Well, of all the mean people! Why, I've mailed hundreds of letters that weren't anywhere near full weight, and now that I'm sending one just a little bit over you want to charge extra for it.

Consequences. "The two women had a dispute about the contents of an airhole." "What happened then?" "They drew into a passion." "Then what?" "Naturally, they had a falling out."

To Improve Consular Service. Senator Stone of Missouri at the instance of the state department has introduced a bill into congress which changes somewhat the regulations which govern admission to the consular and diplomatic service of the government.

It is a good thing, however, for a young man who wishes to enter the consular service to secure from a representative of his character and fitness, but it is understood that as things are today testimonials from other sources are nearly if not quite equally serviceable.

Provision of Stone's Bill. In the provisions of the bill which Senator Stone has introduced there is a strong suggestion that the merit system will remain a feature of the state department if political pressure in the future does not become too strong.

The adoption of a resolution providing for a state referendum prohibiting any member of the party from voting for candidates on other tickets in local or general elections, whether the Social Democratic party has a candidate for the position in the field or not.

EXTENSIVE EPIDEMIC OF HOG CHOLERA

A Healthy Bunch of Hogs.

A billion pounds live weight produced nearly 800,000,000 pounds of dressed meat and lard. This amount would be sufficient to furnish every family of the United States (average four and a half persons) about 40 pounds.

The losses of swine from disease in the past year, in most southern states, has increased greatly in the northern states. Thus, in Florida the loss has decreased from 170 per cent in 1912 to 150 in 1913; in Georgia, from 165 to 90; in Alabama, from 104 to 100; in Mississippi, from 154 to 110; in Kentucky, from 95 to 90; in Missouri, from 175 to 90; whereas in Iowa the loss has increased from 160 per cent in 1912 to 255 per cent in 1913.

The losses of swine from disease are estimated by the department at 119 to every 1,000 hogs in the country, which exceeds last year's heavy loss of 110 per cent, and the average yearly loss in the preceding ten years of 54 per cent.

The percentage of loss applied to the estimated number of hogs on January 1 indicates a total loss of 7,005,000 head, which, at \$10.40, the value per head on January 1, indicates a loss of \$73,000,000.
