

REPUBLICAN, ESTABLISHED SEPT. 5, 1878.

FARGO, NORTH DAKOTA, SATURDAY EVENING NOVEMBER 18, 1905.

FORUM ESTABLISHED NOV. 17, 1891.

PLENTY of COAL

Is always on hand in this yard to supply your needs, but it's just as well not to wait until the last minute to replenish your bins. However, in that case please us and we'll send around a "hurry up" wagon to keep your fires from going out. We do the same with wood of all kinds.

PHONE 1269

Gibbs Grain & Fuel Co.

T. D. PLATT, Resident Manager.

TWENTY YEARS AGO.

Nov. 12.—The hanging of Riel was postponed to Nov. 16.
Ben Arthur, a local pugilist of Bismarck, was found dead in bed in that city, and it was thought that his demise was caused by a fit.

At the meeting of the city council Charles H. Mitchell resigned as alderman from the Sixth ward and the resignation was accepted.

An ordinance was introduced, providing a license of \$100 for life insurance agents soliciting business in the city, and this was referred to the city attorney for his opinion.

Nov. 13.—G. G. Hartley resigned as register of the landoffice at Duluth. Messrs. Childs and Wisner were at St. Paul negotiating with General Bishop and ex-Governor Marshall for the sale of the Dakota Great Southern Railway Co.

B. F. Platt, who for some years had

been in the offices of Francis & Francis and Spalding & Templeton, resigned to open a law office for himself on Eighth street south.

Nov. 14.—A fire at Galveston, Texas, destroyed \$1,500,000 worth of property. The dairymen at Chicago were very much agitated over the fact that oleo margarine was allowed to be shown with their products.

A. B. Searls reached Fargo from Batavia, N. Y., and announced that he intended to make Dakota his future home, having purchased a section farm, near Leonard. He was accompanied by his son, Dean, who had an engagement to teach school out on the Sheyenne. Mr. Searls is now living at his old home in New York state in somewhat feeble health, and the son, who accompanied him to Fargo, died in Duluth several years ago.

Edward Sherburne sold to Sarah Huntington city property for \$10,000. At the annual meeting of Shioh Lodge F. J. Thompson was elected Worshipful

Master and S. J. Hill, secretary.

Nov. 16.—Governor Hannifin returned to Bismarck and advocated the erection, in that city, of a monument in memory of the late Stanley Huntley.

Report was current that Secretary Teller had resigned and would be succeeded by Captain McCormick, as secretary of the territory.

Major Wisner announced that he had sold the Dakota & Great Southern railroad to General Bishop, and it was rumored that the price was \$100,000. This line was expected to run from Tower City to Sioux City, Ia.

John Vinson was running the Continental restaurant.
Captain Flint reached Fargo to make this city his permanent home, and his family would soon occupy the Roberts house on Tenth street south.

Thomas McKenzie announced that the Presbyterian church was duly organized at Wild Rice.

The G. A. R. post was organized at Tower City.

Dr. E. P. Kinyon reached Fargo and opened offices in the Davis block. He was a brother of M. C. Kinyon of Grandin.

Nov. 17.—Louis Daniel Riel was executed on the scaffold of the barracks by a mounted police, near Regina, and met with his fate with the calmness of a patriot.

Senator Dolph, of Oregon, prepared a bill for the admission of Washington as a state and included the pan-handle of Idaho within the limits of the proposed new state.

Emmett Orr, who had been in the newspaper business at Devils Lake, came to Fargo to represent the Northwestern Car Co. of Stillwater.

The Anoka newspapers announced the marriage of Judge John H. Horsford, of Ottawa, to Miss Carrie Thompson. Judge Horsford was an old timer in Dakota territory and resided here most of the year.

Oct. 18.—The twentieth anniversary of the marriage of the blue-eyed Dane and Mrs. Charles Peterson was celebrated at Osage, Ia.

It was rumored that the two candidates most prominent for governor of the territory of Dakota were Colonel Sheafe, of Watertown, and Hon. Barney Caulfield, of the Black Hills.

The completion of the James River Valley railroad to La Moure from Jamestown was duly celebrated with a banquet and music by the band. There was quite a long account of the wedding of Henry Goerdes and Miss Emma Huhner, the ceremony being per-

formed in a very impressive manner by Judge W. P. Porterfield, who is now the compounder of drugs in Fargo instead of the exponent of the law at Davenport.

LA MOURE FIRE.

LaMoure Chronicle: That a goodly part of the business section of LaMoure is not in ruins at this moment is due partly to chance, but mainly to the fact of "preparedness"—the fire department saved the day—and the town.

It was about 5:30 o'clock Thursday morning when someone discovered a blaze in the little building on Eighth street owned by H. S. Diesem and occupied as an office by the Edwards-Wood grain commission company. An alarm was turned in and the fire department got into action with splendid alacrity. The interior of the building was a mass of flames, which had also burst through the roof and sides, when the hose company reached the scene, but in a very few moments after the water was turned on the fire was completely subdued. This was the first practical test of the water works in connection with fire protection, and it certainly "made good." What is needed to make it thoroughly practical and doubly efficient is another hydrant on both Front and Eighth street, several additional hundred feet of hose, and the relocation of the engine room; it is too far from the business center.

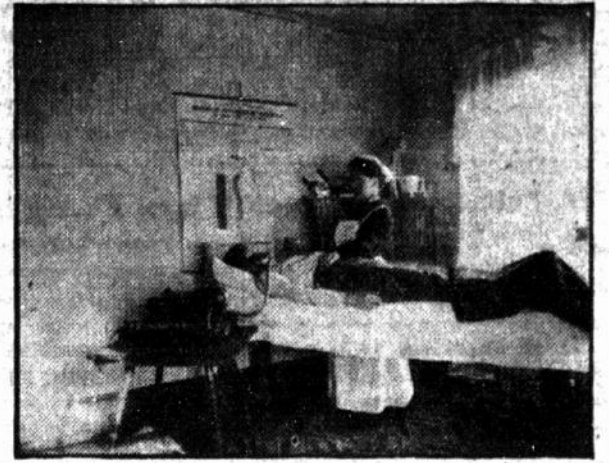

The Butler & Rhodes building, occupied by Temple's jewelry store, was quite badly scorched, but was not seriously damaged. The loss on Mr. Diesem's building is practically total; the building was completely gutted, and is hardly worth repairing. It was worth about \$200, and was insured for \$100. The loss to the Edwards-Wood company, while not heavy, was complete. Effort was being made by Mr. Harmon, the resident manager, to secure office rooms, but The Chronicle did not learn whether or not he was successful.

\$40.00 TO EASTERN CANADA.

Soo line through car route. Dec. 4 to 31, via Minneapolis and St. Paul. Save both time and money. No inconvenient transfer, no tiresome and expensive delays. The best of service in every way. For particulars apply to L. M. Harmon or W. D. Hughes, traveling agents, Hotel Dacotah, Grand Forks, N. D., or write W. R. Callaway, general passenger agent, Soo line, Minneapolis, Minn.

Ozone Cure for

Tuberculosis,
Is, Colds,
Catarrh,
Bronchial
Affections,
Asthma, Hay
Fever, Con-
gested Lungs,
Laryngitis, Rheu-
matism and
All Germ
Diseases.

Ozone manufactured by electricity, administered direct to the lungs—purifies every part of the body.

Pure Ozone exerts a powerful therapeutic influence upon the respiratory organs. Pure Ozone, as properly applied by Dr. Cavanagh, director of The Fargo Sanitarium, tends to purify and also to increase the blood stream, building up diseased tissues and strengthening the system.

Inefficiency of Drugs

Every physician realizes the inefficiency of the most potent drugs in dealing with many of the most common diseases. The germs float in the blood current, attacking first one organ of the system and then another, until, finally, a weak, vulnerable organ, finds itself unable to resist the attack and succumbs. But now Dr. Cavanagh's new Ozone apparatus properly applying this powerful gas to the patient renews the blood corpuscles, and is considered the most powerful alleviative medicine yet discovered.

Application of Ozone

Ozone is carried into the body and is taken into localized areas from Dr. Cavanagh's Medical Ozone Generator by inhalation, bringing all the tissues of the lungs under its influence, passing through this tissue into the blood stream and destroying all germ diseases by removing the cause. A peculiar discovery was made by Dr. Cavanagh after long experience in which one-half better results are obtained if the patient is reclining and respiration is properly regulated when the gas is administered.

Write Dr. Cavanagh about your case. Write now. The Fargo Sanitarium is fully and modernly equipped—it is more the quiet home than a hospital—no smell of medicine, pleasant, light, roomy large porches, lawns, trees. Accommodations the best and very reasonable. Electric, magnetic, hot and cold water and hot air baths and manual treatments. Write today about your case and for terms. Do it now.

FOSTER'S FORECASTS

(Copyrighted by W. T. Foster, 1904.)

Washington, D. C., Nov. 18.—Last bulletin gave forecasts of disturbance to cross continent Nov. 15 to 19; warm wave Nov. 14 to 18, cool wave Nov. 17 to 21. Next disturbance will reach Pacific coast about Nov. 19, cross west of Rockies by close of Nov. 20, great central valleys Nov. 21 to 23, eastern states Nov. 24. Warm wave will cross west of Rockies about Nov. 19, great central valleys Nov. 21, eastern states Nov. 23. Cool wave will cross west of the Rockies about Nov. 22, great central valleys Nov. 24, eastern states Nov. 26.

This disturbance will come with a general average of moderate temperatures. A very considerable warm wave will inaugurate the disturbance as it passes eastward and then a great fall in temperatures that will cause the last week in November to be unusually cold with snow storms in latitudes where these sometimes occur.

An astronomical event of unusual interest will occur Nov. 23 when the earth will pass between Jupiter and the sun, the former passing about one degree north of a straight line drawn from the sun to Jupiter. I expect this to cause an electric shock to the earth that will affect telegraphic and telephonic communication on this continent but I am not now prepared to locate these electric disturbances. Two dates of electrical contact should be noted. Nov. 22 and 25 and then watch the weather effects during the following three or four days.

I expect December to come in unusually cold on meridian 90, a little earlier west, a little later east of that line. Following Nov. 18, the atmosphere will be recovering from the cold wave and a few days of Indian summer, frosty mornings and warm during mid-day hours, may be expected.

The St. Louis, Mo., Midland Farmer for October said: "What an unmitigated humbug the United States weather bureau is. A man with but one eye can outguess that bureau. Its work partakes of the ridiculous and is expensive, costing \$1,500,000 a year. An entire revolution is needed in that bureau for, as now conducted, those millions might as well go into the ash-heap. We have known many farmers who could beat that bureau in percentages of correct forecasts. Instead of brow-beating independent weather forecasters, the weather bureau should take a vacation."

About sunset Jupiter rises nearly in the east and is in a small cluster of stars forming the letter A, or V. Mars and Saturn appear to be near each other and set about 9 p. m. They can be seen in the southwest in the early evening. The other planets are not favorably located for observation. The moon will appear to be near Mars Dec. 1, Saturn Dec. 2, and Jupiter Dec. 13. The seven stars are a little above or west of Jupiter. All the planets move around the sun from west to east and nearly all the moons move around their central orbs in similar

directions. Our sun is also moving around a center, supposed to be near the seven stars, making the revolution in about 25,000 years. The center around which our sun is moving probably revolves around some other great center while the great center of all is unknown to astronomers. It is my theory that each of these bodies is a magnet and that they affect each other as their distances change, in accord with magnetic laws.

BAD RUNAWAY.

Wheatland Eagle: A team of horses hitched to a democrat wagon and belonging to Chas. Trichter, became frightened at a pusher engine on Front street yesterday about noon and ran away upsetting the rig opposite the Burnham and Wilson residence. Mrs. Trichter with her son Joseph, were the occupants. The former sustained a broken leg in the mixup and Joe was badly bruised. The unfortunate lady was carried to the home of B. L. Burnham where every attention was given her. Dr. Jameson was called and set the fractured limb.

Dr. Salvage, the family physician and who has charge of the case at present, says Mrs. Trichter was not dangerously injured otherwise, and will have the use of her leg again in a short time.

SOZODONT TOOTH POWDER

is of proven value. Sixty years is a pretty good test. No acid, no grit. Ask your dentist.
