DAIRYMEN WILL

First Monthly Session of Dairymen's Association to Be Held on Nov. 9.—Consider Sanitation.

A series of monthly meetings of the Fargo & Moorhead Dairymen's association, which was recently organized. will be started by a meeting on Nov. 9. At this meeting Dr. Dunham and Emerson H. Smith will talk to the dairymen on sanitary dairies in relation to the health of a city.

It is believed by the dairymen that the proposed pasteurizing plant has been abandoned by the promoters and it is thought unnecessary in providing a pure and wholesome milk to the consumers of the two cities. They will undoubtedly take steps for the bettering of conditions on their dairy

Meetings will continue to be held nonthly on the second Monday each month,

A WOMAN'S PLEA.

To The Forum: Aeons ago there floated in space, in a most haphazzard way a gaseous heap that resembled sphere. It revolved at terrific speed for innumerable ages; but as passed it commenced to move slower and gradually cooled. One morning it was discovered to be solld, with water-ways running through it. It vas a long way on its evolution by ity of life. this time, and all kinds of planetary predictions were current as to what it rould eventually do; for it was an esstarted out upon its journey in space as an atom, and gradually attracted It was watched with interest by the great planets, for it seemed so offic-

Time passed, and this heap suddenly ecame a small, insignificant planet this new state, she realized for the she could assume any proportions in hat her bosom was cold and bleak. The consciousness of being barren made her unhappy. After pondering lie thoroughfares. for a very long time, she suddenly oncieved the plan of attracting to herself some other sphere, for she felt the need of close companionship. After many days of deliberation, the sun seemed the most available and also the most useful, for his magnetism greatly attracted her. The earth made wise choice, for, with the assistance of the sun, most wonderful foliage sprung upon her bosom. For innumerable ages she revolved upon her axis quite satisfied; but one day she be-came greatly restless. For a long time she passed through the throes of dissatisfaction until it was made clear to her that it would be a clever feat to evolve a something that might move of itself from place to place. Her wish was eventually gratified, for it came about that mammoth animals roamed about upon her bosom. felt now that her possibilities for greatness were unlimited.

Many days of quiet satisfaction passed, but this only meant that she was scheming for further glories. It dawned upon her one day that the clumsy animals were not what she subtle thing called intelligence, and they did not have the power to devel beyond their present state. Knowbeyond their present state. Know-ing that it was unprofitable to have staionary conditions of life about her, she did away with her mammoths. She also knew she had within herself, potentially, every element within the universe. She could, by striving hard enough, bring about all kinds of curious life. After experimenting for countle

ages, she gradually evolved man to his During her experipresent status. mentation, all kinds of impulses and desires were evolved that were inherent within herself. Unwittingly, for she knew no better, she related man to all the impulses, passions and desires, not knowing what the outcome would be. In fact, she little guessed what a tumultuous world she was nanifesting, and the queer potentialities it inherited fro mher. It occured to her that man was teh most successful thing she had evolved; and one memorable day it dawned upon her that he had the will to act separate the answer. from herself-which alarmed her much and that her doom was inevitable Her absolute sway was a thing of the past, which greatly grieved her. What troubled her most, however, was the terrible heridity she had given Of course, it could not be helped, for mother earth was as ignorant of the great scheme of the universe as her progeny, man.

The more she thought of it, the more bewildered and perplexed she became. In her egotism for what she considered a great evolution, she did not realize the complexities of emotions that would be necessary to bring about his present development. What to do she did not know. She was fond er years?" the candidate was asked. of her world ratio that it reflected her glory. But it was impossible to accurately estimate how much of everything that came about, which seeme apparent upon the surface, was invitable, or whether it could be avoided, or whether it was a part of an evolving process. She had unconsclously set in motion certain laws which she was unable to recall. she could do was to wait and see what

Time passed complexities in the life of man increased to such an extent that they got way beyond her view. Intelligence, that subtle something which fascinated her so long, was an element that belonged to another plane than the one upon which she lived. Desire, the principal attribute of intelligence, and the great moving energy, brought about continuous changes in its con Through its force, countries were inhabited, wonderful cities were built. Now, desire was in supreme control and carried everything before her, and mother earth wondered what next attribute of inselligence would spring from her. Learning and the arts involved

es into this continuous Music became the great cuises and desires that subdivided tence because the psychic impulse had become strong and had started on its pilgrimage to a finer civilization. In its wake trailed the many mishaps that come from an evolving condition.

solving the mental and physical emotions that were constantly arising, inadvertently produced the many inadvertently produced the many of forms of philosophy and theological

ple, swung into space some more and many things happened that must have seemed grotesque and barbarous to the large planets, who were watching with extreme interest, by this time, the atrocities committed in the name of good. And it came to pass that righteousness became almost an evil in the hands of a crystalized type of humans who inhabited a small town with a name of two syllables, in a vain attempt by some of its wise members, in a spasm of righteousness, of piling the responsibilities of a hereditary evil that has existed for thousands of years, upon a few unfortunates of the weaker sex. And it came to pass that the condemnation of the weak always came at the psychological moment, when a change in municipal affairs was about to take place. And it also came to pass that the motives involved were not always laudatory. And it again came to pass that mother earth grieved greatly at the narrow and uncompromising view of men, and blamed herself for having brought, through her evolutionary laws, such complex-

But did mother earth in all her wis dom realize that some of her world were ungenerous and uncharitable in tablished fact that this gaseous heap their endeavor of shirking, in a most superficial way, the responsibility they have righteously assumed. And did other atoms as it moved on and on. mother earth realize that it was not the love of humanity that prompted a few of her reforming spirits to endeavor to bring about a better moral condition; for if they did, they would not throw their moral filth into an-Now, the earth had other municipality, or scatter it within within herself the power to grow. In their own community, to be taken care of or to adjust itself th best it at any time and when he referred to first time, "she had to go some" before may without system or order. And did mother earth realize that the children dignity, and she also become aware of her world have, through experience, Taft's name he was greeted with such come to a realization that it was not sanitary to throw their refuse on pub-And does mother earth realize that some of her good folks still have to listen that it is not morally hygenic to throw their moral filth on a neighboring community. And does mother earth during these many years, they believed that reformation meant the driving of the immoral from pillar to post, and considered it morally righteous. does mother earth realize that the morally aggressive feel, because an evil is banished from view and for ome other community to battle with,

they have done their righteous duty. And does mother earth realize there may be some of her children who have grown into a large, sympathetic view of life, now stand in fear of these moral waves, for should even ten, or five, or three of the monstrous cities of our country drive forth its men make the condition, it will exist. They lacked a certain The love of mankind, and not individpen to be together in a small provinc

think that I have lost weight." Mr. Bryan said that some of forecasts he had seen in the morning papers today did not agree with the reports that he had been receiving. "How do things look, Mr. Bryan?"

"Very encouraging," was the reply. "What do you think of Indiana," he was asked. "We had very enthusiastic meetings

there and also in Ohio. The prospects in both states are very bright," was Mr. Bryan said that all the straw

ballots that had been taken in the country showed democratic gains, 'but," he continued, "of course the accuracy of the straw ballot depends upon the way it is taken and the way the names are selected. You select a list of names to send postal cards to you receive many answers, but you have no way of finding out how the men who did not answer are going to vote. The trouble comes when you try to average the votes of the ones who have not responded with the votes of those who have responded."

"Where have the democratic gains been this year in comparison with oth-

Claims Democratic Gain. "This year the democrats have gain ed in every state. Heretofore we made gains in some states and have lost in other states. This year there are gains throughout the whole country and gains in every occupation. There are gains among the farmers; these gains are very marked. There are gains among business, professiona men and especially among college men. The most interesting point in this campaign as compared with the other

to do with." "What is the reason for this gain?" think that is that the republican party in power for twelve years, has falled

to meet the responsibility."

Mr. Bryan said that the poll in New York city, the largest city in the country, and the poll in Iows, probably the largest agricultural state, showed that the democratic gains were sub-stantially the same. In New York state and city the reports showed fifty per cent gains and in lowa about the same. Mr. Bryan today received the fol-lowing cablegram from Oxford college,
