Few people understand the exact nature of the charges against the reverend professor. The following paragraph in a publication of which he is the author, appears to have been regarded as offensive by his accusers:

today is its determination to treat the idea of divine grace and love as indissolubly united with the messianic idea, and to demand that the modern man shall consequently accept both or reject both. But if the new worldview is to continue in its essential features, the well-being of the bearers of culture is dependent upon the surrender of the idea that divine grace and love-nay, the divine judgment as well-are a foreign importation from "heaven" through messianic mediation into our world, and upon the acceptance of the idea that these divine values are original and organic in the natural and historical order-nay, that

The Forum has devoted considera ble space to the possibilities of deriving some benefits from the millions of tons of flax straw that are annually going to waste in this state.

It realizes, however, that the manner of cutting the straw in North Dakota will prevent the fibre from being of such fine quality-as that pulled by hand in Ireland. But there appears to be no reason why lower grades of daughter-Helen. linen cannot be profitably manufactured. Such things as crash towelling and the coarser grades of linen could be easily made from the kind of material grown in this state.

sentative of the cloth are perfectly obvious. Most of the institutions of learning in this country have been the direct offspring of religious zeal for the uplift of the masses. It has been the great strategic aim of each denomination and sect to establish intellectual nurseries.

Moreover, parents in sending sons and daughters to college have naturally desired to put them in touch with from the terrible calamity in Washingsome devout man of God, who embod- ton, ted within himself the ideals of holiness-who gave character to the institution over which he presided by reason of his blameless walk and conversation-and who, by his unconscious influence and example, exhorted to true nobility of life.

But the times have changed. Within the past fifty years tremendous upheavels have been wrought in the educational world. New methods have come into vogue. From the executive chairs in many of the colleges the clerical gentlemen have been retired-and things are vastly different. It is not because the need for men of piety in 9:30 a. m. the training camps of culture is less pronounced. It is simply because in this strenuous age the demands of competition-and the interests of education require administrative ability of the very highest order. To be able to direct the affairs of modern institutions of learning it is necessary to be something more than a theologian. The exigencies of the times make special equipment absolutely essential.
