IS PROCESS OF PRODUCTION OF MEAT WRONG?

MARKETING SYSTEM ALL WRONG SAYS BURTON

Interesting Story of Trip of Steak From Manager to Your Table

EDITOR'S NOTE: This is the second in a series of stories by Correspondent Burton in which he is trying to find out the reasons for the present sky-rocketing of meat prices...

By H. P. BURTON. Chicago, Dec. 9.—That the increase in the cost of our daily meat is a very real one cannot be successfully denied by anyone...

This report relates the following interesting legend regarding the rise of the wholesale price of sirloin steak in the past 20 years.

Table with 2 columns: Year, Price Per Pound. 1894: 10 cents, 1904: 12 1/2 cents, 1914: 22 cents.

It will be noted from this that the increase in price during the later ten years is many times that of the rise during the former decade...

The question that I expect to try to answer by my investigation into the meat angle of the whole subject of "what is making the high cost of living so high?" is this:

Is it necessary that we pay as much for a beefsteak as we do now or can a beefsteak be produced here cheaply and, if so, how? In other words, is the meat of America being produced and distributed for us at a minimum cost...

Many "investigators" of this subject have finished their jobs of inquiry by pointing a long, but very vague, finger of scorn at the packers...

It is necessary that we pay as much for a beefsteak as we do now or can a beefsteak be produced here cheaply and, if so, how? In other words, is the meat of America being produced and distributed for us at a minimum cost...

If we are going to find out the truth about this subject, we have got certainly to trace the entire process of meat-marketing from beginning to end—from the calf to the plate.

This means we have to learn just what part the "breeder" of meat-animals plays in this shrouded game and how he plays it and if he can play it any more honestly or any more efficiently...

Then, perhaps, we shall know something of the truth about this matter, or we will at least know whether there are grave instances where we cannot find out anything definite at any and where, therefore, Uncle Sam himself had better step in and do his duty by us and find out for us.

It may be indeed, that eventually we will find out by our survey that what certain critics of this whole business say, is true: namely that the entire process is wrong as it is conducted today—that, as one noted producer of cattle publicly says:

Fundamentally Wrong. "The entire American scheme for the marketing of live stock is fundamentally wrong, and this great machine that has been erected must come down piece by piece until it is found where the faulty construction and weakness commence, and then it must be rebuilt soundly."

VILLA ENGAGES DE FACTO ARMY NEAR FRESNOS

Fighting Starts Ten Miles From Chichuahua Between Bandits and Carranzistas

HEAD OF INSURGENTS WANTS BIG RANSOM

To Levy Tribute Upon Business Interests in Northern Mexico

El Paso, Texas, Dec. 9.—Fighting has been resumed between the Villistas and the de facto troops near Fresno, ten miles from Chichuahua. Reinforcements were rushed there last night under General Murgua. The Carranzistas are going to the relief of General Ozamas' cavalry, which pursued the bandits after their evacuation of Chichuahua City. They have fallen into Villa's trap according to information reaching the United States officials here. Villa is making his headquarters at Bustamante. New trenches and entanglements have been placed around Chichuahua in preparation for another attack. Villa has announced that the remainder of the 200,000 pesos ransom would be demanded from the business men of the section. There are rumors that several Mexican generals will be courtmartialled.

FORD STOPPED FROM ERECTING BIG FOUNDRY

Detroit, Mich., Dec. 9.—The county district court here granted a temporary injunction restraining Henry Ford from erecting a \$10,000,000 blast furnace in the River Rouge. It is a proposed extension to the plant of Dodge Brothers, stockholders, objected. Other extensions are not affected.

SAYS TEUTONS WILL WAR WITH AMERICA NEXT

Lord Northcliffe Tells United Press What Lloyd-George's Appointment Means

SAYS GERMANS ARE AFTER SOUTH AMERICA

Declares Little Welshman Only Man Who Understands the Yankces

By LORD NORTHCLIFFE. (Written for United Press) Copyrighted.

London, Dec. 9.—As a personality, David Lloyd-George for many reasons is interesting and his appointment has an important bearing on the United States. He is one of the few British statesmen understanding the American temperament. He is important to Americans for another reason. He heads the government of Great Britain, Canada, Australia, New Zealand, South Africa and India. Winning the war revolves on those nations. If they and the Allies are beaten, the American turn will come next. Germany's hatred of the United States and Germany's plans in South America are well known.

Like an American. David Lloyd-George's appointment is alluring to Americans because his life is very similar to that of Americans. His only asset in starting life were only a good father and mother. Millions of American homes, like his little home in Wales. For fear of giving comfort to the enemy and helping the German propaganda, we British here in England did not tell how dissatisfied we were with the management of war affairs since 1914.

Lloyd-George is the only member of the cabinet with courage to manifest discontent with our feeble and vacillating conduct of the war. Occasionally in parliament he attempted to tell the people the heart of the truth, but always met with political opposition.

Dakotans in Visit to Big "Dairyland"

Invasion of Half Regiment State Farmers Put Wisconsin A. C. "Out of Commission"

GREATEST WOMAN FARMER IN WORLD WITH PARTY

Big Results Shown in Figures From Excursion Into Badger Land Just Two Years Ago

(Special to the Tribune.) Madison, Wis., Dec. 9.—A party of about 650 well to do "single crop" farmers of North Dakota, headed by the newly elected "farmer governor," Lynn Frazier of Hoople, visited the college of agriculture, University of Wisconsin, yesterday, in charge of high officials of three great railroads.

Second Visit to "Dairyland." They came to learn more about silos and dairy cattle as a step toward permanent soil fertility. This is the second time North Dakota farmers have come to Madison for this purpose. The first trip was made two years ago, since which time, and largely as a result of the excursion into Wisconsin's "dairyland," a total of 60 silos were built by the members of the party, and \$75,000 worth of improved Badger state dairy cattle was bought for North Dakota farms. There have in five years been 1,400 silos erected in North Dakota, nominally a great wheat state.

Force "Out of Commission." The invasion of half a regiment of Dakotans nearly put the agricultural college force "out of commission," and sorely taxed the accommodations of the university eating houses. Lectures and demonstrations were given the visitors by George C. Humphrey, professor of animal husbandry; Dr. A. S. Alexander, in charge of the department of horse breeding; Dr. F. B. Hadley, veterinarian; J. G. Halpin, poultry specialist, and Ransom A. Moore, the "grain wizard" of Wisconsin.

The excursion was organized along the Great Northern lines in North Dakota by F. R. Crane, agricultural extension agent of that road, was headed in St. Paul with the cooperation of the Omaha Railway system, and turned over to the Northwestern railway at Madison, and the party was the guests for three days in Chicago of the Northwestern system.

Just a Side Trip. The trip to Madison was a side trip on the way to the Chicago International Livestock exposition, and many of the leading state officials of North Dakota were in the party. With Governor-elect Lynn J. Frazier were: Dr. E. F. Ladd, president of the North Dakota Agricultural college, former associate of Dr. Babcock of Wisconsin milk test fame; Lieutenant Governor A. T. Kraabel, John N. Hagen, newly elected state commissioner of agriculture, and N. C. Macdonald, newly elected state superintendent of public schools.

Mrs. C. W. Kelly, the greatest woman farmer in the world, who operates her own farm independently of that of her husband, was one of the many women in the party.

SITUATION IN GREECE REACHES CRITICAL STAGE

King Constantine and Teutons Reported To Be in Close Communication

ALLIES BLOCKADE BEING STRICTLY MAINTAINED

Said That Royal Forces Are Retreating Toward the Interior From Athens

TODAY'S WAR MOVES. In Rumania, Berlin claimed continued advances and as evidences of complete demoralization of the enemy forces since December 1, in addition to a number killed and wounded. Russian offensive in the Carpathians apparently continuing. Berlin admits the loss of ground "dearly paid for by the aggressors" and "small local successes."

The Russian version of the dislodging of the enemy from two heights and the capture of 500 prisoners admits the abandonment of one of the heights in the Carpathians. On the western front, Berlin claims the repulse of the enemy patrols near Letransley and artillery firing. General Haig has nothing to report from the British front, while French statements merely detailed artillery activity around Hill 304, on the west bank of the Meuse.

Greece was regarded anxiously today by all the warring nations. Dispatches are all greatly delayed, but indicated the imminence of actual hostilities between the Allied forces and the Greek royalists.

London, Dec. 9.—The Greek situation has reached a critical stage. With the mobilization of King Constantine's forces, Teutonic negotiations with the monarch are suspended. All Allied subjects have left the Greek capital and there has been a concentration of the Entente troops near Athens. Dispatches from the capital have been delayed. Reports early in the week declared the adherence of former Premier Venizelos, now head of the provisional government at Saloniki.

Suffering persecution, it is said, the royal troops are fleeing to the interior from Athens. The blockade is maintained effectively by British and French warships. Rumanians are now in complete retreat before the advancing Danube and right German army wings in Rumania. The Germans have captured 70,000 men and 185 cannon and 120 machine guns.

Petrograd reports that the Russians have dislodged the enemy from two heights west and south of Valoptuna, taking 500 prisoners, six machine guns and one cannon. Emperor Carl of Austria visited the German front and interviewed the Kaiser, in the presence of Field Marshals Hindenberg and Conrad.

A provision government, separate from the Berlin federal council, has been announced. This is merely temporary, while the German troops occupy Poland. Check Attacks. In vain the Russian attempts against the Germans north of Narocz lake and Skorymoynoy preceded by fire preparation were unsuccessful, as were other strong Russian attacks against the German front near Kir-lababa.

FARMERS' STORE IS SOLD

Firm to Be Known as W. H. Spear & Co., Makes Purchase—Will Take Charge Monday, Dec. 11.

Announcement was made this morning of the purchase of the grocery store of the Farmers' Union Mercantile company by the firm of W. H. Spear & Co., composed of W. H. Spear, Paul Gerndt and G. L. Spear. The last two men are well known in Bismarck, being connected with Brown & Geermann. Their resignations will take effect January 1.

Realizing the fact that it takes both the city and the country trade to be able to conduct a profitable business, we are going to make this a farmers' store in order to get the produce required by the customers in the city," stated the management of the new concern today. "Therefore, we will at all times pay the highest market prices for good country butter, fresh eggs and other farm commodities." The new firm expects to take charge of the establishment Monday morning, December 11.

ASKS EMBARGO ON ARMS

Washington, Dec. 9.—Representative Hollingsworth introduced a resolution today asking an embargo on the exportation of arms and ammunition for a year from this date.
