Chicago, July 10.—(AP)—Influenced by selling pressure from the southwest, where the harvest was reported as showing enlarged yields, wheat prices underwent decided setbacks today after early upturns. Kansas dispatches said the northwest part of the state was reporting yields of from 41 to 55 bushels of wheat per acre. In some quarters, too, the government crop report this afternoon was expected to make a more or less bearish showing.

Wheat closed nervous, 1½ to 1½c a bushel lower than yesterday's finish. July 28½ to ½; Sept. 91½; Dec. 697½ to ½.

Corn closed %c off to .c up, July 72½; Sept. 75½ to ½; Dec. 68½ to %.
Oats ½ to ½ c a dvanced, and provisions varying from 12c decline to a rise of 15c.

An outstanding development upon which considerable buying was done today was a report that owing to severe high temperatures and lack of moisture wheat crops are almost completely ruined in Montana from Havre to Great Falls. It was added that in this district wheat was being mown and used for hay. Reports from adjoining states said wheat was ripening prematurely, this being the case to a notable degree over parts of South Dakota. No damage yet however, from black rust was said to be exparent.

Hot winds were announced from various sources as doing injury to various sources as doing injury to various sources as doing injury to continental Baking A continental Can.
