

TO TIP OR OR NOT TO TIP

THE QUESTION NOW AGITATING
THE MINDS OF MANY.

INTRODUCED IN CONGRESS

By Frank Murphy, Representative
From Missouri—The Practice of
Tipping Has Reached a Stage
Where it is an Outrage.

City Associated Press.

Washington, D. C., Feb. 14.—"Tipping" is to be placed under the seal of the law in the national capital. If a measure introduced in congress by Representative Murphy of Missouri and favorably reported by the house by the committee of the District of Columbia should be enacted, the prospects are bright that it will be. The bill provides that both the person who gives a tip and the one who accepts a tip shall be fined on conviction.

The measure has been well received by members of congress. They and their friends from home who visit Washington are the principal sufferers from the tipping practice, which has become not merely a nuisance, but an outrage, from which there appears to be no way of escape except through the enactment of some such bill as Mr. Murphy's into law.

The measure has received the approval not only of members of congress but of Washington business men, hotel keepers and restaurateurs.

Of course, thousands of sufferers and their indorsement to the bill and are happy sincerely that it will be passed. Naturally, there is opposition to it. That comes, as might be expected, from the waiters and porters and others who are enjoying the usufruct of tips. One waiter declared a day or two ago—and he doubtless represents in a measure the sentiment of his kind—that if the Murphy bill should be passed and the law enforced, Washington hotel and restaurant keepers would have to face a serious strike. He maintained that waiters in prominent hotels and restaurants, who are patronized by people who most desire to be separated from their money, could not live on the wages they receive and that they depend upon the tips to eke out inadequate salaries. This may be true, to an extent, but, as has been pointed out by Representative Murphy and by other victims of the practice, it is a situation which is susceptible of adjustment without imposing upon a generous public.

The practice of tipping was introduced into America from abroad. It has been made an evil, however, by the proverbial extravagance of wealthy Americans both in this country and in Europe. They have "thrown their money at the birds" to such an extent that in large American cities the slightest service now is an invitation to respond with a tip. If a bell boy in a hotel hands you a beverage he expects a tip, although he may have walked out thirty feet from the telephone office to your chair in the office. If you should be so absent-minded as not to offer him the tip, he will "stand on your foot" and give it to him. The chambermaid will inquire solicitously if she has made up your bed just right and will do so her disappointment if you do not respond with a bit of silver. If the bell boy brings a pitcher of ice water to your room he expects to be paid for it; the waiter who serves your meal in the cafe or dining room looks for a quarter as a matter of right; if a table is reserved for you and your friends in any fashionable cafe or restaurant for an afternoon supper, for instance, you are expected to remember generously the host waiter as well as the waiter or waiters who serve the supper. In fact the visitor to, or resident of, Washington, is likely to get himself deluged and to be made the victim of poor service, for which in any event he pays a good price, unless he tips the cabman, the porter, the messenger and every other individual in the long roll of those who serve him in any way.

In respect to tips, Washington is even worse than New York or any other American city. He must be an unpopular waiter in a fashionable restaurant who does not pick up from \$1.50 to \$2.00 a day, and the head waiter who does not triple that sum is not out of his job. There are at least two head waiters in Washington who own valuable property and live, not merely in comfort but in style. Recently one of these men loaned the son of a prominent government official \$300 one evening in order that the young man might get married in a

WHITE SWAN CORN

White Swan Brand is the pride of the nation's corn and White Swan Corn is the pride of the White Swan Line. Fine variety Sugar Corn, gathered when the kernels are tender and creamy, raised exclusively by our improved methods, which mean all the delicacy of fresh corn. We cannot in words describe the goodness of this corn, you will have to try just one can, then you will see for yourself. And if you want anything else good in cans, always call for White Swan Brand. If you want good corn keep the White Swan Brand, and so be sure.

There were no preliminary either about the loan. The youngster simply asked the man for the money as he sat in the cafe and the head waiter took it out of his pocket and handed it to him as if it were the most ordinary transaction. Of course, he knew he would get it back with many people deprecate the tipping good interest because the young man's father is a multi-millionaire.

practice, but endorse it because they do not care to put themselves in a false attitude. It is repugnant to the feelings of most people and is thoroughly un-American. With the enactment of the Murphy bill it is believed the national capital will be able to demonstrate to the country that good service of all kinds can be obtained without paying twice for it.

NOTICE IN BANKRUPTCY.

In the District Court of the United States for the Southern District, at Ardmore.

In the matter of Merriott & Pardue, bankrupt, in bankruptcy.

The creditors of Merriott & Pardue in the southern district in the Indian Territory, at Ardmore, a bankrupt, Notice is hereby given that on the 11th day of February, 1937, the said Merriott & Pardue were duly adjudged bankrupts and that the first meeting of their creditors will be held at my office at the court house in the city of Ardmore, on the 15th day of February, 1937, at 10 o'clock in the forenoon, at which time the said creditors may attend, prove their claims against a trustee, examine the bankrupt and transact such other business as may come before said meeting.

WOULD KEEP COOLIES OUT

SECRETARY ROOT SUGGESTS AN
AMENDMENT TO BILL.

TTE MOVE IS SIGNIFICANT

Indicates that President Has Only a
Private Understanding With the
Mikado—Belief Expressed There
is Friction in Reconciliation.

Washington, Feb. 13.—Secretary Root suggested to the senate committee today that they incorporate in the immigration bill a provision which would deny admission to all Asiatics who are without passports from their home governments.

The suggestion, which is, in fact, an amendment from the White House, is significant in several ways. For one thing it seems to indicate that while the president is intimating to the San Francisco school board that he could negotiate an exclusion treaty with Japan, he in fact only a private understanding with Japan that the Mikado will endeavor to keep coolies out of this country. As it is now, Japan gives no passports to coolies to enter this country, but they are permitted to emigrate to Hawaii and our other insular possessions, whence they come to the mainland without let or hindrance. The amendment which Mr. Root has suggested would provide this.

That the president has some private understanding that such a law would not give offense is not doubted. It is thought that while Japan would not agree to specific terms of a treaty which would deny any of her subjects admission to this country, she will assent to a tacit understanding that passports are not to be given to coolies.

Of course such an arrangement would rest upon the good faith of Japan. It may be said that the president and Secretary Root have Japan's assurance that passports will not be given to coolies, so that a law excluding those who are without passports could give no offense to Japan.

Whether Mayor Schmitz and his school board will be placated by this arrangement is not known. Friends of the mayor say, however, that he is not disposed to rescind the school regulations of San Francisco in consideration of an agreement which can last only as long as Japan retains her good relations to the emigration of her coolies.

The immigration bill, as is well known, is tied up in conference, because the house conference will not agree to the senate provision which prescribes an educational test for all emigrants. Secretary Root is so far as to have this bill serve as a means of a diplomatic entente with Japan, which he has urged the senate conference, in the name of the president, to rescind from this provision of the measure.

The situation, as it presents itself today, shows that the president is in desperate straits to reconcile San Francisco and Japan.

Lame Back.

This ailment is usually caused by rheumatism of the muscles and may be cured by Chamberlain's Pain-Balm two or three times a day and rubbing the parts vigorously at each application. If this does not afford relief, bind on a piece of flannel slightly dampened with Pain-Balm, and apply it to the back. For sale by F. J. Ramsey, W. B. Frame, Ardmore Drug Co., Bonner & Bonner.

Witte's Narrow Escape.

London, Feb. 13.—Count Witte had a narrow escape from death by an internal machine today, according to a St. Petersburg dispatch to the Tass agency, when the machine was found in his home two hours before it was set to explode.

It was found in the chimney of a last room of Count Witte's house just after midnight. It was timed to explode in two hours, when the count and countess would have gone to bed.

Count Witte, who is in indifferent health, was being visited by a doctor and two friends when the discovery was made. The countess had gone to a theatre.

Minnie Melba sang the stage folks should "eat plenty of fruit and vegetables." Provided they do not come from the audience.

Dehorning a Rhinoceros.
A rhinoceros was killed in the London Zoo this morning by Mr. Horn, which grew down in front of its mouth, so that any work difficulty could be set at work. It was the only the keeper decided on amputation. The horn of a rhinoceros is not a horn at all, but an accumulation of hair and skin which has hardened and become detached without its usual covering. The growth of this horn has a very bloody temper and was a very bloody temper and was a very bloody temper. It was the only the keeper decided on amputation. The horn of a rhinoceros is not a horn at all, but an accumulation of hair and skin which has hardened and become detached without its usual covering. The growth of this horn has a very bloody temper and was a very bloody temper. It was the only the keeper decided on amputation.
