

# 4 Wells Guaranteed Different Oil Fields Reliable Officers

## A Combination That Knocks the Risk Out of The Arkansas 4 Oil & Refining Company

Because it's just like investing your money into

### 4 Different Companies as the 4 Wells Gives You 4 Ways to Win

#### Tract No. 1

Only 5 acres, but it's a gem, as it's in the great northwest Burkburnett extension where the coming in of a 4,000-barrel well is of little consequence, as it is of almost every day occurrence. We have explicit faith in this acreage, as we are close to the Parker well, which is just reported in an enormous gusher. Here we feel confident of getting a big enough well to pay our shareholders \$1,000 for each \$100 invested. The M. & P. Burk (the second largest in the field) is also close to this lease.

#### Tract No. 2

20 acres in Iowa Park, which is famous for its great number of well-paying shallow wells. This 20 acres is considered an offset to the biggest in the field. Will we get production here? We are sure to.

#### Tract No. 3

11 acres in Greer county, Okla., a shallow but well paying field. A 600-barrel well is very close to this well.

We also have 220 acres in Carter county, Okla., near the Healdton field. This territory is getting the big play in that part of Oklahoma. We have an additional 14 acres in Haskell county, Texas, which is very favorably located.

#### Tract No. 4

171 acres in the Petrolia field, some of which is three-quarters of a mile of wells which came in making 350 to 1,800 barrels. This acreage is on the trend of development with drilling wells all around it. One of these wells has made an average of 100 barrels every 24 hours for eight years.

You have read the true report that hundreds of oil companies in these Texas fields have made their shareholders independently rich. We are advising our best friends and our relatives to invest with us because we conscientiously believe that we have the best oil investment that is now being offered in Texas. It's your chance to put a few dollars where you are practically guaranteed an enormous return. We are guaranteeing to drill four wells out of the original capital, and of course when good judgment tells us we will drill and continue to drill. Of course, we will pay the bigger part of our earnings to our stockholders every 30 days. Use this coupon right now—this minute!
