C. T. Hills: I found an account of the closing school exercises in '81, published in the Jamestown Weekly Herald. No graduates are mentioned. The account adds: "At the close of the exhibition Walter Lyon (son of L. Lyon) on behalf of his class presented Mr. Foley, the teacher, with an elegant gold pen while Miss Hattie Morgan, in behalf of the school, presented him with a handsome autograph album."
When wear begins to exceed repair in your body you are going to fall sick. The signs of it are: loss of flesh, paleness, weakness, nervousness, etc. The repair needed is food. You think you eat enough, and yet you feel that you wear out more tissue, energy, nerve force, than your food makes for you. The difficulty is that you do not digest enough. And this is so serious it is worth sitting down seriously to think about. If you can't digest what you eat, take a few doses of Shaker Digestive Cordial. The effect of it will be to increase your flesh and make you feel stronger. You won't fall sick. Proof that it is in control of your repair apparatus. It's easy enough to test this for yourself. Take a few bottles of Shaker Digestive Cordial.
Sold by druggists at 10 cents to \$1.00 per bottle.
From Tuesday's Daily.

The bride has long resided in the city and with her husband has hosts of friends who extend kindest expressions of felicity. Mr. and Mrs. Hodge will reside at Minot where they will go to housekeeping. Mrs. H. E. Blood of this city was among those present at the marriage.

Attorney Allison of New Rockford says the grasshoppers have made their appearance a few miles west of that place. They do not cover a large area neither are they in one body. The insects are now reaching the age when they eat and do the greatest destruction. One man reports a small field of barley ruined by them but the people are taking hold of the matter and their almost complete destruction is looked

for. In less than fifteen minutes nearly \$400 was raised to defray the expense of destroying them. A car load of oil has been ordered, and dozens will be supplied with which to use the oil. No serious alarm is felt over the matter but there is a concerted and determined movement on foot to utterly annihilate them if possible. Old residents recall the fearful sight when grasshoppers passed over the state flying high in the air. The flash of their wings could be seen high in the air but no reports of destruction here were received. Again in '81 they made their appearance in the state but did little or no damage. With present knowledge of methods of destroying them and forearmed against them it is not thought that much damage can be accomplished this year or next.
