The Year's Yield of Grato.

WASHINGTON, Nov. 9 .- Colonel Washington, Nov. 9.—Colonel Worthington, the statistician of the Agricultural Department, is gathering materials for his preliminary crop report, which will be ready for publication Monday noon. Although the exact results cannot be ascertained before that time, there is reason to believe that the yield of oats, rye and corn will not vary materially from that of last year, and that variation will be decreased from earlier returns.

It was found that there had been a slight increase in acreage, but the yield is believed to have fallen sufficiently to more than keep the balance. It is probable that the returns of the yield of wheat will show an increase of about 30,000,000 bushels as compared with last year.

In moisture, it keeps the fruit day. Soft straw, chopped an inch long. Is a good material to pack in, and is more easily freed from the berries. Cotton batting does well if well dried. Each buch should be carefully handled, all imperfect or brushels as compared with last year. bushels as compared with last year, more than half being from the Pacific Coast. As the world's yield of wheat is somewhat diminished, there would seem to be a fair prospect of good prices for the American surplus.

Ordinate Derries should be removed, and the bunches spread out singly until they go through the sweat before packing.

A Physician's Testimony.

NEW YORK, Nov. 9.—The. Trib-une says: Sara Bernhardt is an ex-traordinary woman—less, how-ever, in her art, wherein she has been surpassed by Rachel and See-bach and equaled by Modjeska and Adelaide Neilson, than in the fascination of a nature fired by emotion and sensitive to every

passing wave of excitement.
The World says: She leaves one with the feeling that her eloquence is better than her acting, and that she is more to be trusted with her portraiture of pathetic emotion than with the expression of great tragic passion—a woman of ex-traordinary talent rather than genius, but undoubtenly a positive-

genius, but undoubtenly a positively great artist.

The Herald says: Bernhardt's
abilities are positively limited in
one direction, and despite her many
strong qualifications, she is lacking in that power which, combining dramatic and physical force,
enables an actress to rise to the demands of a great climax. mands of a great climax.

The Morey Letter Case.

NEW YORK, Nov. 9.—The case was resumed to-day. Samuel E. Morey testified: One of his brothers was a slight of hand performer, named Francis Morey. Julian A. Morey was a half brother and had another brother named George C. Morey, and two sisters, now both dead. Hadn't been paid for testifying in this case. Had a nephew Frank B, Morey.

Robert Lindsay testified: Was a detective for the secret organization of the Workingmen of Maryland; knew H. L. Morey, and traveled with him last February to Lynn. Morey showed witness the

A CARD.

To the Public:

My attention has been drawn to a notice published in the Heraid of October 20th, over the signature of E. J. Ra.dwin. In reply I will simply state that said notice is false in its tacts and still falser in its instructions.

I have collected rents from tenants on the Ranch-s named in that notice, but only whilst I had authority so to do under the order of the U. S. Circut C untapprinting me Receiver and the written authority of Camilo Martin, the owner of record of those Ranchos, and of E. J. Baldwin thimself, as Martin's representative. I have paid over to those authorized to receive the same all of the rents so collected, except a small amount late. rendered.

Since my authority has ceased I have neither collected nor attempted to collect any rents from either of those Ranches. chos.

For these reasons Mr. Baidwin's notice, so far as I am concerned, was entirely unpecessary. Respectfully, RICH*RD GARVEY.
