Porto Rico Rises Against Spanish Rule

NEW YORK, April 8.—The Herald today says: Dr. J. Julio Henna, president of the Porto Rican revolutionary committee of this city, has received private information from the committee on the island of Porto Rico to the effect that the country has taken up arms against the Spanish government.

When seen at a late hour last night Dr. Henna said: "The news, though startling, did not surprise me, as the latest mail advices from Porto Rico brought us the information that the situation there was becoming every day more serious."

"According to our correspondence the Spanish authorities there were acting toward the people as if they were anxious to precipitate matters by driving them to desperation and to arms."

All the members of the committee are very reticent after the meeting, but one of the more prominent, who would not permit his name to be published, said: "The fact is that the movement in Porto Rico started earlier than was expected and agreed upon, but no doubt circumstances of which we know nothing must have compelled our brethren to take the step at once."

Referring to the chances of success, this member said: "The spirit of the people is such at the present time that any movement to overthrow the Spanish yoke is almost sure to succeed."

"The Spanish garrison at Porto Rico is composed of about 6000, of which 2000 are natives. The fleet which blocks the Porto Rican coast is made up of four vessels. Of these the gunboats Indio, Ceyolo and Ponce de Leon are of little use, as their speed is very limited."

THE IDEAL CITY
