THE PRILIPPINE OUTLOOK.

Judge Teft on Difficulties and Prospactive Values-Military Railroad E terprise-General Mac-Arthur & Report - Army Figures -Secret Work of the Insurgents --- Native Losses.

Latest advices from the Philip pines are from official sources and they give statements in detail that cover many points of particular interest. Judge William H. Tal. of the Philippine Commission, ex pressed bimself as follows in a latter written to a friend in Cincinnati, under date of September 21st:

"We have just passed a civil-ser vice law, which is, on the whole, I think, the strictest law that has been passed under American auspices. I have no doubt we shall be able to work out successfully the problems before us if McKinley is elected: I do not mean to say there are not a great many difficulties with the policy of the government towards these islands to be settled, but I do not mean to say there are none of them insuperable. We certainly need new banking facilities here and we need better harbor facilities. When the barbor facilities are better, doubtless direct American lines will be established to Manila. I feel confi tent Manila will S. become one of the great ports of the Orient. Only the surface of the possible and prospective business of these islands has been scratched. When you speak of letting Chinere into these islands you touch a question that has a great many dangers connected with it, and I could not now express an opinion on the \*ubject."

A railroad is in contemplation batween Dagupan and Biguio in the Province of Benguet, and a pros pecting party for the purpose of exploring and surveying the route has been organized, according to the Mapila Freedom, which gives the following particulors:

"Captain Charles W. Mead, Thirty-Sixth Infantry, U. S. V., is designated to take charge of a prospacting party, to be constituted for the purpose of ascertaining and surveying a practicable railroad route from Dagupan, Prevince of Paugasinan, to Baguio, Prevince of Benguet, Luzon, reporting to the President of the United States Philippine Commission previous to entering upon his duties for special instructions as to the execution of the work desired. The chief engipeer of the division will designate an officer to take charge of Captain Mead's office and duties during his absence. T. W. Ripley, superintendent of parks of the city of Manila, will report to Captain Mead for duty as his assistant in this enterprise. The commanding general, Department of Northern Luzon, will give necessary justructions for such guard and equipment as shall be required by Captain Mead to carry out the purpose of this expedition. The quartermaster's department will furnish the necessary transportation."

Improved methods of trausportation are badly needed in the islands, as is shown to succeeding para-

graphs of the same article : "During the centuries of Spanish rule the different tr b is were isolat ad from each other, and would continue to be so for ages unless some methods were adopted to put them in closer communication. As a means to carry stores in produce out, and encouraging the inhabitants of Benguet to greater industrial activity, it will be invaluable. The valuable mining tracts will be tapped and the prospector who has been obliged to freight in his rupplies over the mountain trails will bava a supply deput close at han , The work of surveying will be com-

Continued on 3d page.)
