The Palace of Darkened Windows

MARY HASTINGS BRADLEY

Thinking all these brightly revengeful thoughts she had been oblivious to the many turnings of the motor, the it had occurred to her that they were taking more time than the car had needed to appear, and now she looked out the window and saw that they were in a narrow street lined with narrow houses, whose upper stories, slightly projecting in little bays, all presented the elaborately grilled facades of mashrubiyeh work which announced the barred quarters of the women, the

Arlee loved to conjure up a romantic thrill for the mysterious East by reflecting that behind these obscuring screens were women of all ages and conditions, neglected wives and youthful favorities, eager girls and revolting brides, whose myriad eyes, bright or dull or gay or bitter, were peering into the tiny, cleverly arranged mirrors which gave them a tilted view of the streets. It was the sense of these watching eyes, these hidden women, which made those screened windows so stirring to her

young imagination. The motor whirled out of the narrow street and into one that was were detached and separated, apparently, by gardens, for there was a her head, piled with yellow fruit perience. shining vividly in the hot sun. By one of the windows a woman squatting, a short, stout, turbaned figure, striking a few notes on a tambourine and crooning softly to herself in a low guttural. She raised her head without rising, to look at entering couple, and for a startled second Arlee had the half hysterical fear that this squatting soloist was the triste and aristrocratic representative of the hautmonde of Moslem which the Captain had brought her to see, but the next instant another figure appeared in a doorway and came slowly toward them.

Flying to the winds went Arlee's anticipations of somber elegance. She saw the most amazingly vivid creature that she had ever laid eyes on-a woman, young, tho not in her youth, penciled, powdered, painted, her hair a brilliant red, her gown a brilliant green. After the first shock of scattering amazement. Arlee became intensely aware of a pair of yellow-brown eyes confroi !ing her with a faintly smiling and rather mocking interrogation. The dark of kohl about the eyes emphasized a certain slant diablerie of line and a faint penciling connected with the high and supercilious arch of the brows. Henna flamed on the pointed tips of the fingers blazoned glittering rings, and Arlee funcied the brilliance of the hair was due to this same generous assistance of nature. "My soul!" thought the girl swiftly, "they do get themselves up!"

The Captain had stepped forward. speaking quickly in Turkish, with a hard-sounding rattle of words. The sister glanced at him with a deepening of that curious air of mockery and let fall two words in the same tongue. Then she turned to Arlee. "Je suis enchantee-d'avoir hon-

neur-cet honneur inattendu--" She did not look remarkably enchanted, however. The eyes that played appraisingly over her pretty caller had a quality of curious hardness, of race hostility, perhaps, the antagonism of the East for the West, the Old for the New. Not all the modernity of clothes, of manners, of language, affected what Arise felt in-tensely as the strange, vivid foreign-

Edstrom's Work of Years Shattered by Unknown Persons.

New York, Nov. 27 .- What grim fate has been stalking David Edstrom pre-eminent American sculptor, thru his entire strange career? And why He was born in Smaland, Sweden, and came to America with his parents when he was 7 years old. Barely able to speak English, he

omewhere in Europe, he quit his job as an engine wiper in a factory and announced to his parents he was going to Europe. "Crazy," said they.

But Edstrom went. From New York he secured a job as stoker on a steamer bound for a North Sea

Arriving at Copenhagen, he presented himself at the Royal Academy to find only a chosen few could enter and only after two years of preparation at the Polytechnical school. Starving, slaving and hardly sleeping, he made his way thru those two years and sained his victory, entering the Royal Academy in a blaze of

Living on the proceeds of his work as a super in the Royal Opera house, Edstrom had his first success when he sold his first real piece, "Spring,"

About this same time his wife suddenly packed up and left London

So Edstrom returned to Stockholm with his ears ringing with praise for his work, but with an empty heart. Finally he came to America, in 1915, only to find that America, torn by the emotions of war, had no place for a sculptor and he could not secure a single commission, being finally forced to become a private tutor at Sewanee university in Tennessee. From there he worked until he has duplicated fame in America that came to him in other places.

But still mysterious things happen. Returning recently to his New York studio, Edstrom found a piece of sculpture, on which he had worked for years, "The Triumph of Man." shattered to pieces and not another piece in his studio harmed. Yet, Edstrom, declared by man;

o be the successor of Augustus St. Gaudens, says he must borrow mone rom his friends to continue his work and his wife is suing him for separation and a large sum of money, althhe declares he is practically penni-
