TABLER'S PILE BUCKEYE PILE OINTMENT CURES NOTHING BUT PILES.

A SURE and CERTAIN CURE known for 16 years as the BEST REMEDY FOR PILES. Prepared by E. C. WALTON, M. D., STANFORD, KY.

ADVICE TO WOMEN If you would protect yourself from Painful, Profuse, Scanty, Suppressed or Irregular Menstruation you must use

BRADFIELD'S FEMALE REGULATOR

CARTERSVILLE, April 30, 1905. This will certify that two members of my immediate family, after having suffered for years from Menstrual Irregularity, being treated without benefit by physicians, were at length completely cured by one bottle of Bradfield's Female Regulator. Its effect is truly wonderful. J. W. STRANGE.

BRADFIELD'S FEMALE REGULATOR CO. ATLAS, PA.

The smallest Pill in the World! Why do you suffer from Dyspepsia and Sick-Headache, rendering life miserable, when the remedy is at your hand?

TUTT'S Tiny Liver Pills

will speedily remove all this trouble, enable you to eat and digest your food, prevent headache and impart an enjoyment of life to which you have been a stranger. Dose small. Price, 25 cents. Cities, 20 Park Place, N. Y.

The most Celebrated Eye, Ear, Nose, Throat and Chronic Disease Specialist in the State.

J. S. APPLEMAN, M. D. THE CELEBRATED English Specialist, Formerly Professor of Practical Medicine, Electrical Medical College, TORONTO, CANADA.

Now Examining Physician of the Southern Medical Institute, LOUISVILLE, KY. Will be at Myers House, Stanford Tuesday, Mar. 28, one day only.

Returning every four weeks during the year. Dr. Appleman is a graduate of Bellevue Hospital Medical College, New York City, and the Electrical Medical College, Toronto, Canada. He has made a special study of the diseases he treats in the great Bellevue and Charity Hospital for several years and recognizes superior in diagnosing and treating Chronic Diseases. He devotes all his time to the treatment of chronic and nervous diseases of both sexes and his skill as an expert in this class of cases is well established. Treats successfully, and

Permanent Cures Acute and Chronic Catarrh, Ringing in Ears, Deafness, Discharge of Eye, Ear, Nose, Throat, Lungs, Kidney, Urinary and Bladder troubles, Bright's Disease, Diabetes, Dyspepsia, Constipation, Rheumatism and Paralysis, Epilepsy or Fits positively cured. Young or middle aged men suffering from Erythema, Impotency, Eruptions, the results of errors or excesses, should call before it is too late. We guarantee a cure if case has not gone too far. Superfluous hair and all eruptions of the face permanently removed.

Blood and Skin Diseases. As Syphilis, Scrofula, Stricture, Gleet, etc., cured by never failing remedies. Diseases of women, such as Leucorrhoea, painful Menstruation, Displacement of Uterus, bearing down pains in back, relieved in short time. The Doctor carries all his portable instruments and comes prepared to examine the most obscure medical and surgical cases. He undertakes no incurable diseases but cures hundreds given up to die.

CONSULTATION FREE And Confidential. Address J. S. APPLEMAN, M. D., Louisville, Ky.

A BOUQUET OF BUDS.

INTERESTING DEBUTANTES OF THE WASHINGTON SEASON.

How the Daughters of Senator Brice, Chief Justice Fuller, Vice President Morton, Representative Enloe and the Late General Belknap Were Introduced to Society.

There were not so many blossoms added to the "rosebud garden of girls" this season as last, but they were very charming and attractive ones. Tea more or less elaborate served to introduce them. No matter how much a girl has gone around, she is not considered "out," except by quite old fashioned folk, until some such formal presentation has been made. After that she is invited by all her friends to assist in entertaining the busy throng of callers, and she en-

MISS GRAYSON WENDLING.

joys it immensely, pouring innumerable cups of tea and looking so pretty while doing it that the average man—and woman, too—is apt to drink more of the not always cheering beverage than is strictly healthful, just for the pleasure of looking at her. About Christmas the buds bloomed very fast. Sometimes two or three would make their bows the same afternoon.

It was at a very pretty tea that Miss Grayson Wendling, second daughter of the eloquent and well known lecturer, Mr. George R. Wendling, was presented by her parents to their large circle of friends. Her old Christian name is that of her mother's family—the Graysons of Georgetown and Virginia. For her, I fancy, it is usually shortened into Grace, which is quite appropriate. She is barely 18, tall and well formed, with good features, clear, creamy complexion, light brown hair and lovely dark brown eyes. She has been carefully educated, especially in music, and sings sweetly.

Her elder sister, Frances, was introduced last year, but owing to illness in the family went out so little that she is almost as much a bud as Miss Grayson. She, too, is tall and slender; has fair complexion, blue eyes and hair so dark that it is almost black. Among her accomplishments is the ability to speak several languages.

Miss Alice Belknap, daughter of the late General W. W. Belknap, was presented by her mother at another pretty tea. The pair made a lovely picture as they stood together welcoming their many friends. Mrs. Belknap is tall, superbly formed, dark haired and dark eyed. Her daughter is like her in height and shape, has her dark eyes and brows, with a profusion of golden hair, and complexion of purest pink and white. She is well educated, clever and accomplished in many ways, and a daring and graceful rider.

Miss Cornelia Day McLanahan, the daughter of Mr. and Mrs. George W. McLanahan, is a tall and graceful girl, with large brown eyes, clear, warm complexion and wavy, dark Auburn hair, which is worn in a large coil at the back of her shapely head. She is descended from good old Revolutionary families of New York and Pennsylvania and has been carefully educated, chiefly abroad. She speaks several languages with ease, is a graceful horsewoman and an accomplished whip. Her parents have a beautiful summer home on the Hudson and a handsome residence here. The tea given to introduce their daughter was an elegant affair.

Maude Virginia Peyton Walcott, daughter of Colonel William H. Walcott, U. S. A., retired, belongs to a musical family—father, mother and children all playing upon some kind of instrument. This young lady is equally at home with piano, drum, tambourine and one or two other instruments; so, very naturally, the tea given for her debut merged into a musicale. Like most of her sister blossoms, she is tall and slender, has a fair complexion, fine teeth, hazel eyes and wavy chestnut hair.

SARA BAINBRIDGE SHIELDS.

A charming and cultured girl is Sara Bainbridge Shields, daughter of General George H. Shields, assistant attorney general for the interior department. She is well up for so young a girl in the best literature of the day, and speaks fluently French, German and Spanish. She was introduced at an enjoyable and largely attended tea. Mrs. Shields, an accomplished and agreeable woman, is corresponding secretary of the Daughters of the Revolution. This pleasant family will probably return to their former

home in St. Louis soon after the coming of the new administration and will be missed by a large circle of warm friends. To introduce their second daughter, Margaret Katherine, Senator and Mrs. Calvin S. Brice of Ohio gave a superb tea, followed by a dance, in their new home, the historic Corcoran mansion on H street. For months workmen had been beautifying the old house, and society was on tiptoe to see the result, to say nothing of welcoming another member of this popular family. Miss Kate, as she is usually called, though not one of the tall girls, is of fair height and good figure. She has dark eyes and soft brown hair, put back rather plainly. Like her sister Helen, a great favorite here, she has been very carefully educated.

All of Chief Justice and Mrs. Melville W. Fuller's large family of girls are bright, pretty and attractive. One of the brightest, prettiest and most attractive is Katherine, the fifth or sixth—I am not sure which, as they all married and went away before society had much chance to become acquainted with them. She is not very tall, but so slim and erect that one thinks her taller than she is. She is daintily rounded, light and graceful as a bird. Her smiling gray eyes have a hint of blue in them, and her head is crowned with short golden brown curls. Her manner is very natural and pleasing. She talks well and is altogether a charming young girl.

A pretty, well rounded little girl, with brown hair, laughing brown eyes and round, dimpled face, is Marie Williamson, daughter of Chief Engineer Thom Williamson, U. S. N., for whom a pleasant tea was given at the family residence on Rhode Island avenue. She is one of several accomplished sisters, is quite musical, playing the banjo particularly well.

The usual programme was changed for the coming out of Miss Edith Morton, the vice president's eldest daughter. A dinner was given, with a cotillion afterward. There was no crowding, for the number of guests was limited—a difficult task, I should think, for Ms. and Mrs. Morton, who have such a large circle of personal friends. Miss Morton wore pink instead of the usual white gown of the debutante. Pink roses were everywhere in profusion, and the pretty favors for the german were pink too. Miss Morton, one of the tallest of the new girls, is fair, with soft, pale brown hair, good features, a lovely expression and most charming and refined manner. She has been carefully educated, chiefly at home under her mother's eye, and is a credit in every way to her gracious and high bred parents.

Adele Ashworth Enloe, daughter of Representative B. A. Enloe of Tennessee, is a charming type of the southern girl. Tall, slender and graceful, she has black curly hair, dark blue eyes and delicately fair complexion, with rose tints in the

ADELE ASHWORTH ENLOE.

cheeks. She is just out of school, speaks German, reads a great deal and is quite an artist, painting beautifully from nature. She had no formal coming out, but made her first appearance at a large reception given by her mother and several other ladies at the National hotel. Another attractive girl, who glided out, as it were, without a formal announcement, is Valentina Mendonca, the youngest of the Brazilian minister's four daughters. She is a real Spanish girl in appearance, has dark eyes and hair, heavily penciled brows and clear olive skin. She is a fearless and graceful horsewoman, as are her sisters, and speaks English as well as her native tongue, but then most of her life has been spent here, so why shouldn't she? Her charming stepmother is an American woman, but looks as much a Spaniard as any of her girls.

Miss Amy Lieber, daughter of Colonel G. N. Lieber, judge advocate general of the war department, was one of the attractive girls whose coming out was celebrated by an elegant tea. She is one of the tall buds, has soft, light brown hair, fair complexion, good features and gray blue eyes, is accomplished and very agreeable in manner. Still another bud and a most charming one is Marion Gratz Crosby, daughter of Admiral Crosby, whose home for many years has been in this city. She is of good height and figure, has brown eyes and hair, fair complexion and a sweet smile. She has been carefully educated and has a very refined and pleasing manner. JULIETTE M. BARRITT.

The Gifted Kembles. The Kembles covered five generations of actors, the most gifted family in that profession that the world has seen. But the dramatic gifts do not come from the female side of the house, but from the male line. Roger Kemble was not an actor when he married the beautiful and accomplished daughter of an actor named Ward, but a hairdresser. Under his wife's tuition and with her companionship he developed into a fair actor, however. Twelve children were born to the couple. The oldest and most gifted of all was Mrs. Siddons. The dramatic power of the Kembles thus came through their mother, and the greatest of them was also a woman. The genius shines conspicuous on the female side throughout. If Mrs. Siddons was the greatest of the Kembles, the next greatest was her niece, Fanny Kemble, who died at the beginning of this year.

THE HOG IS THERE.

At Last He Has Come on Top in the Price List.

High prices for fat and stock hogs and pork product must of course have the inevitable effect of creating a heavy demand for good breeding stock, and we have already reached the point where fine sows are in some instances worth much more than good cows. Breeders of registered hogs have for some time past seen signs of a rapidly developing boom, and at the West Liberty (la.) sale of Poland-Chinas the fact was developed in a startling manner that breeding hogs are now in greater demand than for many years.

An average of over \$120 for 67 head and repeated offers of \$100 per head at private treaty for fine sows owned by local breeders from parties unable to supply themselves at the sale would indicate that owners of good pure bred swine have at the present time something of a bonanza.

At the annual meeting of the American Poland-China Breeders' association, held at Cedar Rapids just before this sale, there was a large attendance, and the opinion was freely expressed that the demand will not only exceed the supply, but that it will take several years to breed back to the point where hogs will again be plentiful.

We congratulate swine growers upon the good fortune that has overtaken those who are in shape to profit by the peculiar conditions now existing and trust that calm judgment and discretion rather than undue excitement will guide investors safely through the era of high prices now inaugurated. Hogs are now legitimately worth a good price, and the swine herd properly handled should yield a handsome return for the ensuing year at least.—Breeder's Gazette.

White Holland Turkeys.

We reproduce from The Poultry World the accompanying artistic illustration of these handsome birds. While the favorite and mammoth bronze turkey family will doubtless furnish the popular market fowl, yet for fanciers and for giving variety to picturesque poultry yards the white Holland makes a brilliant appearance.

All known breeds of turkey are descended from one or the other of the wild species of this fowl found in America when the country was discovered. One species was found in Mexico, a dif-

WHITE HOLLAND TURKEYS.

ferent one in New England. Early in the 16th century specimens of both breeds of this national bird of America were taken to Europe, where in the course of time they were propagated and domesticated. The memory of more than one or two of our readers will go back to a period when the "old white turkey hen" was a feature of the farmyard and poultry roost. But in time the breeds differentiated till now the bronze is the prevalent type in America. Meantime the differentiation in Europe proceeded along another line and produced the handsome birds of which those in the illustration are a type. The Holland white turkey is a favorite in many quarters. Its flesh is tender, and it attains good size. Its glistening plumage makes it a conspicuous object for hawks, however, in districts where that bird of prey has not yet been exterminated.

Docking Lambs.

The Wiltshire (England) way of lamb docking is given as follows: Two men sit upon a stool about 6 feet long, facing each other, holding the lamb between them. One man puts his arm around the lamb, securing the fore legs, the other holding the hind legs. The operator selects a ram lamb first, and using an iron for castration returns it to a boy, who replaces it in a wood fire and hands back the "tailing iron," an instrument about 24 inches wide at one end, with a thin cutting edge, having a handle about 14 or 15 inches long, heated sufficiently to cauterize.

The proper joint having been selected, the operator presses the iron upon the tail, which comes off instantly, and then the same instrument sears the veins if necessary. A ewe lamb is handled up immediately, and with the instrument the tail is removed without further heating, and this goes on alternately, thus saving time. Bleeding after docking is never known with this process.

Confidential as to the Hackney.

A prominent dealer in trotters took the reporter aside and said: "My boy, let me give you a pointer in strict confidence. The day of the trotter is doomed as a gentleman's driving horse. The star of the hackney looms way up near the comet. They want horses that can draw their heavy carts and carriages at a lively pace more than fast trotters, and the hackney was never in such great demand. Prices are stiff and will continue so, as the hackney has come to stay."—Philadelphia Times.

That color can be fed into butter is well known by dairymen, but to what extent is not definitely known. There is naturally a very considerable difference in the shades of Jersey butter, and each of these shades may be deepened or lightened by judicious feeding. Among the articles that deepen the color of butter are carrots and cornmeal. Yellow cornmeal tends to make a deeper colored butter than white corn.

BEAUTY AND ENTHUSIASM.

Miss Grace Margaret Gould Possesses These Attractive Attributes. Beauty and journalism do not always travel together—in fact, there are some very clever newspaper writers who are not altogether fair to look upon. New York, however, is exceptionally fortunate in having nearly a score of really beautiful scribes whose work finds its way daily into the public press.

GRACE MARGARET GOULD.

Miss Grace Margaret Gould, formerly of Albany, but for the past year a resident of busy New York, may lay claim to being one of these. Miss Gould is tall, dark and very winning in manner, with eyes of azure brown.

But it is not of her appearance alone that Miss Gould may be justly proud, for she is one of a busy staff of hustling reporters, and her daily work is both arduous and varied. All sorts of topics come from her facile pen. She writes child's stories, does fashions in dress and in furniture, reports committee meetings and writes up balls, weddings and food exhibits.

The life of a New York newspaper woman is a busy one, and, as Miss Gould declares, a woman must put all her time, her intellect and her character into her work, or she will not be a success. AUGUSTA PRESCOTT.

WOMAN'S WORLD IN PARAGRAPHS.

This Paragraph Is Written Especially For Young Men to Read.

Among my friends is a young woman who has lately refused three different offers of marriage. She is a strong, beautiful, queenly girl, who supports herself handsomely by a work she has chosen. She is attractive in society, and people wonder why she does not marry. She herself has no antipathy to marriage and would make one of the sweetest, noblest of wives. Why does she not marry? When asked that question by intimate friends, she answers simply, "I don't know anybody I would have." With admirers in plenty she tells the literal truth. The young men who offer themselves to her are of a type which is lamentably common in all cities—just the ordinary, well dressed, under-sized, scrawny, cigarette smoking, alcohol drinking youth who is proud of going on Saturday night "tours" or "lars," whichever way you would rather spell it. One of the three my young lady liked almost well enough to marry. But the tainted atmosphere of his past life followed him and clung to him in spite of himself, barring him out forever from the pure home he sought to enter. The ordinary type of city youth whom girls meet is apt to be of the kind I mention. There is another type, somewhat rarer, thick necked, red faced, rather resembling the prizefighter kind. From these two classes the strong, beautiful, queenly girl whom our time is developing must choose a husband, if she takes one at all. The number of those who do not take any is increasing. Where is the ideal lover that all women dream of, the lithe, erect, manly, broad shouldered youth, with cheeks rose tinted by health and a clean life, with brilliant eyes and flashing white teeth, the boy of frank, merry soul, with heart and brain full of noble aspirations? Undoubtedly there are such royal lovers still for our young American queens, but where are they? Answer me that. Bring them on the scene and take away these semi-invalued young workings with their muddy complexions, discolored teeth and mean little foxy ambitions! The 20th century woman is weary of the sight of them.

Mrs. Lynde Craig has been admitted to practice as a lawyer in all the courts of California.

A great step has been made in the higher education of women in Germany. Nine liberal minded professors of the University of Gottingen offer private courses to women students in various branches, ranging from church history to experimental psychology. That so many German professors in one university favor woman's education is encouraging indeed.

"Bachelor girls" are very much the fashion now. There is a great difference between a bachelor girl and an old maid. An old maid is a woman who missed matrimony and had no other resource to which to turn. A bachelor girl is an unmarried woman who earns her living in a metry, independent way and feels that she will never be left, whether she marries or not. There are not many old maids now.

The first woman to be elected assistant sergeant-at-arms in a legislature is Mrs. M. A. Anderson of Little Rock, who was placed in her office by the Arkansas legislature. Her duties mostly consist in distributing mail among the members and sending their letters to the post.

Permit me to suggest the following as a question for discussion by women's clubs: What effect will learning the carpenter trade have on a man's career as a husband and father?

The Massachusetts farmers at their convention in Boston voted unanimously in favor of municipal suffrage for women. They did more. They passed a resolution asking the legislature to enact a law enabling women to vote for school committees on the same terms that men do. ELIZA ARCHARD CONNER.

N. & W. Norfolk & Western R.R.

Schedule Dec. 18, 1922. LEAVE NORTON DAILY 7:00 a. m. for Graham, Bluefield, Pocahontas and all stations Flat Top and Pocahontas Divisions. 12:04 noon, for Bluefield, Radford, Roanoke, Lynchburg, Richmond and Norfolk.
