LOCAL LAYOUT

It is believed that court will adjourn at the end of the week.

Mrs. Flanagan's private school has over twenty scholars.

The work train is hauling gravel to repair the track between here and the tunnel.

Twenty to thirty men are said to be working on the copper leads on the upper Stillwater.

Who can estimate the number of babies that will this year be named after Blaine and Logan?

On Saturday last the Atlantic express was delayed for some hours at Stillwater, 70 miles east of here, by a washout.

Seven new members were initiated into Park Lodge I. O. O. F. of Livingston on Saturday evening. This lodge is growing rapidly.

Antelope in bands of from two to twenty-five may be seen any day grazing along the foothills between Livingston and White Sulphur Springs.

The earnings of the Northern Pacific for the second week in June were \$263,665, an increase of \$79,555 over the earnings for the same period last year.

Bradley & Co., taxidermists, are removing their stock to the vacant store room next the First National block. This will place them in position to do a fine trade.

J. H. Forsyth, late of the Gallatin valley, has bought the water wagon here, is putting in a new tank and will attach a sprinkler. He will be ready for business on Wednesday.

The Theatre Comique will present an entirely new bill to-night full of interesting features. The Comique improves constantly as it gets in running order and is rendering good entertainments.

Hunters brought in three bear-skins this morning, two black and one cinnamon, for their bounty certificates. They were killed on Pine creek on the east side of the Yellowstone, about twelve miles above town.

Joe Murray has re entered upon the saloon business, this time in Gilbert's building, next door to the former quarters of the Gilt Edge. He is personally very popular and always makes it a point to conduct a nice establishment.

Mr. A. R. Joy has been admitted to practice law in all the courts of Montana. Mr. Joy has studied hard and showed much ability as a lawyer during his studentship and we feel sure he will achieve the success in his profession that he deserves.

J. M. Holt, the well-known stockman of Miles City who is in town today, has bought of Granis & Behringer of Shields river, 2,000 head of cattle which he will drive to his range in Custer county. The price paid for the herd is not stated.

Dr. Grant is in communication with a brother physician and friend in Indianapolis, who expects to form one of a party of about fifty ladies and gentlemen of that city who will visit the National Park in the latter part of August or the first of September.

Notices are posted around town offering rewards for the recovery of horses stolen from Minnewaukan, on Devil's Lake in northeastern Dakota, or for the apprehension of the thieves. Montana has enough horse-thieves of her own to look after, without giving attention to any so far away.

The committee of the Episcopal church held a meeting a few evenings since to consider means to provide accommodations for the church. It was considered advisable to purchase or rent a building of convenient size and place it on vacant lots in a central location, to be temporarily used until a suitable church edifice is built.

Attached to the Pacific express today were a baggage car and Pullman devoted to the exclusive use of the

Bijou Opera troupe of New York, now on its way to fill an engagement at Helena. The members of the company, among them a number of young ladies that were fair to look upon, got out of their car and carried on a social game of ball, during which bewitching operation they were watched with breathless interest by all the bald-heads in Livingston.

Current reports are that the force in the railroad shops here is to be shortly augmented by thirty or forty men and that an addition of several stalls is to be built to the round-house. We cannot say whether the reports are or are not correct, but following so close upon the long visit of Mr. Cushing, superintendent of motive power, machinery and rolling stock, they are the reverse of improbable. When here Mr. Cushing had nothing to say on the subject.

It is understood that among a few some objection has been raised to the use of Landt's summer garden in connection with the Fourth of July exercises. We are at a loss to understand the basis of any such objection. No beer or intoxicants of any kind will be sold or given away at the garden on that day and no admission will be charged. We know of no more suitable location in every respect, and consider that those who have the arrangements in charge are fortunate in securing it for the purpose.

E. V. Smalley, the talented journalist and magazine writer, was on the west-bound train yesterday. He is now going to the Flathead lake country, which will be the subject of an article from his pen shortly after in the Century. The article will be illustrated from photographs to be taken by F. Jay Haynes, who will join Mr. Smalley in a few days. After the high water subsides the same two gentlemen will go down the course of the Upper Missouri, and the magnificent scenery of that region will be transcribed by the pen of the one and the camera of the other for publication in the Century.

Cornelius Hennessy, indicted for grand larceny in connection with Morris Cook and the others who raided the opium den, was found guilty of petit larceny, and will probably be sentenced to a light fine and a short term in the county jail. It is said that Hennessy's case was given to the jury when the performance at the circus was getting very close and that the majority of the jury hastily agreed with the minority on a verdict of petit larceny so that they could all go to the circus. The others of the party, Fred Reed, Ed. Rønner and Gase, will not be tried till next term.

The Livingston ENTERPRISE, of June 13, boastfully asserts that peas were in blossom at that time. Why, my dear sirs, we had peas on the market here on the 10th. There is no use of the upper country trying to vie with lower Yellowstone matters. Its out of the question, because they haven't got the "sile."—Glendive Times. Livingston has had peas in the market during a month or more past but they were not grown in the open air nor were those of which the Times speaks; they were forced in hot-beds. The blossoming peas of which we spoke were never under any shelter.
