

SENDING OUT THE GOLD BARS

Bamberger-De Lamar Mill Is Now Working Smoothly.

BOSTON CON. BEGINS TO SHIP

YAMPA SMELTER STARTS-DECISION ON MINERAL CLAIMS.

After many months of work, the mill at the Bamberger-De Lamar properties at De Lamar, Nev., is working regularly and smoothly, and making an excellent saving in values. This was the word brought to President Simon Bamberger yesterday by General Superintendent F. A. Keith, who also brought the details of a new strike made in the gold cup claim of the company's domain.

"The mill has now been running regularly, making a satisfactory saving for thirty days," said Mr. Keith. "Consequently, we have every reason to believe it will continue to do so in the future. We were treating 250 tons of ore a day early in the present month. Now we are handling 250 tons, and I expect that before the end of the month we will be taking care of the full capacity of 300 tons. Our crushing capacity and vats are sufficient for this. The only thing on which we are short is the zinc bars. These are being ordered and will be on hand in a few days and they will be installed as fast as possible."

"At first we used the zinc dust process, but this was unsatisfactory, as it was known. We are now employing the zinc shavings method to save the values, with good success. The ore going to the mill averages \$1.50 a ton, and the tailings go 80 cents to \$1. There are other losses, but we are getting an extraction of about 95.50 a ton. When the plant is running at its full capacity, it is expected that the cost of mining and milling will not be over \$2.50 a ton, leaving a handsome profit for the owners. At present, running at only half the capacity, with heavy construction work charged to operating expenses, it is said the entire cost of mining and milling will not be over \$2.50 a ton. Making every allowance, and figuring only \$4 a ton net profit, the plant when handling 300 tons a day should be turning out monthly over \$90,000 net for the company. The De Lamar and April Pool properties alone can easily supply this tonnage for years to come, according to Mr. Keith, with the Magnolia in a position to add to a moderate degree."

"We are following the old ore chutes and are meeting with excellent success. In opening up new ore, said Mr. Keith. "This is true in practically every place we are working. In prospecting new ground, we are finding that the old ore body is the other day, in the Gold Cup ground, which was part of the April Pool purchase. We have penetrated this fifteen feet without finding a wall. The ore runs, according to car samples, from \$7 to \$40 a ton, with some going even higher. The average, as we have ascertained, is \$15 a ton. This is at a vertical depth of 400 feet."

About 200 men are now at work on the property, said Mr. Keith, who will leave the first of next week.

MAY LOCATE STOCK LANDS.

Land Commissioner Gives Decision on Mining Claims.

Mineral locations on school lands in Utah and other states are not subject to the grant to the state if made before the adoption of the survey, according to a decision of the commissioner of the general land office. Attorneys Higgins & Senior, who represent the Henry Bradburn Mining company, are in receipt of an opinion from the commissioner wherein the decision of the local office is reversed in its holding that the location of a mining claim upon unsurveyed lands is subject to the grant of the general land office.
