## COLUMBUS CON. WANTS \$60,000

Directors Will Assess Shareholders For That Amount.

DALY-WEST MANAGER TALKS

KNOWS OF NOTHING TO CAUSE SLUMP IN THE STOCK.

Early in the coming week, probably Monday, the directors of the Columbus Consolidated Mining company will meet and levy an assessment of \$60. 000, or 20c a share on the capital stock of the corporation. The money thus provided will be used in liquidating outstanding obligations, paying for the mill and providing the means of carrydays, or until the new plant goes into

That such action would be taken by That such action would be taken by the company has been an open secret for several days past and yesterday Manager Tony Jacobson and other members of the board of directors consented that the fact be made public. Barring unforeseen delays the company's mill will be ready for operation six weeks hence and from the moment the wheels begin to turn and one is. the wheels begin to turn and ore is being fed to the crushers the proposition will be self-supporting and it will not take long to build up a surplus that will justify the payment of dividends, as the mine is now in shape to respond with any tonnage the new plant may be found capable of handling.

Some criticism of the management has resulted because more ore was not sent to market during the development and constructive period, but every engineer and operator of judgment who has examined into the mine and the company's affairs has made the unqualified statement that the best thing to do was to get the mill running before undertaking production as a regular thing in order that the milling ores would not have to be handled more than once. The value of this policy to the shareholders will become apparent after operations begin.

In the development of the mine con-

apparent after operations begin.

In the development of the mine considerable first-class ore has been marketed during the past two years, but several of the stopes are now congested with milling rock and several thousands of tons of it has had to be piled on the dumps, as well. When the mill starts the congested stopes will be relieved as rapidly as possible and then the ore broken will be sent to mill or market direct, as its quality demands, and the one handling will do the business. And it may be said, in passing, that probably no mining company milling at a minimum cost than is the

tion to employ an electric loco tion to employ an electric locomotive to haul the trains of ore through the Howland tunnel to the mill bins. The energy comes from the company's own magnificent plant, three miles down the canyon, where the power necessary to operate the big generators comes from a three-mile pipe line the water from from which passes through Pelton water wheels. As the company is selling power to other companies, the cost of supplying energy for its own purposes is practically nathing own purposes is practically nothing.

### DALY-WEST MANAGER BACK. Cannot Account For Slump in Stock-

Drainage Talk. Jacob E. Bamberger, president and general manager of the Daly-West Mining company, returned from the east yesterday afternoon for the purpose, as he expressed it, of trying to find some reason for the decline in the company's shares.

reason for the decline in the company's shares.

"It is impossible for me to say anything regarding the cause for the slump," said Mr. Bemberger, "because I know of nothing. I thought I had better come nome and investigate, as no word had reached me in the east that would be cause for alarm."

Questioned regarding the negotiations for the extension of the Outario drain tunnel into Daly-West territory, Mr. Ramberger said the matter was taken up about six months ago, but as yet no definite conclusion had been reached.

"We hope to be able to arrange for the work being performed," said Mr. Bamberger, "but there is no occasion to hurry it. The statement that we are bothered with water now is, as everybody familiar with the mine knows, all nonsense. There is no chance of water becoming a factor with us for the next two years, at least, and as I feel certain that when the time comes we can arrange to have the drain tunnel extended, there is no reason to worry on that account at all."

Sit. Tetro also suffered at the hands of the bears. It opened at 25c. or it under Thursday's low mark, and dropped to was bid and 274c asked at the close. ### UTAH COPPER COMMENT

Boston Publication Notes Importance

of Porphyritic Ores of Bingham. of Porphyritic Ores of Bingham.

Now that Colonel E. A. Wall has successfully demonstrated that the porphyry deposits of the Bingham camp can be treated at a profit the capitalists who have held an option on his property have purchased from him 1 55 per cent interest in the property for \$405.000, says the Boston News Bureau.

The Utah Copper company (not the Utah Consolidated) is capitalized for 500, 600 shares, par \$10, under New Jersey laws, and the following officers have been elected: President Charles M. MacNell!; vice president E. A. Wall; treasurer and secretary. Spencer Penrose, and these officers, together with D. C. Jackling, J. D. Hawkins, C. Lett and K. K. McLaren constitute the board of directors.

tors.
The company is now treating 450 tons of porphyry daily in its concentrating plant and by October will have increased the capacity of its plant to 600 tons, and it will continue to enlarge the plant to the limit of the available water supply. This is now estimated to be sufficient;

to treat from 6.00 to 7,000 tons of ore per day.

The Utih Copper company has fully developed to a depth of 500 feet a solid block containing more than 150 acres of porphyry of practically uniform value of about 2 per cent copper, with an added value of 50 cents per ton in gold and sliver. These 150 acres are all susceptible to profitable tretatment except varying small quantities of surface and drift material which must be stripped and removed.

The Company is deriving a net profit

The stock of the Utah Copper company sclosely held, but the operations of this ompany are of great interest in the opper mining world by reason of the respective large output which can be athered from these porphyry deposits a the Bingham camp, not only by the tah Copper company, but by the Boson Consolidated, United States Mining and Bingham companies.

FARMINGTON OIL WELL. First News in a Long Time From the

Guffey-Galey Bore. After encountering all sorts of difficul

After encountering all sorts of difficules that have made operations exasperingly slow and tedious during the past we months, the expected change has octred in the formation through which e Guffey-Galey syndicate is drilling for at Farmington, and Superintendent umbaugh is correspondingly happy. Marles K. Rowland, who was so largely strumental in persuading the Guffey-aley combination to enter this field, bent Thursday at the well and it is som him that news of present conditions as yesterday obtained.
"I was informed," said Mr. Rowland, that the well had attained a depth of 33 feet, and that for the past several tys, or since the change in formation, a verage of thirty-three feet per day and been made by the ordiers, and no other trouble is anticipated. A solid indistone formation has replaced the ooken up sedimentary stratas through hich such slow progress has been made, and Mr. Rumbaugh is more positive than ter that results of a substantial nature till follow the complete penetration of estandstone. the complete penetration

Annie Laurie Timber Contract. Kimberley, July 28.—Charles Skoogaard, eneral wood and timber contractor for general wood and timber contractor for the Annie Laurie company, yesterday put thirty men and twelve teams at work cutting and hauling in timbers for use in the Annie Laurie mine. There are great forests on the company's own property.

W. H. Blackburn, the United States deputy mineral surveyor, has been here surveying the Providence group of claims for patent.

There was also attributable in part to reports of inferior quality in the winter wheat being harvested and to rather persistent damage reports from the spring wheat belt in the northwest. The cotton market today was not free from damage reports, and these had some natural effect on stocks. There was some early resistance to the downward tendency, which centered chiefly

New Hoisting Works Are Going Up at a Rapid Rate.

A. D. Moffat, the Ontarlo company's general foreman at Park City, was down from camp yesterday. He states that the task of re-equipping the No. 3 shaft on the property with new hoisting works is progressing rapidly, and he calculates that everything will be running as usual, or as it was previous to the fire, inside of thirty days.

The big gailows frame is already in place the foundations for the powerful hoisting engine are in place and the work of installing the machinery has commenced. The erection of the buildings will follow, and, as the material to enter into their construction is already being framed, no delays are anticipated on that score.

Mr. Moffat says that barring the depressing effect that the slump in Daly-West has had on the camp, there is a little late in coming to the front this month, but the 2 cents a share will be none the less welcomed by the sharehold fers on that account.

The Henry F. Quint, accompanied by his wife and two sons, will leave for Boston tonisht. Mr. Quint expects to be absent until September.

Lafayette Hanchett, general manager of the Newhouse interests, has returned from Park City and is again at the testing plant of the Snyder Concentaging company's company's company left for Denver last night to confer with company of ficials.

Confidence Returning in All Lines of Business.

---SMALLER RAILWAY EARNINGS

MANUFACTURERS DO NOT SHOW

New York, July 28 .- Dunn's Review of Trade tomorrow will say: Confidence appears to be returning, despite ployed. Labor disturbances are the most unfavorable factors in the industrial and commercial situation at the present time, curtailing the output of a few much needed products and re-ducing the demand for all commodi-ties. Aside from this adverse influence ties. Aside from this adverse influence the situation has improved, although progress is slow and frequently interrupted. Another week has put wheat and cotton beyond danger and brought other crops nearer maturity. Dealers are providing for the future a little more freely, and in several important branches of industry orders come for-

chases when deliveries are so uncertain. Foreign hides arrive slowly and

re in brisk request.

Failures this week numbered 220 in the United States, against 190 last year and 18 in Canada compared with 19 a year ago.

Bradstreet's Report. New York, July 28 .- Bradstreet's will More activity is noted at a few western centers, but fall trade is slow to assume form pending assurance to to crop regults and a settlement of existing industrial disturbances. Crop conditions are on the whole favorable, though irregularity in sections prevents generalization. Fall inquiry and shipments of goods are livening up at the west and are expected to become active early in August. The movement of winter wheat to market, somewhat delayed this year, has begun in earnest. Coincident improvement in collections is shown at some centers and the demand for money from the country has increased. The movement of currency to move the crops has assumed good proportions this week. Advices from some western markets point to more doing in fall divergence the extent of the least of the country and in the country passing the content of the country has increased.

on the Pacific coast San Francisco re-ports a light trade at present but a good fall business is expected. Export business is affected by war complica-tions. The salmon pack will be disap-pointingly small on the entire Pacific coast.

LIVESTOCK MARKETS.

Chicago, July 29.—Cattle—Receipts, 100, 500 Texans: market dull, 16015a low-; good to prime steers, 5,4064,60; poor medium 4,2563,50; stockers and feed-s, 2,6064,00; cows, 1,5064,25; heifers, 2,606,50; calves, 2,006,50; Texas fed steers, 665,00. western sheep, 2.40@4.50; native 4.00@7.00; western lambs, 4,50@4.75.

ward in greater bulk. Owing to special conditions, the leading branches of manufacture do not make uniform progress, complications as to supplies of ray material making the current situation particularly puzzling at the textile mills and shoe shops.

Earnings of the railways thus far reported for July are only 2.7 per cent less than last year.

While the tone of the packer hide market is naturally very strong on account of the packing house strike there is no activity, tanners failing to perceive any advantage in making purchases when deliveries are so uncer-

South Omaha, July 29.—Cattle—Receipts, 1.900; market slow, 10@15c lower; native steers, 4.00@5.95; cowers and heifers, 3.00@4.40; western steers, 2.25@4.50; Texas steers, 2.56@4.50; cows and heifers, range, 2.25@3.75; canners, 1.50@2.55; stockers and feeders, 2.50@4.00; calves, 3.00@5.59; bulls, stags, etc., 2.00@4.25.

Hogs—Receipts, 4.500; market generally loc lower; heavy, 5.00@5.75; mixed, 5.10@6.50; pigs, 4.75@5.00; bulls, of sales, 5.10@5.15.
