PARK CITY MINES TO THE FRONT

New Properties Are Relied Upon For Big Results.

ONTARIO'S CAVED TUNNEL

PLAN OF GETTING THROUGH
BAD GROUND DECIDED UPON.

"There is an indefinable something in the air that impresses one with a conviction that the camp is going to jump right to the front again," said W. V. Rice, the oid-time Park City operator, yesterday. "I have just returned from there and have no hesitancy in saying that a change is taking place in the district that is causing everybody to feel and look more cheerful than they have done for a long time past. It was noticeable on every hand. Business is picking up and the developments of the past year or two in the newer properties of the camp are beginning to make impressions that are electrifying in their effects upon the community. While the troubles at the Ontario still have a depressing effect and will have, to a greater or less extent until the mine has again been opened, much has happened to relieve the strain, and as it is only a matter of time till the drain tunnel is again opened, I look to see the year close and the new one open upon an era of prosperity and activity such as the district has never seen."

Mr. Rice had neither the time nor opportunity to look personally into many of the propositions that seem to form the basis of the camp's new hope, but he stated that from what he was able to gather in the way of reliable information, there was substance behind a number of them. His years of experience in the old Anchor, now owned by the Dally-Judge company, qualifies him can a considerable body of fish ore and hat shipments to the smelters will soon under the basis of the camp's new hope, but he stated that from what he was able to gather in the way of reliable information, there was substance behind a number of them. His years of experience for them, His years of experience of them as a considerable body of fishs ore and haumber of them. His years of experience in the old Anchor, now owned by the Dally-Judge company, qualifies him

number of them. His years of experience in the old Anchor, now owned by the Daly-Judge company, qualifies him to speak and lends weight to his ex-pressed belief that the new disclosures in the Little Bell and West Quincy will prove of inestimable value to the companies operating them and the camp

Little Bell and West Quincy.

Little Bell and West Quincy.

"I have always had a conviction, based upon my knowledge of underground conditions in the Anchor," said Mr. Rice. "that great bodies of ore would some day be uncovered in the ground owned by the Little Bell and West Quincy. Without claiming more for my judgment than that gained by intuition, I now recall having gone over the old J. I. C. ground some time before G. D. B. Turner undertook its development, and of having remarked to the Salt Lakers, who then accompanied me, that if I was to undertake the opening of that territory. I would put down a shaft at a place which I then pointed out. A short time after that Mr. Turner took hold of the property and commenced to sink almost at the point I had fixed in mind as a properone. As Mr. Turner encountered ore there, I look upon it as proof that my reckoning was not faulty. I have not seen what the drift from the Little Bell into West Quincy would have disclosed, but the reports which came from thereduring my stay at camp were of such a nature that there is every reason to believe that the ground carries what was known as the back ledge' in the Anchor, and which, in the latter property, was always productive of good ore up to the point where it faulted or was thrown. I believe the neighboring properties have that ledge and that they have it in place. If that proves true, their future is assured.

"I also heard that things were looking mighty promising for the Wahash in the Donard Tonder Com-

true, their future is assured.

"I also heard that things were looking mighty promising for the Wabash, and, while the policy of the management seems to be not to anticipate, but rather to await results of development. the belief at camp is firmly grounded that another big mine is to be made there. These conditions and those existing at several other of the new mines and prospects of the district are all receiving most favorable comment in the ranks of men whose knowledge of the camp entitles their utterances to consideration, and I take it all as a to consideration, and I take it all as a good sign for the future. Many mines, in my judgment, are yet to be made in Park City, and from now on they will be coming out rapidly."

OPERATIONS RESUMED.

ing the cres of the Boston Consolidated and Cactus properties, the two Newhouse enterprises.

"The output of both the Cactus and the Boston Consolidated is now being treated by the Bingham Consolidated company, the former under an agreement with the American Smelting & Refining company. The Boston company expires early next year, by which time the American Smelting & Refining company expects to have its new \$2.00,000 plant in operation.

"The Boston Consolidated contract with the American company is for twenty years, on the basis of \$3 per ton working charge, 94 per cent fines, on a daily treatment of 500 tons of 2 per cent ore at the minimum and 1,000 tons at the maximum. Its contract with the Bingham company calls for a daily treatment of 200 tons of 3 per cent ore, \$3.75 working charges, 94 per cent fines.

"The Bingham company anticipates having its own properties sufficiently developed by the time the Boston and Cactus and Utah Copper contracts are taken away from it by the American Smelting & Refining company pext spring to keep its smelter in full operation upon its own ores.

OPERATIONS AT PACIFIC.

Detailed Report on Conditions at Company's Property.

American Fork, Aug. 22.-The Pacific Gold Mining & Milling company has lev-

The Bog mine has a bunch of specimens in the bank window which have been taken from the claim lately, some of them assaying as high as 1.500 ounces in silver. It is understood that the mine has a considerable body of this ore and that shipments to the smelters will soon be in order.

AT ONTARIO'S CAVED TUNNEL.

Four Hundred Feet Will be Driven to Get Around Bad Ground.

To get around the last cave encoun

in the Park that the task will be ac-complished without a great deal of trouble and that Superintendent Connolly will wind it up under rather than over the time mentioned.

SHEBA WANTS MONEY.

Company is Over \$15,000 in Debt and Levies Assessment.

The ill-starred Sheba Gold & Silver Mining company has levied another assessment of 3 cents a share, which will be delinquent on Sept. 15, while delinquent sale day is fixed for Oct. 16. Accompanying the notices which reached local shareholders in vesterday's mail was a letter from President W. S. Cleaves of Hancock, Mich., detailing the troubles of the company and showing its indebtedness, the total of which is \$15,063.31, or more than the pending assessment will provide.

Boston Comment on the Smelting Trust's Moves.

Discussing the affairs of the American Smelting & Refining company, as they relate to its operations in Utah, the Boston News Bureau of Friday sars:

"The securing of control of the Utah Copper company by the American Smelting & Refining commany marks the creation of a new policy by the smelters trust. Heretofore it has kert out of the mining business, devoting its energies to custom smelting and letting the other fellow take all the mining risks. It took no risks on the smelting end.

"With the taking over of the Guggenheim Exploration company, however, this policy was changed, and the American Smelting & Refining company more proposes to become a prominent factor in the copper producing and smelting field. To do this it is necessary to have its policy deproducing and smelting field. To do this it is necessary to have its policy deproducing and smelting field. To do this it is necessary to have its policy deproducing and smelting field. To do this it is necessary to have its policy deproducing and smelting field. To do this it is necessary to have its policy deproducing and smelting field. To do this it is necessary to have its policy deproducing and smelting field. To do this it is necessary to have its policy deproducing and smelting field. To do this it is necessary to have its policy was changed, and the American Smelting & Refining company would be made in a company in the calculation, however, for what ore has been since found has been alto-getter too widely distributed through those property some of them by local tailent and some by Michigan engineers. They were all extremely favorable, but the ground has not yet responded as the reports inclose touch with conditions are still hope in the deep maintended to the field of the property some of them by local tailent and the early days. Developed the promoters were made upon the property some of them by local tailent and some by Michigan engineers. They were all extremely favorable, but the ground has not yet re

W. A. Langford, secretary and manager of the Paymaster company's Idaho property, a proposition that is largely controlled by local railroad men, states that work is progressing well and that substantial results are soon expected. At the present time a drift, is being run in the ledge from the bottom of the shaft and, at the last report, 150 feet had been gained.

According to sustant

gained.

According to surface development and showings along the vein the drift now being run should encounter one of the pay shoots at almost any time. The face of the drift is now almost directly beneath where good ore makes on the surface and Manager Langford is counting the days when he may be able to report a big strike.

MINING STOCK EXCHANGE.

Higher Priced Stocks Helps Out Money End of Business.

of 200 tons of 3 per cent ore, \$3.75 working charges, \$4 per cent fines.

"The Bingham company anticipates having its own properties sufficiently developed by the time the Boston and Cactus and Utah Copper contracts are taken away from it by the American Smelting & Refining company next spring to keep its smelter in full operation upon its own ores.

"Salt Lake believes that the Boston Consolidated will be the next Utah property of find lodgment with the American Smelting & Refining company, and it is believed there that it is as valuable as property as the Utah Copper company, as it not only has as large copper-bearing porphyry deposits as the Utah Copper company, but it has well used to the consolidated on sales at 19c. Century lossed up 500 at 15c, and May Day was a large quite strong at 10½c. New York was a value property today to open the fall and the property today to

developed sulphide deposits, which the Utah company lacks, sufficiently large to warrant the signing of a contract to have the American company treat 500 tons of sulphide ores as the minimum per day."

SOME ACTIVITY

Following is the list held its own.

Following is the list of final quotations of sulphide ores as the minimum per day."

GETTING DOWN TO BUSINESS.

winter campaign. On account of the cost of hauling water twelve miles, it was decided to continue prospecting without installing a whim. Instead, a good geared winch and steel cable will be placed on the 100 foot shaft and a drift will follow the vein into the mountain from the bottom, where good ore was left when work was suspended about ninety days ago.

If the ledge proves up as the management is confident it will, a gasoline hoist will be installed during the winter or early spring and mining will com-

or early spring and mining will com-mence in earnest. Much of the ore that has been so far taken out in sink-ing the shaft is exceptionally high grade and several tons is already sacked ready for shipment.

Utah Stocks in Boston.

SOME ACTIVITY

IN WALL STREET

IN WALL STREET

In the last of a good sized short interest, and today's upward rush was strongly suggestive of a drive against this interest. In the opinion of conservative observers, however, this but partity explains Reading's phenomenal rise.

Rumors that this stock is to come in for an increased dividend at an early day were current today as was also a report that the road is to figure advantageously in a deal, now in process of formation, but neither of these stories rose above the level of board room gssip. Much of the buying of Reading during the past few weeks has come from out of town, according to reports. Philadelphia and Pittsburg houses being prominent on the long side. Operations in Reading aggregated almost 25 per cent of the day's entire business. The rise in Reading served to stimulate the balances of the list for a while, but a reverse movement soon set in. The Pacifics, New York Central, Atchison, Delaware & Hudson and some of the more active industrials yielded a point or more. The reaction was checked by a further rise in Reading.

New York, Aug. 22—All other events

In the last hour operations centered barrely around such stocks as Delaware barrely around such stocks.

New York, Aug. 22.—All other events in today's stock market were completely overshadowed by a sensational upward movement in Reading and Eric. On an enormous volume of buying, Reading advanced 3½ points to a new high record in the first hour, soon lost much of its gain, but subsequently recovered and closed with a net advance of 2½ points. Erie on very heavy trading, advanced 2½ to 51½, also a new high record, and closed at 51½. It would be idle to advance any special reason for the movement in Reading. A pool of considerable proportions has been operating in it for almost a winter campaign. On account of the cost of hauling water twelve miles, it was decided to continue prospecting without installing a whim. Instead, a good geared winch and steel cable will be placed on the 100 foot shaft and a drift will follow the vein into the mountain from the bottom, where good ore was left when work was suspended about ninety days ago.

AND THE RESERVE				

Moncy, Silver, Etc.

New York, Aug. 22—Money on call. steady, 134224 per cent; closing bid, 2 per cent; offered at 2½ per cent; time loans, steady; sixty and ninety days, 364 3½ per cent; six months, 4 per cent.

Prime mercantile paper, 462½ per cent.

Sterling exchange steady, with actual business in bankers' bills at 4.85548.869 for demand and at 4.84564.8740 for sixty day bills; posted rates, 4.85½64.87½; commercial bills, 4.842½.

Bar silver, 5134.

Mexican dollars, 47.

Government bonds steady, railroad bonds irregular.

Metal Market.

New York, Auk. 22—The London tin market was higher at £159 for spot and £140 7s 6d for futures, and while the demand locally was reported light, holders were firmer in their views and the spot position was quoted at 32.75063.00.

Copper also was firm and higher in the London market, closing at £69 17s 6d for spot and at £69 13s 9d for fetures. Locally very little copper is offered and the market is very strong. Lake and electrolytic are quoted at 15.75@16.75 and casting at 15.374@15.625.

Lead was unchanged at 4.00@4.70 in the local market, but advanced to £14 in London.

local market, but advanced to £14 in London.

Spelter was unchanged at £24 l5s in London and at 5.70@5.80 in the New York market.

Iron closed at 50s 6d for Giasgow and at 43 24 for Middlesboro in the foreign market. Locally the situation was unchanged. No. 1 foundry northern was quoted at 16.25@17.00; No. 2 foundry northern. 15.75@16.50; No. 1 foundry southern. 15.75@16.75; No. 2 foundry southern, 15.50@ 16.25.

Washington, Aug. 22.—Today's statement of the treasury balances in the general fund, exclusive of the \$150,000,000 gold reserve shows: Available cash balances, \$124,980,372; gold coin and bullion, \$55,104,302; gold certificates, \$22,766,020.
