Mines and Mining Stocks | Financial and Commercial

NEW EQUIPMENT

gallows-frame and other and minor matters of equipment have been decided upon by the management of the Star Consolidated and the placing of the property in first-class condition for any demand in the way of development and production that may arise will be pushed with all possible speed.

Fred C. Richmond of the Salt Lake Hardware company landed the order for the holst and it was being prepared for shipment to the mine yesterday afternoon. It is a great, 12x14, double-cylindered geared machine, with a capacity of operating under a heavy load to a depth of 1,500 feet, and calculated to meet the demands of the company for a long time to come.

Heavy foundations for both the hoi Héavy foundations for both the hoist and gallows-frame, the material for which has also been ordered, will be constructed with an eye to their lasting qualities, six feet in thickness of solid masonry being the specifications for the foundation bed of the engine. Material for this work and brick with which to enclose the new boiler are being hurried to camp and the management will try to have the new plant in commission thirty days hence, the time depending altogether on the ability of the lumbermen to get the big dimension timbers for the gallows-frame here promptly.

"The hoist we have at the property h "The hoist we have at the property has just about outgrown its usefulness for the work ahead of us," said President H. G. McMillan. "Down to the 600 level it operates very satisfactorily, but it is not heavy enough to stand the work piled upon it from two or three levels at the same time and operate to the 800 level the bottom of the mine's present workings. We have not been able to do much on the 800 level for some time past on that account.

STILL TALKING MOVE.

Utah Consolidated May Yet Decide to Rebuild Its Smelter at Garfield.

It has been intimated from Boston more than once during the last six months that if an amicable settlement with the farmers and ranchers in the valley was not finally made that the Etah Consolinot finally made that the Stah Consolidated company would move its smelter to Garfield. That idea evidently still prevails, for a Boston paper which has always stood close to the officials of the Utah Consolidated company, again refers to the subject, as follows:

"The one problem before the Utah Consolidated company."

"The one problem before the Utah Consolidated management is that in connection with smelter fumes. There has been some consideration given to the question of the removal of the Utah smelter to the Garfield district, where is located the new smelter of the American Smelting & Refining company, the mills of the Boston Consolidated company and the Utah Copper company. The character of the Garfield country permits of smelter operation without fear of damage to agricultural interests.

"President Broughton will sail for Europe early in May for a vacation."

MACHINERY FOR BULLION.

Three Carloads Go Out for a Salt Lake and Eastern Crowd.

Three carloads of mining machinery and equipment were billed out by Fred C. Richmond yesterday for Beowawe. Nev. It is consigned to the Keystone Explorait is consigned to the Reystone Explora-tion company, a combination of Salt Lake and eastern mining men, and will be used in the equipment of properties in the old Bullion district, thirty miles south of Beowawe, on the Southern Pacific. A of Beowawe, on the Southern Pacific. A six-drill compressor, elegicic light plant, cars, rails and all sorts of mine equipment are included in the order that has been filled, its completeness being necessarily minute owing to the fact that the district does not as yet boast of supply houses and places where little things can be nicked up.

Delmas, who last year interested a Montana crowd in the same district and organized the Gold Quartz company a Montana crowd in the same district and organized the Gold Quartz company, went east early in the present year with another group of claims that he owned in the district and was not long in finding backers for the present undertaking. He did not go seeking a crowd to unload stock upon; he went with a determination, if possible, of finding someone willing to put money into a legitimate undertaking, an undertaking that he demanded should be thoroughly investigated at the start. Engineers were sent into the field, and they were followed by some of the men who contemplated going into the enterprises. The result was the formation of a company with ample capital and a determination to mine. The shipment of the big consignment mentioned has been the result. Mr. Delmas, who is vice president of the company, has gone ahead to look after the delivery of the material at camp.

Park City Snipments.
Following is the list of ore shipment from Park City during the past week, a reported through the Mackintosh and Silver King sampling mills: Daly-Judge

MINING STOCK EXCHANGE.

Little Bell Jumps Up.

FOR STAR CON

The week opened to renewed activity on the mining exchange and all stocks were strong. During the day a total of 57.310 shares of stock, with a selling value of \$38.277. changed hands. Little Bell made its first sale at \$12.37½, while in the afternoon it was picked up at \$12.25. This was over \$1 above Saturday's closing price and reflects the importance attached to the tapping of the fissure on the 300-foot level. Columbus Consolidated did business at \$7.20 to \$7.35 and back to \$7.25, while Daly-Judge held statoinary at \$12. Bullion-Beck recordeded a sale at \$2.50, the highest price it has shown in years. Beck Tunnel was practically unchanged at \$1.15. Thompson shown in years. Beck Tunnel was practically unchanged at \$1.15. Thompson shown in years. Beck Tunnel was practically unchanged at \$1.15. AT NEW YORK BONANZA.

Shoot on 800 Level.

Shoot on 800 Level.

Manager M. J. McGill of the New York Bonanza came down from the Park Sunday night for the purpose of attending the regular monthly meeting of the directors last evening. He reports that ore hauling from the mine is now progressing, and that during the next few days he will have a couple of carloads of good stuff in the market. For the past few weeks the roads have been in an almost impassable conditions for a portion of the distance between the mine and sampler and it has been hard work to get teams through. Unless other storms come right away, however, it will be possible to make frequent shipments and keep the treasury well-supplied with funds.

The work of sinking in the ore from the 700-foot level. Mr. McGill states, has been discontinued, as there is nothing to be made in windlassing from the bottom of the winze, which is now down forty feet. Instead, he will continue drifting on the 700 and at the same time reach out for the same shoot on the 800-foot level, where another fifty or sixty feet is counted upon to carry the face of the drift into the ore. Mr. McGill says, also, that he now has a nice ore showing at several points in the mine, and the future looks good. He will return to camp this morning.

UNCLE SAM DIVIDEND.

UNCLE SAM DIVIDEND.

BELL COMPANY WILL HELP.

Manager Murray Tells How Idaho

Camps May Get Connected. Speaking of the desire of the people in the Yankee Fork mining region, Idaho, for telephonic connection with the Custer, mention of which appeared as a mining item from the northern country yesterday morning. Manager David S. Murray of the Rocky Mountain Bell company said: "The subject of running a line in that country has been under consideration for some time, and while the Bell company is not justified by the population in extending a branch through there as yet, it is willing to help out on the project. The on of which appeared as a mining tending a branch through there as yet, it is willing to help out on the project. The thing for the people up that way to do is to form a company of their own and handle the service themselves. We are willing to lend a helping hand."

UNCLE SAM DIVIDEND.

Usual Monthly Payment of \$5,000
Ordered for May 19.

One day ahead of time, the directors of the Uncle Sam Consolidated company met in regular monthly session yesterday afternoon and declared the usual dividend of \$5,000, or 1 cent a share on the capital stock of the corporation. Books will close on the 12th and payment will follow on Saturday, the 19th and payment of close on the 12th and payment of close on the 12th and payment of officency on the 12th and payment of dividends, the lull of a few months previous to that time having been necessitated by the burning of the company's works and the building of a mill. The annual meeting of the company is scheduled for the early part of next month and the exhibit that will then be made cannot fall to be a good one, as the mine has been responding to development in new territory fully up to the expectations of the management.

Little in the way of detail concerning underground conditions has been given out, but the record of production has been talking for itself. It is stated, however, that something new is coming soon and that it will occur before the annual meeting is the object sought by Superintendent C. C. Griggs.

GOES TO OSCEOLA.

Dr. S. A. Whitney May Start His Mill on Black Horse Ore.

Dr. S. A. Whitney who came a big gold.

Mill on Black Horse Ore.

Dr. S. A. Whitney, who owns a big gold property in the Osceola camp, which is equipped with a mill, left for camp last night to size up conditions at the discoveries in the Black Horse district, a few miles out of Osceola. The doctor has been importuned by some of the owners of property in the new district to make a mill of their ores, and, if he finds that conditions are such that it can be profitably done, he will most likely start his plant up for them.

If there is the quantity of gold-bearing quartz reported, and if it will mill anywhere from \$10 a ton up, the doctor figures that the owners can well afford to haul the ore and pay him a fair price for handling it for them. Should the mill be started, it is also the doctor's intention of resuming development work upon his own ground.

value. \$2,110,000. United States bonds were all unchanged

Treasury Statement.

during the next week or two. There is no set day for the option to expire.

John J. Daly left for San Francisco Shunday to learn what had become of his automobile. Had he waited until yesterday afternoon he would have known that it had been shipped, as the bill of lading for it reached his offices during the day.

C. E. Hudson, the broker, returned from San Francisco yesterday to look after business on this end of the line and to explain the sentiment existing in San Francisco regarding the stock exchange business to the officials of the local exchange.

President Charles M. MacNeill of the Utah Copper company came in from Denver yesterday afternoon to spend a few days in looking over the company's mines and to note the progress that is being made in the construction of the mam upon firm cables. Later the market became weak on selling by local traders. July closed 1/26% lower at 456.

Trading in oats was quiet, but the market had a firm undertone. July closed unchanged at 30%231.

Provisions were firm. At the close July pork was up 12%, lard was up 7½ and ribs were 7½210 higher.

Money, Silver, Etc.
