Mines and Mining Stocks

Add to Fame of Beaver County.

Not one mining property in 500, and not one good property in fifty has the numerous attractive features and the marvelous resources of the Revenue Consolidated Mining company, located in Pine Grove, Beaver county, eighteen miles southwest of Frisco and

This Means a Speedy Rethreshouse.

The Revenue domain embraces 1,600 acros of mineral grounds, forty claims unpatented on nearly half of which there is a wonderful surface showing of ore, as well as in the thousands of feet of workings. There is a good mill on the property. There is a large stream of pure spring water owned by the company, which not only answers for all camp purposes but comes dashing down a canyon, affording cheap water power sufficient to run several mills placed at intervals along its route. Growing on the property are 3,000,000 feet of splendid timber, some of the trees being four feet through, and a sawmill on the ground furnished lumber for the sight necessary houses and for mine timbers. Where this invaluable stream of water spreads out in a fertile valley below the mine the company owns 620 acros of beautiful agricultural lands, which furnish hundreds of tons of native hay for the gineer for these properties, and Fred company owns 620 acres of beautiful agricultural lands, which furnish hundreds of tons of native hay for the camp horses. Fuel wood from the adjacent hills is delivered in camp at \$2.50 a cord. These, briefly, are the physical attractions of the Revenue property, but even more important still is the able, conservative management and board of directors which control the policy of the company. Among the principal owners are lead-ised extensive campaign of develop-Among the principal owners are leading state officials and some of the most conservative bankers in Utah, and other prominent men. and other prominent men. Opinious of Two Engineers.

Two prominent engineers and geologists have made elaborate reports on the Revenue, both of whom unhesitatingly recommend it as a splendid proposition from a mining point of view. In conclusion, Charles C. Jones of Los Angeles says in his report: "I have no hesitancy in recommending his property, provided sufficient capital is secured to carry on the work to a successful and producing stage. The ore is of a character to be cheaply mined and concentrated; water is plentiful, climatic conditions are of the best, and above all the voins, strong, persistent and mineralized, should extend to the greatest workable depths and with increased mineral contents at and below the permanent water level."

plets and thorough rejuvenation of the entire camp. What is now a sleepy little town of a few hundred, should it town of the hundred, should it town of a few hundred, should it each month it town of a few hundred, should it each month it was producing hundreds and existing the attention of some of the biggest oil men in the tween 1,000 and 2,000 prosperous people.

Right now the Nevada-Utah is shipping on an average of one car a day from its Day mine in Jack Rabbit district. This force will be greatly augmented and the output largely intended to the greatest workable depths and with increased mineral contents at a splendid proposition from a large scale in a short time.

The oil produced by the Spring valley wells is of an unusually high grade. It is attracting the attention of some of the biggest oil men in the tween I,000 and 2,000 prosperous people.

The oil produced by the Spring valley wells is of an unusually high grade. It is attracting the state to make the oil produced by the spring valley wells is of an unusually high grade. It is attracting the stime.

E. W. Clark, mine manager for Senator Clark of Montana, visited the Revenue property, and declared there was more water running down the canyon than was used for Senator Clark's mine and mill at Ophir, where the power generated furnishes all power for mill and mine, for lighting the same, and at one time furnished lighting power for Stockton and Tooele. Installing and operating an electric power plant in such a favorable locality would be at a minimum cost.

NUTES AND PERSONALS at one time furnished lighting power for Stockton and Tooele. Installing and operating an electric power plant in such a favorable locality would be at a minimum cost.

Traction Eagine Expert.

Trobably the only drawback of importance to the property is its location eighteen miles from a railroad, in regard to this feature Charles E. Wyatt of Huntington, W. Va. who recently visited the property, said: The read from Newhouse to Pine Grove is an excellent one for the use of traction engines, with which I am well acquainted, having sold them and handled them for many years. The company has expended about \$10.000 in making the road over the summit with a view to putting on engines. The work has been carefully done under the supervision of L. G. Burton, so that I would estimate that with an additional expenditure of \$500 a traction engine can haul forty-five tons from the mine to Newhouse at a cost of \$1. In this estimate I count freight back from Newhouse as a cost of \$1. In this estimate I count freight back from Newhouse would be included in the cost. I told the men with me that as the road now is, I could take the engine of the cars at Newhouse and the cost. I told the men with me that as the road now is, I could take the engine of the cars at Newhouse and the cost. I told the men with me that as the road now is, I could take the engine of the cars at Newhouse and the cost. I told the men with me that as the road now is, I could take the engine of the cars at Newhouse and the cost. I told the men with me that as the road now is, I could take the engine can haul forty-five tons from the mine to Newhouse would be included in the cost. I told the men with me that as the road now is, I could take the engine of the cars at Newhouse and the cost. I told the men with me that as the road now is, I could take the engine of the cars at Newhouse and the cost. I told the men with me that as the road now is, I could take the engine of the cars at Newhouse and the cost. I told the men with me that as the r cheaply constructed, and no doubt will be in time."

s undoubtedly connected at depth with he mass of intrusive perphyry." One sig tunnel recently started will cut eleven known veins, some at great

Assays vary from a few dollars up

ury. None has been offered until re-centl negotiations were practically completed for placing a block of the treasury to raise a fund to complete the mill and inaugurate an octive cam-paign commensurate with the remark-able resources of the property. ++++++++++++++++++++++ ORES AND BULLION.

Smelter settlements yesterday eported by McCornick & Co.: Ores, \$30,000; bullton, \$120,000. Silver was quoted at 55c; coper, cathodes, 12.625c; lead, \$4.50.

This morning H. C. Parker, chief engineer for these properties, and Fred R. Woolley, local agent for the Nethe work of planning for the prom-ised extensive campaign of develop-leased section 27-1518 and are arment of these great properties will be- ranging for the erection of buildings gin in earnest. It will mean a complete and thorough rejuvenation of the entire camp. What is now a sleepy little town of a few hundred, should the oil produced by the Spring

and with increased mineral contents at and below the permanent water level."

D. P. Rohlfing says: "The rock formations consist of quartzite, shale and limestone, with large porphyry intrusions. There are numerous strong veins and fissures, all thoroughly being a show more or less high-grade silver-lead ores, with good gold values. Hence this property has all the features of a mining proposition of more than ordinary promise. I have no hesitancy in recommending this property as first-class mining ground, and I thoroughly believe that large and valuable ore bodies will be found, and will make the property a success ful enterprise."

The class of a mining ground, and I thoroughly believe that large and valuable ore bodies will be found, and will make the property a success ful enterprise."

The class of the permanent water level."

D. P. Rohlfing says: "The rock formations consist of quartzite, shale and line scape of many developed on the sufficient of man, drill and powder. The ore already blocked out in the Prince is so extensive that engineers hesitate to give the figures over their signatures. These Prince ore bodies will be worked on a large scale, according to report. When large forces are employed on these three separate mines included in the merger, that of itself will be sufficient to make of Pioche one of the liveliest camps in the state of Nevada. And all this is promised in the near future, with the hint that mills and perhaps even a smelter for the copper market. We think the coppers are known to be only awaiting the advent of man, drill and powder. The ore already blocked out in the Prince is sumed. We think the coppers are known to be only awaiting the advent of man, drill and powder. The ore already blocked out in the Prince is sumed. We think the coppers are known to be only awaiting the advent of man, drill and powder. The ore already blocked out in the Prince is sumed. We think the coppers are known to be only awaiting the advent of man, drill and powder. The sumed. We think the coppers are a

the work already done on the Reverence consists of thousands of feet of tunnels, shafts, crosscuts, winzes and open cuts along the outcropping mineralized veins. The work has produced over 4,000 tons of excellent milling ore, besides considerable high grades. In places, nature itself has done mining for the Revenue people, the action of snows, rains, frosts and winds having crumbled up some of the outcropping ledges, and sent many tons of a good grade milling ore down into the canyon not far from the mill which will soon be started up.

In mentioning some of the principal workings, Mr. Jones says: "In the Buckbee 500-foot tunnel a winze shows lead, silver, gold and copper. The Southside 600-foot tunnel is driven on a vein carrying lead, silver and gold. The Tasso 125-foot shaft and 250 feet of drifts are "all in ore-bearing matter, containing nodules of high-grade copper, silver and gold ora." The Cliff claim has a 208-foot vertical shaft and 215 feet of drifts "all in ore." Numer-

The Tasso 125-foot shaft and 250 feet of drifts are "all in ore-bearing matter, containing nodules of high-grade copper, silver and gold ore." The cliff claim has a 208-foot vertical shaft and 215 feet of drifts "all in ore." Numerous other workings are mentioned in the Jones report. He says the "veins vary in thickness from four to ten feet," and are practically vertical and smooth, requiring little timbering. Concentrating tests have proven the success of handling even the low grade mill ores.

"The fissure system is one of the most remarkable I have seen and will go to the deep, and the mineralization is undoubtedly connected at depth with the mass of intrusive porphyry." One

MARYSVALE LEASE GIVES GOOD RESULTS

Assays vary from a few dollars up to hundreds. Some on the Cliff show as high as 58.1 per cent lead, 211.6 ounces silver, and \$29 gold; on the Tasso, as high as 137 ounces silver; on the Buckbee, 59.3 per cent lead, 27.2 cunces after and \$1.60 gold. One on the Cliff shows 765 ounces aliver. An away from the Southside went 55.8 per cent lead, 344 ounces silver and \$41 gold. Another showed 43.5 per cent lead, 136 ounces silver and \$92.20 gold.

The Revenue company is incorporated for 1,000,000 shares at \$1 par. There are 240,000 shares at \$1 par. There are 240,000 shares in the treasury. None has been offered until reasociates in the Roosevelt.

Save Money On your Xmas Books

Deseret Sunday School Union BOOK STORE

44-46 East South Temple

1/2 Block from the monument.

Brigham Young points the way

As a straightforward, out and out business proposition, every business man should have his place equipped with this greatest of all modern lights. It not only presents the best appearance, but produces more light for the money than any other. It is also the best light to be had

REMEMBER, Reflex Gas Light is always white, year in and year out. The lamps last almost a lifetime under ordinary care; in fact, we guarantee to keep our lamps up to full efficiency for just a small charge per month. This protection is worth many times its cost to the consumer. Reflex Light is constantly growing in favor with all classes of business houses, and is giving entire satisfaction. Let us show you what it would cost to light YOUR store, better and cheaper.

UTAH GAS & COKE CO. Phones 4321 61-65 Main St.

We collect money in all parts of the United States, Canada and Mexico. Have we ever collected any money for you? If we haven't, we want to; if we have, there's no use of worrying as the fair treatment given all clients always brings repetition—every time.
