

"BEYOND THE DREAMS OF AVARICE"

\$50 bought 50,000 shares of **GOLDFIELD MINING CO.** in **November, 1903.** It is now worth **\$30,000**

\$100 bought 10,000 shares of **FLORENCE MINING CO.,** of **GOLDFIELD,** in **November, 1903.** It is now worth **\$20,000**

\$175 bought 1,000 shares of **COMBINATION MINING CO.,** of **GOLDFIELD,** in **November, 1903.** It is now worth **\$10,000**

\$50 will buy 500 shares of **GOLDFIELD BLIZZARD MINING CO.** today. **?**
Ten years hence it will be worth **?**

Goldfield's Monster Prospect--- The **BLIZZARD.**

Development of the Blizzard property has only just commenced.

In the opinion of mining and consulting engineers of international fame, the surface indications on the **BLIZZARD** are as good as they were on any of the three sensational properties told of above.

Major W. A. Stanton, at one time consulting engineer on the staff of the late John W. Mackay, at Virginia City, says: "In every detail of formation, the Blizzard's estate is an exact counterpart of the big producers of the district. I consider it equally as great in possibilities as any of the Goldfield properties of first importance were at relatively the same stage of development."

J. F. Mitchell, the noted Colorado mining engineer, recently superintendent of the great Jumbo mine of Goldfield and of the January mine of the Goldfield Mining company, that have produced in two years nearly three millions in bullion, says: "In my examination of the **BLIZZARD'S** surface showings I took samples from every outcropping. All of them gave assay returns in gold, proving conclusively that they are all enriched by the precious metal. Very few, if any, of the great mines of the district presented such pronounced indications of the occurrence of bodies of high-grade ore beneath the surface at relatively the same period of development, nor did I obtain such flattering assay returns from the Jumbo, the January of the Goldfield Mining company, or numerous other properties that are now great mines, from surface ores. In view of these facts, I consider the **BLIZZARD** the equal of any property in the district in prospective worth."

100,000 Shares at 10 Cents--- **NOW.**

The property consists of 150 acres, situate in the eastern section of the great mineral zone of Goldfield. On this zone are situated all the prominent mines of the camp. Full and clear title to the property is vested in the Blizzard Mining company.

Five prominent quartz (gold-bearing) ledges stand out boldly above the surface. They vary in width from twenty to sixty feet. One of them is over 3,000 feet long. On all sides may be seen the most positive indications known to mining of heavy and permanent enrichment of gold. Assays of \$34 per ton in gold have been obtained from surface croppings.

The Blizzard Mining company's capitalization is 1,500,000 shares of the par value of \$1 each; 500,000 of these are owned by the company's treasury. The property has been paid for with the remainder. One hundred thousand shares of the treasury stock are now offered at 10 cents per shares. The money realized from the sale of treasury stock will be used to develop the mine and make of it a producer in quick order.

The directors of the company are: H. W. Knickerbocker, mine owner, Goldfield, Nev.; Hon. George D. Pyne, attorney-at-law, Goldfield, Nev.; Richard Willis, mine owner, Colorado Springs, Colo., and Rhyolite, Nev., and J. Frank Smith, mining engineer, Hinton, W. Va. Depository and reference: John S. Cook & Co., Bankers, Goldfield, Nev.

Reservations should be made at once and remittances in full should accompany. Allotments will be made in the order of receipt of subscriptions.
