

## GREEKS CLAIM TURK REPLUSE

New Leader With Stronger  
Army Likely to Halt  
Kemalists

ATHENS, Sept. 6.—(By The Associated Press)—Fresh attacks by the Turkish nationalists have been repulsed by the Greeks who inflicted severe casualties on the Kemalists, according to an official communique issued Tuesday night. The statement says: "The enemy's offensive toward Akardag met with stubborn resistance from our troops who repulsed fresh attacks. The number of the enemy killed and wounded exceeds 10,000. Our forces retired in order, destroying communications."

"The enemy has not yet occupied Ask-Shehr, although the town has been evacuated five days."

"The massacre and persecution of the Christians continues."

"The general military situation is regarded in official and other circles as continuing to improve and the position of the southern Greek forces at Alashir, 80 miles east of Smyrna, is considered here to be secure."

**NEW GREEK COMMANDER**  
CONSTANTINOPLE, Sept. 6.—(By The Associated Press)—While the Turks are hastening to press their advantage over the Greeks in their drive toward Smyrna, the latter are rushing reinforcements to the scene, and, if General Tricoupi can restore the morale of his men, the Kemalists may yet be brought to a standstill, it is believed here.

News of the appointment of General Tricoupi as commander in chief was received with marked enthusiasm. It is officially announced that all the army corps in the southern group have effected a junction.

**FEARS FOR CHRISTIANS**  
LONDON, Sept. 6.—In an interview with the Daily Telegraph Henry Morgenthau, former American ambassador to Turkey, expressed deep concern for the Christian minorities in Asia Minor in view of the present Turkish advance.

"The allies should remove all the refugees from Anatolia to Thrace he declared, 'otherwise the Turks will be merciless with them as they were with the Armenians.'"

He emphatically declared the Kemalists should not be allowed to cross the Straits.

"To put Constantinople again into the hands of the Turks would be the most terrible blunder of the age," he said, and perhaps the Americans should combine to see the city properly policed, and its control by the Turks prevented.

"For the future safety of the world there should be a Balkan federation with Constantinople as its Washington controlled by none of the separate states, but by a Balkan federal government."

**CROWDS OF REFUGEES**  
SMYRNA, Sept. 6.—(By The Associated Press)—It was estimated up to Tuesday night that 150,000 refugees of every nationality had collected here and the American relief committee has published an appeal calling upon everybody to offer them assistance.

The allied consuls here decided to ask the Anglo-French police to keep order. It is reported that allied troops will land tomorrow.

A local committee has begun to enroll volunteers to substitute for the evacuating Greek army. Thousands of officers and soldiers enrolled.

George Bernard Shaw is 66 years old.

## NEWS BRIEFS

### MANY DEATH SENTENCES

MOSCOW, Sept. 6.—(By The Associated Press)—Fifty-five persons have been sentenced to death in south Russia upon conviction of counter-revolutionary activities, the newspaper Pravda announced.

The Ukrainian court at Kiev sentenced 48 members of Petlura's Cossack bands which, in connection with General Tutunuk's forces, arose against the Ukrainian Soviets. All the convicted prisoners appealed.

At Simferopol, Nicolai Borzenko, a young officer, who under an assumed name proclaimed himself the czar of Russia several months ago, was sentenced to death, together with six followers, while Mme. Borzenko and seven others were sentenced to prison.

### WIDOW ENDS LIFE

CHAMONIX, France.—(By The Associated Press)—Mme. Marcel Sembat committed suicide today following the sudden death Tuesday of her husband, the millionaire Socialist deputy and former minister of public works.

### BANK CHECK VOTING

WASHINGTON.—A referendum on the question whether the collection of checks by banks at par should be made a universal practice throughout the country was begun today among 1,400 business organizations connected with the chamber of commerce of the United States. A special committee recommended that the practice be made universal, "from an economic standpoint" without "further legislation," if possible, but "through national legislation" if necessary.

### MONTANA MINES REOPEN

HELENA, Mont.—All Montana coal mines have resumed operation except where the local differences between miners and operators remain to be ironed out, according to George N. Griffin, state mine inspector. More than 4,000 men have returned to work and production will, in Mr. Griffin's opinion, be sufficient to supply the demands in the state. Continuous operation of Montana mines would give a production in excess of 5,000,000 tons a year, he stated.

### OFFICES RAIDED

LOS ANGELES.—Los Angeles offices of the Russian-American Industrial corporation, said to have headquarters at Union square, New York, were raided Tuesday night by agents of the district attorney's office and an announcement was made by officials of the state corporation commission that complaints charging the sale of stocks without a permit would be issued today. All stocks were confiscated. The corporation's local offices were the same as those of the Amalgamated Clothing Workers of America, the officers stated. Sidney Hillman of New York is said to be the national head of both organizations.

### ATTORNEY'S WITHDRAW

LOS ANGELES.—A local firm of attorneys has served notice of withdrawal from the defense of Mrs. Clara Phillips, indicted for the so-called "hammer murder" of Miss Alberta Meadows. No reason was given for the lawyers' action. Representatives of the public defender's office recently conferred with Mrs. Phillips.

### ALIENS WORST OFFENDERS

SAN FRANCISCO.—Prohibition Director S. F. Rutter has started a system of classifying the citizenship of all persons arrested for violation of the prohibition law. The majority of the bootleggers, he said, appear to be persons of alien birth.

### GREAT WIRELESS CHAIN

PAGE, Tahiti.—(Correspondence of The Associated Press)—It is reported that the French government is about to erect in Tahiti a new wireless station which is to be a link in the proposed round-the-world system of communication between France and her colonial possessions. The stations in this system probably will be one of the French India Islands, Tahiti, New Caledonia, Indo-China, Madagascar, Senegal and Morocco. The Tahiti station, it is reported, will cost about eight million francs.

## ARMY AVIATOR REACHES COAST

Flies From Atlantic to  
Pacific in Less Than  
24 Hours

SAN DIEGO, Calif., Sept. 6.—Having eaten today his first breakfast since starting his dash from the Atlantic coast to the Pacific coast, Lieutenant James H. Doolittle, army aviator who late Tuesday completed his flight here from Jacksonville, Fla., in record time, was busy with plans for his next flying task. He has been instructed to report for duty at McCook field, Dayton, Ohio, and planned to fly there, starting Friday in the specially constructed Haviland plane which brought him here safely from the Atlantic coast well within 24 hours.

### REPORTER AT TUB

Doolittle showed much enthusiasm when he landed here just before dusk Tuesday. The most apparent feature on his arrival and his landing, perfectly accomplished after a grind of more than 21 hours in the air, was a wholesome boyish grin. That grin lasted until he "submitted" to an interview, which was obtained while he was taking a warm bath. The reporter sat on the edge of the bathtub and put the questions between splashes of water as Doolittle refreshed himself after his long trip.

During the rest of his stay, of running into a storm, how he scudded west, how glad he was to see two fellow aviators meet him at Imperial valley, Calif., and the landing.

Lieutenant Doolittle made an average of about 101 miles an hour. When he reached Imperial Valley and saw the two pacemakers from Rockwell field—Captain William Randolph and Lieutenant C. L. Webster—waiting to accompany him on the last lap, he "opened up wide" his liberty motors and came at a speed at 115 miles an hour.

### GREAT POSSIBILITIES

SAN ANTONIO, Texas, Sept. 6.—The record airplane flight completed Tuesday from the Atlantic to the Pacific coast by Lieutenant James H. Doolittle of Kelly field, will be a stimulant to rapid development of aeronautics in the United States, according to Lieutenant Colonel C. C. Culver, air officer of the Eighth corps area. This epochal flight in which Doolittle spanned the continent with one stop being made has a two-fold asset in aviation, Colonel Culver believes. First, it demonstrated the feasibility of moving an air fleet quickly from one coast to another in time of national emergency. Second it reveals the possibilities of commercial flying

### WAY TO STOP ENGINE KNOCKS

Gasoline Symphony Heard  
By Scientists in  
Convention

PITTSBURGH, Pa., Sept. 6.—Sea-weed kept, automobile engines, and just plain milk were the widely different subjects discussed at the opening day of the American Chemical society convention now being held here.

On the platform before the delegates, where usually symphony orchestras perform, a motor engine afflicted with "knocking" played the chief overture of the day, while chemists listened as intently as opera lovers do to "Carmen" to the effect of the introduction of a chemical compound, invented by Thomas Midgley, Jr., and T. A. Boyd, of Dayton, on the "knocking" discords.

"Chemicals whose action is similar to those known as 'catalysts,' even if present only in the most minute quantities," said Mr. Boyd, "can eliminate to a great degree the knocking which is most injurious to engines." The gasoline symphony played on cylinders was to prove his contention.

Sea-weed kept, which contains iodine and other elements common in seawater and believed to be beneficial in preventing goitre, was explained to be a necessary part of the diet of those who live so far inland as to be deprived of the sea food in quantities.

J. W. Turentine, whose activities resulted in the establishment of the kelp industry on the Pacific coast, introduced the sea-weed kelp in its new role to the chemists. "The new form," he said, "admits of cheap preparation and preservation, and is easily available for the afflicted people of all countries."

Housewives' uncertainty as to the youth of age of the contents of the bottle found with the newspaper on the porch each morning is the reason for the prominent part of milk in today's meeting. "Methylene blue, a dye in cleaver and more sure than the nose in detecting the age of milk," said Minnie F. Dressler, who demonstrated the action of the dye in discoloring old milk and remaining perfectly clear in new. Seven other dyes may be used with equal success, the scientists said.

### LIKE CLOUDS ACROSS A SUMMER SKY

foretelling the dreaded storm are the symptoms of women's diseases which point the way to physical and mental breakdown. The nervous irritability, the backache, the dragging pains, are not only hard to endure, but they bring certain knowledge of collapse unless something is done to relieve the sufferer. There is one standard remedy which has shown the way out for nearly fifty years. The women who have "come back" through the use of Lydia E. Pinkham's Vegetable Compound present an argument stronger than words could ever be. Advertisers.

### Scarlet Posters Give Warning of Social Diseases

CHICAGO, Sept. 6.—Flaming scarlet placards were pasted on the doors of two private homes Tuesday by Herman N. Bundesen, health commissioner, after two young men who resided in them had fled from the county hospital, where they had been confined for the treatment of social diseases.

The move came as part of Dr. Bundesen's campaign to enforce a single

### SUIT CAUSED BY DECIMAL POINT

ST. PAUL, Minn., Sept. 6.—Misplacing of a decimal point caused 2 suit in district court here today in which the Commerce Trust company of Kansas City, Mo., is seeking to collect \$2,569.05 alleged due from the MacDougal Advertising company, with offices here, Minneapolis, Kansas City and Omaha.

On April 21, 1921, it is alleged the bookkeeper for the firm in Kansas City banked \$25.95, which was erroneously credited as \$2,595. When the error was discovered with the receipt of the monthly statement, May 1, several letters passed between the bank and the advertising firm in which T. A. MacDougal, head of the firm, suggested taking care of the debt by giving a series of notes. It is alleged the advertising firm had drawn checks against the account.

The matter came before District Judge G. M. Orr on a motion of attorney for the bank to strike out the answer of the advertising firm in which a general denial of the debt was entered, on the ground that it was a sham and frivolous. The motion was granted.

The Kansas City bank has attached the account of the advertising firm if a St. Louis bank.

### GIRL SLAYER FREE ON BOND

KANSAS CITY, Mo., Sept. 6.—Marie (Peggy) Beal, scion of an old Philadelphia family, who shot and killed Frank Warren Anderson, local department store floorman, on June 3, in a hotel here, then attempted to take her own life, is free on bond.

Miss Beal appeared for arraignment on a charge of second degree murder in justice court Tuesday, and was released on \$500 bond, signed by her attorney, George Birmingham. Her preliminary trial was set for September 16.

"Peggy Beal is alone, friendless and without a cent in the world," Birmingham told the court. "But she wants to tell her story. Peggy Beal would rather destroy herself—will destroy herself, in fact—if she cannot be vindicated in the eyes of the public."

Miss Beal, whose case proved a sensation on June 3, when after she claims her "perfect lover" had confessed he did not intend to marry her after promising through the year of their acquaintance to do so, was released from a local hospital Monday. She had been in the institution three months, recovering from a bullet wound in her lung, made by a shot fired by her own hand. She was arrested immediately upon her discharge from the hospital.

Middle names were once illegal in England.
