

Remedies are Needed

Were we perfect, which we are not, medicines would not often be needed. But since our systems have become weakened, impaired and broken down through indiscretions which have gone on from the early ages, through countless generations, remedies are needed to aid Nature in correcting our inherited and otherwise acquired weaknesses. To reach the seat of stomach weakness and consequent digestive troubles, there is nothing so good as Dr. Pierce's Golden Medical Discovery, a glyceric compound, extracted from native medicinal roots—sold for over forty years with great satisfaction to all users. For Weak Stomach, Biliousness, Liver Complaint, Pain in the Stomach after eating, Heartburn, Bad Breath, Belching of food, Chronic Diarrhea and other intestinal Derangements, the "Discovery" is a time-proven and most efficient remedy.

The genuine has on its outside wrapper the Signature

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic, medicine of known composition, not even though the urgent dealer may thereby make a little bigger profit.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

Dr. Pierce's Pleasant Pellets

ARMY IN STATE OF REBELLION

Bogota, Colombia, July 7.—A portion of the army stationed at Barranquilla took up arms on Sunday last against the Colombian government, made prisoners of the municipal authorities and proclaimed General George Holguin, who is acting president in the absence of General Reyes, was strongly denounced and the general was driven out of the city, later arriving at Cartagena. The revolutionists took possession of the town and several steamers on the Magdalena river.

General Holguin has declared martial law throughout the country. General Valencia has disavowed the rising and is coming to Bogota with the acquiescence of the government. Valencia issued a manifesto expressing his disapproval of the revolutionary movement, as did also the republican committee.

According to a dispatch here, the disturbed conditions are confined at Barranquilla. Officials of the government say that the rest of the country is at peace, and that the people desire peace in order that congress may meet on July 20 and settle many important questions which are pending. General Perdomo will leave Honda tomorrow with six steamers, having on board 6,000 men and twenty pieces of artillery. The objective point of the troops is Barranquilla.

The Amer's Grim Humor.

Although in every way milder than his father, Habib Ullah occasionally manifests a humor less grim, as was lately disclosed by his chief body servant, Ahmed Rasbid. This worthy, whose duty it is to take care of the royal wardrobe, was becoming neglectful, when one morning Habib Ullah noticed a black scorpion, whose sting is unusually agonizing, in a boot that he had been about to put on. Summoning Ahmed to his side, the Amer complained that the boot pinched his foot, and ordered the servant to stretch it by drawing it on his foot. The pain of the bite was not the more readily forgotten from the fact that nothing of much consequence could be done to relieve it.

Savage Eagle Hawk.

Perhaps the deadliest foe of the Australian sheep farmer is the eagle hawk, and many and wonderful are the contrivances invented for its destruction or capture. A correspondent at Singleton says it is no uncommon thing for a farmer with a run of quite average extent to lose 100 sheep in a season through the depredation of these carnivorous birds. "Their strength," he writes, "is so abnormal that it is practically impossible for the sheep on which one pounces to resist the attack, and their appetite for live mutton appears to be insatiable. They are occasionally caught by means of a trap attached to the carcass of a sheep, and sometimes poisoned; but their numbers are nevertheless continually increasing."

The Appreciation of Music.

If we would appreciate music aright, we must remember that its beauty depends, not upon the composer alone, but upon ourselves also. Deep calls upon deep; and the harmony of sound, though appealing primarily to the outward ear, must be answered by a harmony from within ourselves. The more culture we bring to the hearing of music, the wider our sympathy, the more exquisite will be the echoes which it awakens in the soul. If we would understand the composer's message, we must co-operate with him. We must reach out to him with all our faculties. If we do that, the revelation of music will ceaselessly renew its beauty, ever turning unimagined aspects to gladden us.—Redfern Mason, in Atlantic.

EDUCATORS THROW HOT SHOTS AT N.E.A.

Denver, July 7.—"National suicide lies in the direction of belittling the teachers."

"If the future is to be satisfying as a nation, the teacher must be regarded as a leader and not a teacher of letters."

"Starve the colleges, starve the people."

This advice from James W. Robertson, president of Macdonald college, St. Anne de Bellevue, Que. And also "What is the use—"

"The rural teacher who has not even the A. B. C's of education is called a 'professor' and so is the corn doctor, the dog trainer and clown."

"It doesn't make any difference whether it's a college or university or a normal school, it is what is taught that does the business."

This last from Henry G. Williams, dean of the State Normal school at Athens, Ohio.

These were some of the hot shots thrown at the members of the national educational association today by two leaders in the work. Mr. Robertson strove to tell the educators what they are thought of in Canada. Mr. Williams told what he thought of the fine line drawn by some educators between the university and the normal school as a place to make teachers.

Mr. Robertson spoke this afternoon before a general session of the association in the Auditorium. He said in effect that the agricultural schools must be more closely allied with the rural schools in general to bring about the desired end of keeping the boys on the farm.

Mr. Williams became enthusiastic when he spoke of the normal school as a place for training teachers, and the outcome of his address was the declaration that the name doesn't make the school a place for the training of teachers any more than the term "Professor" makes an educator.

He summed up his argument in the second finding of the report of the committee on normal schools, which holds that "the normal schools prepare teachers for the entire public service—elementary and secondary."

Allegations of allegiance to the "book trust" cropped out this afternoon in the campaign for president of the association, when it became known that J. Y. Joyner, superintendent of the South Carolina schools, would be a candidate. Some of Dr. Joyner's friends announced that their fight would be against the book trust.

The failure of the project to place E. Brown, United States commissioner of education, in the presidency, is said to be due to the "book trouble." Mr. Brown declines the honor rather than become identified in a fight with the so-called "octopus."

The election of officers will take place tomorrow at noon.

Women of the Future.

Mrs. Annie Nathan Meyer in one of the February magazines says that women, like negroes, proud of their emancipation, have been trying to do the things that men do, rushing into already overcrowded professions. In order to be indifferent professions. She thinks it is now time to stop, and that women and negroes should stick to the things they did in the past. She wants to know why pounding a typewriter should be considered more intellectual work than beating an omelet. As women adjust themselves to the new conditions the despised home will take on a new dignity.

The Japanese Baby.

The first name is given to him with great ceremony when he is a month old; at 15 he is considered grown up, assumes the responsibility of a man and takes a new name. Entering upon public duties he takes another name, which is changed with every step in life; if his superior officer has the same name he happens to have at that time he must change it again; and when he dies it is changed for the last time and inscribed upon his tomb.—Home Notes.

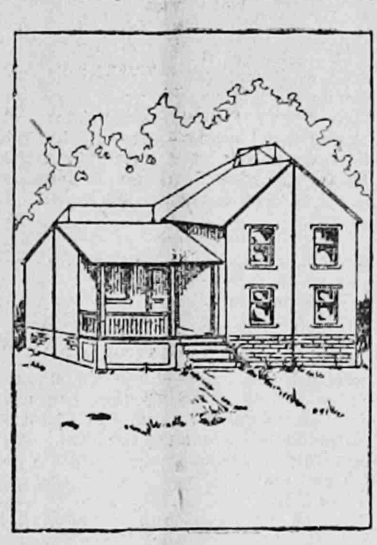

How Lapp Collects Reindeer.

In April, the Lapp lets his reindeer loose to wander as they please, and when the mosquitoes begin to abound (about midsummer) collects his herd simply by catching one deer, fitting it with a bell and trusting to instinct (which leads the animals to gather into herds for protection against the mosquitoes) to do the rest. In a cool summer, when mosquitoes are few, this instinct does not come into play, and it is almost impossible to bring the reindeer together.

LIGHTNING LOSES TERRORS

New Type of Conductor Completely Covers House.

Ajax is outdone by the lightning conductor invented by a New York man, and once more mythology has been put to the blush by twentieth century science. This new conductor is a lightning rod and may be said to insure absolute safety from the bolts from the sky.

REACHES FROM EARTH TO EARTH

The apparatus consists of a system of lightning conductors that extend in the form of loops from the earth over the building and are free from points and sharp angles. Insulating devices keep the conductors free from all parts of the roof of the building and are adjustable to fit different pitches of roof and to keep the conductors free from the poles and angles. The illustration shows the conductors strung over the ridge poles of a house and practically enveloping it so that lightning striking at any part will be passed along the wires into the ground on any side. By this system every angle of a building is equally protected.

SCIENCE NOTES

Persons awakening in the night are invariably curious about the time, and the newest hotel convenience has for its object the gratification of this universal desire. A small telephone receiver is placed at the head of the bed and if desired may be placed under the pillow, the connection being made with a master clock in the office of the hotel. Placing this instrument to the ear and touching a button results in setting into operation a set of bells which chimed the hour, the quarter hour and the minutes past the quarter.

On the sheep ranches of Australia it is found impracticable to perform the shearing when there is any great amount of water in the wool, and various means are made use of for the purpose of determining the amount of water in the wool before commencing work. In this connection a new method has been recently devised which consists of a novel use of the properties of calcium carbide. The carbide is placed in a container, mixed thoroughly with an excess of calcium carbide in a suitable apparatus. The acetylene produced by the reaction of the carbide with the water in the wool is determined by measuring its volume at constant pressure, or its pressure at constant volume, by means of a scale so graduated that it keeps unchanged the proportion of water in the wool.

The warships of the German Navy will no longer be fitted with the usual compasses, but instead will be fitted with the gyroscopic compass, which was invented by Dr. Heimphe, which in practice has shown a greater degree of accuracy. During a nine-month cruise of the battleship Deutschland the magnetic compass although left entirely alone, maintained its true direction for a month. The device consists of a nine-pound wheel mounted with the usual compass card in a holder of quicksilver. An electric motor rotates the wheel at 21,000 turns a minute. After it has run for two hours, the instrument is set in the direction of the mathematical meridian, which position it keeps unchanged, being unaffected by neighboring iron and steel, and unresponsive to vibration and rolling.

Aluminum-coated steel sheets are the product of a Pennsylvania company and they have been adopted by the United States government for use in the construction of vessels. The coating is applied at a very high temperature when the metal has great ductility and the sheet of metal is not only rendered rustproof, but also much more durable. The coating applied hot makes a very serviceable covering which withstands all kinds of hard usage without fracturing, as it has penetrated into the surface of the steel.

The United States Engineering Corps has reported favorably on a project to connect and make Seattle a seaport by the construction of a canal to the Puget Sound by way of Salmon Bay. The scheme consists of a canal connection between Puget Sound and the Strait of Juan de Fuca, by lowering the water of the latter body, and also of the creation of a channel through Salmon Bay. The only lock necessary will be at the entrance of Salmon Bay. The cost of the project is estimated at three and a half million dollars.

A. Y. P. EXPOSITION RATES.—Via Oregon Short Line R. R. \$37.50 from Ogden to Seattle and return; on sale July 1st commencing June 1st. Ask agents for further particulars.

Poorly Paid for Great Work. Oliver Goldsmith was an underpaid man from start to finish. Fifty pounds (\$250) for "The Vicar of Wakefield" was bad enough, yet for "The Traveller" he got but £20 (\$100) and £5 (\$25) for his "English Grammar." For "The Deserted Village," however, his publisher sent him 100 guineas (\$500).

He at once returned, with the message: "It is too much, it is near five shillings a couplet, which is more than any bookkeeper can afford or, indeed, any modern poetry is worth." He died with \$10,000 worth of debts. "Was ever poet so trusted before?" said Dr. Johnson.

Football in Olden Times. What would be thought today of a game of football in which 500 or 600 players were engaged on each side, and how would we like to be in the thick of it when teams of this number were rushing after the ball? When we remember also that few rules governed the play, and that, moreover, a proportion of the players were horsemen, the events that marked the progress of the game must have been of sufficiently stirring a character to satisfy the most greedy seeker after excitement.

Husband Owns Wife's Dresses. The question of who owns the dresses of a wife came up in the Brompton county court of Maryland recently and the judge decided that the husband is the owner. The man held that he had given the wife the money to buy the dresses in dispute, and although they were not paid for, it was decided that they belonged to him.

WINDOW REFRIGERATOR

Wire Box Keeps Food Fresh and Safe in Open Air.

Dwellers in apartment and lodging houses will find the window refrigerator designed by a New York man, one of the most useful articles they can invest in. Fruit, vegetables and other articles of food may be kept in it safe from the depredations of flies and other insects and it is a place where they will remain fresh much longer than indoors. The refrigerator consists of an oblong box as long as the width of a window, with supports

HANDY FOR APARTMENTS.

at each end and rods running up to the side of the window to further strengthen its position. The box is made of wire gauze with a solid lid, thus permitting a free current of air through it, yet protecting the contents from flying and creeping marauders. Where space is at a premium the advantages of this device are readily apparent. Aside from this the window box will be found to be a great saver of ice, as the necessity for that commodity will be materially reduced.

EXCURSIONS EAST VIA RIO GRANDE. Tickets on sale July 20, 2nd, 23rd and 24th. Call up A. J. Cronin, Agt., phones 104 and 115.

FORMER MEMBER OF GRANT STAFF IS PARALYZED.

Trinidad, Colo., July 7.—William Hudson, aged sixty-five, personal aide on the staff of General United States Grant during the Civil war, is confined to the San Rafael hospital here with the entire lower portion of his body paralyzed. While walking the business street of Trinidad Monday evening, during the Fourth of July celebration, Hudson suddenly collapsed. He was taken to the hospital, where his identity was discovered. For twenty-seven years Hudson has lived a hermit's life on a lonely ranch in Colorado canon.

WILBUR WRIGHT RETURNS.—BROTHERS OPTIMISTIC

Washington, July 7.—Wilbur Wright returned today from New York, where he went to consult the manufacturers of the magnet, which has been the cause of much trouble to the Wrights. Orville has also arrived from Dayton, bringing with him the cloth for repairing the San Rafael hospital here with the entire lower portion of his body paralyzed. While walking the business street of Trinidad Monday evening, during the Fourth of July celebration, Hudson suddenly collapsed. He was taken to the hospital, where his identity was discovered. For twenty-seven years Hudson has lived a hermit's life on a lonely ranch in Colorado canon.

BOY EXONERATED FOR KILLING HIS FATHER.

Ridgeway, Colo., July 7.—Roy Mooney, aged fourteen years, who yesterday shot and killed his father, was exonerated by the coroner's jury. The boy declared the belief that his father was about to murder his mother prompted the act. He stated that his father was standing near his mother with an open razor in his hand and this, together with the knowledge that his father had previously threatened her life, caused him to shoot. The mother corroborated the boy's story.

CROWDS OF ENDEAVORERS ARRIVE AT ST. PAUL.

St. Paul, July 7.—Preliminary to the twenty-fourth biennial international Christian Endeavor convention, the annual meeting of the United States society of that body was held here today. The first general meeting of the convention will occur tonight, when President Clark will formally call the delegates to order. All day crowds of Endeavorers have been arriving.

English Money Coined in Canada.

English gold sovereigns were coined on the North American continent for the first time in 1908, when a limited number of these pieces were struck at the newly opened Canadian mint at Ottawa. Permission to strike these coins, it is said, was given by the British authorities as a special privilege to mark the beginning of operations and extended only up to December 31, 1908, after which the mint was to confine itself to making silver and bronze coins.

Hearty Laugh Caused Distress.

Dislocating her neck by immoderate laughter at a joke told by a guest at Pittsburgh, Pa., Mrs. William Giesey suffered intense agony until the arrival of a surgeon, who reduced the dislocation. After Mrs. Giesey had begun to laugh, she became hysterical and was unable to stop. Suddenly she felt a sharp pain in her neck and her face became livid. Then the surgeon was summoned.

Statesman's Complaint.

England's house of commons wants ventilation. Plenty of air is pumped into the chamber, and it comes through the gratings on the floor, but if comes from a spot just over the bank of the Thames river, with its ill-favored barges and the other overhanging a member met a colleague with his handkerchief to his nose. "You never know what will pass inside," he spluttered, "but you always know what's passing outside."

The Last Straw.

"I am entirely friendless," remarked the man of gloom. "Why, do you know, today I bowed to the inevitable, and—it cut me!"

Occupying.

Dressing dolls has become the serious business of a great many people, but especially of American men.—Fuck.

In these wash suits we've turned our back on "all wool" but fast colors are still one of our winning points and it pays in the long run.

Sailor suits, Russian blouse suits of duck, linen, crash and galatea, in plain and fancy effects.

One-half the regular price.

BRANDENBURG'S COUNSEL ASK THAT CASE BE DROPPED

New York, July 7.—Counsel for Broughton Brandenburg, the magazine writer, who is held in St. Louis pending trial on charges of enticing away his stepson, James Shepley Cabanne III, wrote today to S. G. Jones, the St. Louis attorney in charge of the prosecution, asking that the charge be dropped. Mr. Jones had written to Brandenburg's counsel, saying that the case would not be tried until September.

Brandenburg's lawyers argue that it would be an undue hardship and cruelty to confine their client all this time, since he is in poor health and unable to obtain bail.

CHILDREN ON WRECKED VESSEL SWIM TO SAFETY

Honolulu, July 7.—Details of the accident to the power schooner Ralahou off Pukoo harbor, Island of Molokai, on Sunday afternoon have been received here. Forty-two Sunday school children, who were enjoying an excursion, were thrown into the water, a quarter of a mile from the shore by the overturning of the vessel. Their ages range from 10 years upward, and practically all were good swimmers. Some of the 10-year-olds swam out in the open sea, where they found some boards on which they floated in the Hawaiian manner.

The only death was that of an aged Hawaiian woman from exhaustion. The schooner is a total loss.

Jewelers and Opticians.

WIFE OF COMPOSER SENT TO PRISON FOR FIVE MONTHS

Rome, July 7.—Signora Puccini, wife of Giacomo Puccini, the composer, was sentenced to five months' imprisonment and a fine of \$120, in addition to costs and damages, the latter to be fixed by a separate court. Some months ago Signora Puccini accused her husband and a maid in her employ of having improper relations. The girl protested her innocence and subsequently committed suicide. An autopsy proved that the charges were baseless. The accusations of the wife, however, resulted in a separation, and quickly after this the mother of the girl instituted suit against Signora Puccini.

WABASH RAILROAD MUST PAY OR LOSE TERMINALS

Cincinnati, July 7.—By a decision in the United States court of appeals today the Wabash Railroad company will be compelled to pay over three quarters of a million dollars, the amount of interest compounded, and the principal of \$150,000 for bonds sold James Compton of Toledo, O., over a third of a century ago, or suffer its Toledo terminals to be sold to satisfy the lien.

A Remarkable Race.

The Lapps are very fond of stimulating drinks; they think nothing of drinking fifteen or twenty cups of coffee a day, while their consumption of punch is on a vast scale. It is no uncommon thing to see numbers of helplessly drunk natives in the streets of Tromso, especially when the sale of reindeer flesh has been profitable. Yet robbery and, indeed, crime in general are practically unknown among them; the innate honesty of the people is quite extraordinary.—Wide Awake Magazine.

Loosening Cakes from the Pans.

After baking a cake and if it sticks to the pan the easiest way to take it out without breaking it is to wet a cloth and wrap it around the pan. It will come out altogether.

Women of Ogden

We have embraced the corset question in our advertising remarks. We have not said the last word yet. When you talk to women they usually have the last word to say:

"Know ye not that your body is a temple?" etc.

Guard it well, lest some stray arm should get "dislocated" or "out of place" in the region.

The right kind of protection is the Justrite G D Corsets, price \$1.00 to \$5.00 each. We fit them in the department. It's up to you to say the last word. We trust it will be yes.

Justrite CORSETS

wear longer and retain their shape better because made of materials the best possible at the price.

Their lasting satisfaction is an economy.
