Call Allen, phones 22, for carriages for funerals and opera. Private calls a specialty. Also prompt delivery of baggage. 412 25th.

Get your Union Pacific and Oregon Short Line tickets at the office in the Opera House Block. Don't force your self to stand in line at the Depot.

Recruiting Office—According to the statements of Sergeant J. D. Egan, who has charge of the local recruiting office, Ogden leads them all in the percentage of men accepted for service in the Marine corps. During the month of June, twenty-four Ogden men were accepted by Dr. McCune out of 146 applicants. It is said that this is the best percentage yet reported from any recruiting office in the United States.

For Sale—Old mats. Good to put under carpets. Inquire Standard office.

Advertisers must have their copy for the Evening Standard the evening before the day on which the advertisement is to appear, in order to insure publication.

WANTED—Clean white rags at the Standard.

MRS. CLIFFORD LAID TO REST

The funeral of Mrs. Leora Clifford, wife of Frank Clifford, was held at 2 o'clock yesterday afternoon at the North Ogden meeting house, Bishop's Counselor Charles Storey officiating. The speakers were Mr. N. Reynolds, Charles Storey, John W. Gibson, Newman H. Barker and Bishop James Ward, all of whom spoke highly of the deceased and the love and esteem in which she was held by all who knew her.

The music was furnished by the ward choir, assisted by Miss Maud Ellis, who sang a solo, "After the Trials."

There was a large attendance at the funeral and many beautiful floral offerings. Interment was in North Ogden cemetery.

The funeral of Mrs. Ann Richards, late of North Ogden, will be held at 2 o'clock today at the North Ogden meeting house. Interment will be in North Ogden cemetery.

PEERY'S
CRESCENT
FLOUR
IS MADE OF
HAPPINESS!

SPORTS

(Continued from Page Two.)

Science has never measured the energy expended in a wrestling match and compared it with the energy set forth in a fight. But this truth we do know: The grappler, during the course of his bout, uses pretty nearly every muscle in his body. What he does not display in velocity (as noted in a blow), he makes up for in leverage. The blow lands, and ceases to be. The holds applied in wrestling are relentless until they are broken or put the other man on his shoulders. Does it actually take more endurance to withstand a succession of blows (few of which are squarely landed) than it does to hold out against the leverage of powerful body, legs and arms indefinitely applied?

Perhaps, in the matter of long training, the fighters are obliged to overcome their assaults on nature itself; the bad usage of high living, of infrequent fighting, and of neglect of the muscular organism. Maybe if fighters fought more they would keep in better condition. And again—maybe the impact of blows is more disastrous to the system than the leverage of the mat.

James J. Jeffries was out of the game for about six years. During that time he may have done more or less hard work, but that did not lend much value to his muscles. We can understand why, in this instance, Jeffries' training had to be so rigorous. He fought many battles during that time. However, he trains just as hard as Jeffries.

And these men will meet. Irrespective of what the outcome will be, they will utilize every iota of force, speed, generalship and gameness that has been cultivated during this training period. Neither would think of taking on a hard battle inside of six months.

But the wrestler goes from one battle of longer duration into another; not six months after; not three months after; but two or three days later.

Men wrestled ages before they fought with their fists. Personal encounters invariably result in grappling. Wrestling, a primal, fighting was cultivated. Wrestling calls on the fundamental in man; fighting calls forth a new art—an art scarcely more than a century old, as we see it today. Away down in the wilds of Africa, in the days when Stanley was exploring the continent, black men held wrestling matches following Graeco-Roman rules to the letter. They got it from a time when Ethiopia was important in the world's affairs. They did not learn fighting. Long before fighting was classed as a game of physical competition, men fought with swords. The gladiators of Rome had come and gone centuries before boxing gloves were invented; centuries even before men fought according to rules with bare fists.

The fight is more popular, because it is more spectacular. Velocity shows up better than mere basic force. People prefer to see horses run and automobiles race than watch the laborious efforts of the steam shovel, and still the shovel does more work; requires more energy by far.

We who have to puff loudly and snort betimes in sprinting to connect with the oncoming train car, feel our vast inferiority as compared with these examples of skilled brute force. We fancy that we, too, ought to be able to enter the ring or step onto the mat and give an account of ourselves.

After all, what we admire is not the ability to twist or to punch. It is the possession of rare good health. It is the coupling and fighting remains as reminders from the days that were; sort of mileposts that tell us that the best thing in life is health—because health usually implies happiness, and "feeling good" is better than the possession of vast riches.

Inherently, we know this to be true. Outwardly, we talk of the objective evidence of it. Admiring the physical contest, therefore, is not a sign we are reverting to the brute. It is not an indication of retrogression. To the contrary, it is the age-old story of "the perfect temple." What we display today in a liking for fights and wrestling matches, was displayed in India prior to the birth of Buddhism. Physical perfection preceded the quest for the "Nirvana."

All of which, respectfully dedicated to the old ladies and sky pilots who prevailed upon Governor Gillett.

THE BIG SHEEP SHOW

The BIGGEST, GRANDEST and BEST Sheep Show ever, was the one held in connection with the National Wool Growers convention at Ogden last January. So puffed up by the people of Ogden over their success in this, their first effort, that they have secured the "International Sheep Show and Auction Sale," the first to be given this fall in connection with the Four-State Fair.

Advance information indicates that the big Sheep Show held last winter will not be a marker to the one to be held this fall. Remember, Ogden, September 22nd to 29th, 1910. Reduced rates on all railroads.

PREVENT SPREAD OF PRAIRIE FIRE

W. B. Wedell, with his brother at Willard, essayed the role of fire-fighters Saturday afternoon with a success that reflects much credit on their energy and resourcefulness. A disastrous prairie fire swept over the foothills between Willard and the Utah Hot Springs, and but for the activity of the men the farms in that vicinity would have been seriously threatened with total destruction.

On discovering the fire as it spread toward the south, under a strong breeze, Mr. Wedell and his brother, who own property in that district, realized the danger in a moment and set about checking its course by "back firing" along an old water course.

By keeping in check their own fire they burned a strip a mile in length to the intersection of an irrigation ditch from Person's canyon. On reaching this burned area the fire was effectively checked and several thousand dollars' worth of farm prop-

erty, unthreshed grain and stacked hay was relieved from danger.

The Wedells lost some \$4,000 by a similar fire five years ago in the same neighborhood and since that time they have maintained a close watch for prairie fires and have familiarized themselves with the trails and water courses in the district which would prove most helpful in fighting an extensive fire.

NOTICE

Bids will be received to be opened August 20th, 1910, at 2 o'clock p. m., at the office of the undersigned, Board of Trade building, Salt Lake City, Utah, for the furnishing of 800,000 pounds first quality oats, and 800 tons straight timothy hay, delivery to be made at regular intervals during period of one year from award of contract. In submitting bids on above material state price f. o. b. Salt Lake City, giving full particulars as to quality of materials to be furnished. The undersigned reserves the right to reject any or all bids.

P. J. MORAN,

Box 783, Salt Lake City, Utah.

CHARLIE I. COMING HERE

Chimpanzee Circus Performer the Greatest Freak in World's History.

The greatest bicycle rider and acrobat in the world is coming here. His name is Charlie I. and he is easily the star of the first and best of the Barnum and Bailey Greatest Show on Earth. He seems to have all the divine gifts of man—of course, excepting the power of speech. Darwin said there was a missing link in the chain that connects man with the lower animals. The scientists of today have asked the First to move up from the foot of his class and take the vacancy.

In 1903 a party of scientists found Charlie the First in the forest that hugs the equator in Africa. He did not run from them, as would be supposed. Instead, he walked confidently up to one of the party and offered him an armful of coconuts. When the scientists pushed on, the animal followed, first one, then he discovered and bringing along with him a crude mattress, woven from bark and moss. Charlie marched with the party for days. Seeing the negro servants carrying water and fuel at meal times, he helped them.

As an experiment the scientists placed the animal in the care of the skipper of a tramp steamer, where he learned with the coaching to wash dishes and keep the deck clean. On his return to London, eight months later, one of the party, a Dr. Buchanan, took the animal with him and there began to prepare him for an exhibit. The animal learned rapidly. He learned more by his desire to imitate than by being urged to his tasks.

The idea of exhibiting Charlie the First with a circus did not occur to the doctor until one day he discovered that the animal could ride a bicycle. Scientists and doctors began to come long distances to see the chimpanzee which had been described as the missing link. Among those to take an interest in the wonderful creature were the King of England, Emperor William and Alfonso of Spain. There was but one opinion—Charlie the First was the missing portion of the Darwinian chain.

The London agent of the Barnum and Bailey Circus induced Dr. Buchanan to bring the animal to America, and it will be seen in Ogden on Wednesday, August 10, as one of the features with the big show. Everything Charlie the First does proves him more human than animal. He has chosen the clothing and the habits of a man, and does with the use of a full table equipment. He sits in a bed and carries a watch. In private life he is amiable and appreciative. He plays on the piano, pitches horseshoes and plays billiards. His keeper is merely the janitor of his little house, for Charlie the First sews on his own buttons and shines his shoes. As a performer he excels them all. He is an accomplished bareback rider, a skilful trapeze artist, a finished high-wire walker, a clever juggler, a splendid acrobat and a funny clown.

On one of the stages he presents a bicycle act he created himself. Mere instinct could not evolve such skill. Anyone who rides a bicycle knows it requires the judgment and reason or human intelligence to learn. Yet this creature is a greater rider than any men ever seen with a circus. Here are the proofs that Charlie the First possesses a divinity of mind far in excess of Nature's intent.

BURIAL OF BABY

WILLIAM VAN LOON

The funeral of William Van Loon, the infant son of Mr. and Mrs. Johan Van Loon, was held at 2 o'clock yesterday afternoon at the family residence, 2750 Monroe avenue, Bishop H. C. Jacobs officiating. Miss Florence Poulter and Miss Mattie Poulter sang two duets, "Abide With Me," and "Count Your Many Blessings." A solo, "Some Sweet Day," was also rendered by Mattie Poulter.

The speakers were John Volker and Bishop Jacobs. Interment was in the Ogden City cemetery.

ANNUAL EXCURSION TO CANADA

E. A. SHEWE, C. P. & T. A.

CHILDREN ARE SAVED FROM FIRE. Los Angeles, Cal., August 1.—Through prompt action on the part of Rabbi Sigmund Frey, the manager, and Otto Torm, the janitor, the lives of fifty children were saved from death in a fire which destroyed the Jewish Orphans' home early this morning. The children followed the directions of the two men and, with but little disorder, left the building, a frame structure, which in less than half an hour was totally destroyed. Rabbi Frey lost in the fire a library valued at \$15,000.

ENNIS RESUMES BIG WALK TODAY

John Ennis, the veteran walker who has been passing a few days in Ogden—recovering after his arduous struggle over the Wasatch range, continued his record-breaking trip from New York to San Francisco.

Although thoroughly restored to his accustomed vigor yesterday morning, Mr. Ennis did not resume his task on account of his life-long practice of keeping the Sabbath. Whether ahead or behind in his schedule, Mr. Ennis never continues his journey on Sunday.

Frank J. Ennis, son of the veteran, is assisting his father on the trip by arranging hotel accommodations in advance and attending to his wants while resting.

Young Ennis is a champion athlete himself, as are also his brothers in the East. He holds the 25-mile skating championship of Connecticut, one hour and 34 minutes, and has completed successfully in many important contests.

In speaking of his father's remarkable performance of swimming the Mississippi river a few weeks ago, young Ennis said: "It has been father's ambition to swim the big river once more in his career and as his schedule for this trip would bring him to its banks on exactly the fifth anniversary of his first swim across it, he determined to make the attempt."

Fifty years ago he was unfamiliar with the river, and on reaching midstream he encountered a current which swept him three miles south of the point opposite his starting place. This time a river man gave him accurate directions for the swim and he was able to take advantage of the current so that he landed at the exact point determined upon in advance. "I said that I found the water far different from what it was the first time he crossed. Then it was a clear limpid stream of fine water, but fifty years has introduced so many sources of filth into it that today it is little better than a huge sewer. He said it was the nastiest swim he had ever had and nothing could induce him to try it again. He swam across this last time in about half an hour and was in fine condition on landing."

The veteran pedestrian is making this, the crowning feat of a strenuous career, entirely at his own expense, the idea being, if he succeeds in breaking the record, to return over his route in a more leisurely manner and lecture on health topics, the benefits of right living and how humanity can prolong life by following nature's rules.

Weston made the trip in 105 days and admitted that he had made an utter failure of his attempt. If Ennis continues his schedule without accident he will finish in 80 days. He carries a message from the mayor of New York to the mayor of San Francisco and is now 25 days ahead of Weston's time as far as Ogden.

NOTICE

On and after this date the undersigned will not pay any debts contracted by my wife or family, without written order. J. J. MCKINNON, July 28, 1910.

INVESTIGATING PORK PACKING

President J. S. Carver of the Utah Pure Food & Dairy commission, has received a letter from John A. Green giving facts relative to a recent investigation by Commissioner Driscoll of the methods in shipping pork.

This investigation has attracted considerable attention throughout the country, as there was evidently great need for it, not only in the East, but throughout the West as well.

The letter is as follows: "J. S. Carver, President, Ogden, Utah.

"Dear Mr. Carver—I respectfully call your attention to the investigation of Mr. Clement J. Driscoll of New York, commissioner of weights and measures, who has been making a thorough investigation of the packers' methods of shipping and selling pork loins in oil paper and canvas wrappings on ham and bacon.

"I have been glad to say that after a couple of weeks of investigation, back and forth, that the packers have written a letter to Mr. Driscoll, in which they guarantee from now on, net weight of goods, when the goods leave them to the retailer, whether they are handed to them direct, in which case they would be sure to get net weight, with an amount allowed for the canvas, or whether they are shipped from the packing house to the dealer, they shall be net weight, leaving the packing house, which should bring them nearly, if not quite, net to the merchant.

"If you know of any specific case, where there is any complaint to make along these lines, will you kindly bring it to my attention and in doing so, be very specific, so there will be no mistake.

"I am sure this matter can be remedied by taking it up with the different commissioners, either in the states or local towns or cities.

Yours very truly, (Signed) "JOHN A. GREEN, "Secretary."

COLORADO CELEBRATES. Denver, August 1.—Colorado will

celebrate today, the thirty-fourth anniversary of her admission to the union. Observances of the natal day will be held throughout the state and it is a holiday, known as "Colorado day."

For the most part, the programs will consist of speaking and music. Here, there also will be a monster fireworks display in the evening.

INTRODUCING A NEW LOCAL SONG

Miss Lula Thatcher, one of the song birds of the Globe theater, has introduced a new song that is bringing forth considerable favorable comment. The song is of considerable merit and it is the more appreciated because it comes from local talent.

The song is entitled "Utah," the words and music being by Harry H. Attwood and arranged by Charles Thatcher, whose daughter sings it.

This is the first pioneer song with Utah as its theme and its decided success should prove an incentive for other composers and song writers to make similar attempts along this line. The words of "Utah" are as follows:

All hail to thee, Oh fair Utah, Thy hills and valleys broad, A paradise of love and peace, Dwells ever on the sod, Thou art well crowned Queen of the West.

For the sunny clime, Great woods, prairies, and rippling streams, Grand canyons, deep, sublime.

Chorus: All hail to thee, Oh fair Utah, May praises ever ring, True love for thee, on land and sea, Thy children's voices sing.

The Wasatch mountains proudly stand In their majestic height, The stalwart trees and verdant flowers, The Sage hills white.

Bright sunbeams play upon the shores Of thy great inland sea, And storms that toss the crusted waves Breathe forth their mastery.

Of the brave pioneers of old, The story's oft been told, The struggles on the weary march To reach the land of gold, Their fane a precious monument That shall forever stand, They opened wide the gates for all To Utah's sun-kissed land.

FUNERAL SERVICES HELD ON SUNDAY

Impressive funeral services were held at the C. J. A. Lindquist funeral chapel Saturday over the remains of Samuel Lofgren, the infant son of Mr. and Mrs. Samuel Lofgren. Bishop Robert McQuarrie conducted the services and the music was furnished by the Second Ward choir, assisted by Miss Erma Browning and Miss Elsie Shorten. "Nearer, My God, to Thee," was rendered by Miss Browning, and "Your Sweet Little Rosebud Has Left You," by Miss Shorten.

The speakers were Charles Cramer of Huntsville, C. J. A. Lindquist and Bishop McQuarrie, who spoke kindly words of sympathy to the bereaved parents.

There was a large attendance and many floral offerings were in evidence. Interment was in the family lot in the Huntsville cemetery.

DEATH OF MRS. RICHARDS IN NORTH OGDEN, SATURDAY

The many friends of Mrs. Ann W. Richards of North Ogden will be pained to learn of her death which occurred at her home at North Ogden, Saturday, the cause of death being pneumonia. The deceased was the wife of John Richards and had been a resident of North Ogden for a long period of years, and was dearly beloved by all who knew her.

Mrs. Richards was born in Wales, June 19, 1840. She immigrated to America in 1881 with her children, her husband having arrived six months earlier. The family settled at North Ogden where they have resided ever since.

Mrs. Richards joined the Latter Day Saints while a resident of Wales and was a faithful worker in that faith. She is survived by two daughters, Mrs. Henry Daniel of North Ogden, and Mrs. Thomas Bradshaw, both of whom were at her bedside when death came.

The funeral will be held Monday at the North Ogden tabernacle. Interment in North Ogden cemetery.

CHINESE MAKE RAPID PROGRESS

Dean of Christian University Says Christianity Is Spreading Among People.

Salt Lake, Aug. 1.—The Rev. L. B. Ridgely, a former resident of Salt Lake City, but now of Wu Chang,

Cut out expensive foods and try

SHREDDED WHEAT

Contains more real, body-building nutriment than meat or eggs and costs much less. Try it for breakfast with hot milk. Your grocer sells it.

ALWAYS HEAT IN THE OVEN TO RESTORE CRISPNESS and serve with hot milk or cream, or with sliced bananas, baked apples or other fruits.

PUT LIFE IN THE AIR

On the hottest days of summer when the air is dead and stifling, you can be perfectly cool and comfortable right here in town. The whole secret is to keep the air circulating.

AN ELECTRIC FAN will make it circulate—keep it circulating—keep you cool. The most efficient and most economical fan there is. The low operating cost makes it possible for everybody to have one. Actually consumes about half what an ordinary 16 C. P. lamp uses.

Made in all sizes and types—desk, bracket, oscillating, ceiling fans, etc., for homes, offices, stores, etc.

Keep Cool This Hot Summer

Don't sweeter and stew. Be cool and comfortable. It's easy if you have AN ELECTRIC FAN. Uses the current of one electric light bulb. Easily carried to any part of the house and instantly attached to any light socket. Get this fan. Dress by it and you will go to work feeling fine. Put one in your office, too.

Made in all sizes, all styles, for all pocketbooks. Desk bracket, oscillating, ceiling, exhaust, for homes, offices, stores, etc.

Scorching Summer Days Will Have No Terror

If you'll keep pure, cool air circulating continually, in your office and in your home, by means of AN ELECTRIC FAN.

They are made in types and sizes to suit every requirement of the business office, factory or the home—desk, bracket, oscillating, ceiling, exhaust. The first cost is moderate, and the operating expenses very small.

Use Your Waste Floor Space

If your floor space is limited and you find it necessary to add a new piece of machinery, but don't want to increase the floor space, consider electric drive.

It may solve the problem for you as it has already solved it for many others.

A machine driven by a Westinghouse motor can be placed in any position, out of line with the other machines, sideways—in a corner—in some space now going to waste. Each motor-drive machine is an independent unit, both as to position and operation.

China, is visiting here for a few days. He spoke at St. Paul's Episcopal church Sunday morning, his subject being, "The Changes Now Ongoing in China."

Mr. Ridgely left Salt Lake about twelve years ago and is much pleased with the progress and improvements which he notes. His work in China has been that of an instructor in the missionary schools and colleges there, he being now dean of the divinity college of Boone university, at Wu Chang, China.

Mr. Ridgely reports this work as agreeable and instructive. The Chinese with whom he has to deal are, of course the better class; that is, they are the class that is seeking an education. About one-third of the boys are Christian and the remainder come from heathen families. The college faculty works on the principle that religion will stand education and that education tends toward the uplifting of morality, whether the student is a Christian or not. They find that this system bears fruit, many of the boys becoming Christians after completing their course in college, while all of them leave with a much higher idea of morality. When asked if he found the Chinese like white people, Mr. Ridgely replied: "Yes, like very good white people."

Education System Changed. The whole educational system of China has just been changed, and officially changed. New schools and colleges, modeled after those in America are being established. Still, many of the Chinese parents continue to patronize the church schools, because they say that the moral atmosphere there is better. The divinity school, of which Mr. Ridgely is dean, is conducted in English, and is similar to a graduate school in this country, only graduates from the college department being admitted.

Speaking of the changes going on in China, Mr. Ridgely mentioned the

PRIMARIES IN MISSOURI. St. Louis, Aug. 1.—Candidates for congress and many of the state and county offices will be chosen in Missouri, Tuesday, at the primary election. Democrats have filed their names for congressional nomination in each of the sixteen districts of the state. In the eighth district, now represented by Dorsey V. Shackelford, a Democrat, who wishes to succeed himself, the Republicans have no candidate. A man will be drafted by the Republicans before November. The same condition prevails in the fourth district.

Contagious Blood Poison is responsible for a great many old blood troubles; for its evil influences are often felt through many generations. Parents transmit the seeds of the disease to their children, and scrofulous sores, skin eruptions, catarrhal troubles, Rheumatism, ulcerating glands, and other stubborn diseases result from this most insidious of all poisons. There is no such thing as killing the germs of this mighty poison. Any medicine powerful enough to do this would destroy the delicate linings of the stomach and bowels, and permanently wreck the entire health. The only way to cure these old blood diseases is to REMOVE the cause from the circulation, and that is just what S. S. S. does. It goes into the blood and drives out every taint and poison and makes this vital fluid pure, fresh and nourishing. S. S. S. is made entirely of roots, herbs and barks; it does not contain the least particle of mineral in any form, and is absolutely safe for persons of any age. S. S. S. cures blood and skin diseases and disorders of every character, whether inherited or acquired. Book on the Blood and any medical advice free. THE SWIFT SPECIFIC CO., ATLANTA, GA.
