NORWOOD TEAM TRIMS THE BLOOMER GIRLS

Local Team Had Hard Battle to Win from Star Girls' Team.

The Norwood park baseball team defeated the Indianapolis Star Bloomer Girls in a thrilling eleven inning game at Norwood park Sunday afternoon, the final score being Norwood 5, Bloomer Girls 5.

The crowd Sunday was the largest that has attended a baseball game in this city for many years. All the seats were filled and the spectators began crowding into the field long before time for play to be called. When Umpire Burke called play, the entire enclosure was packed and jammed with rabid fans anxiously awaiting the start of the game. On account of the crowd special ground rules were made and a ball into the crowd in the outfield only netted the batter a single, and base runners could move up only one base.

The game started promptly at 3 o'clock with Whitney in the box for Norwood and Miss Cunningham doing slab duty for the Bloomer Girls. Both pitchers got by the first inning in easy style, only three batters facing each pitcher. In the second inning Whitney was successful in retiring the visitors without their scoring, but when the Norwood boys started to hit Miss Cunningham's delivery, the girls went up, and before the smoke cleared away four tallies had crossed the pan. Norwood added another in the fifth and pounded out the winning run on a double and a single in the eleventh inning.

The girls went scoreless until the sixth inning, when they pushed three

runs across the pan. They added two more in the eighth, tying the score. In the tenth inning the visitors made a brave effort to finish the game, but fell short, their runner being on third when the last out came.

Although the crowd was the largest that has attended a game here in years, it was an orderly and good natured one. On several occasions a few boys started some fun by starting the cry of "fight," and in a few minutes a big crowd would form around the boys to see the fight, only to learn that they were fooled.

The umpiring in Sunday's game was about the poorest that the good baseball fans of this city have had to endure for some time, and it certainly injured Sunday's game. Time after time both the umpires made mistakes after mistakes, and laughed at them and tried to even up on the next play. If Manager Denham expects the crowds to attend his games he will have to offer better umpiring than he did Sunday.

Al Wamsley, who formerly pitched for the Norwood team, but who is now a member of the Bloomer Girls' team, relieved Miss Cunningham in the third inning and finished the game. He pitched a steady game and with better support would have won his game.

Score by innings— R. H. E.

Bloomer Girls 000003000—5 9 5

Norwood 04001000001—6 10 3

Batteries: Miss Cunningham, Wamsley and Zinn; Whitney and Stull.

MONONGAH NINE TRIMS LOCAL TEAM

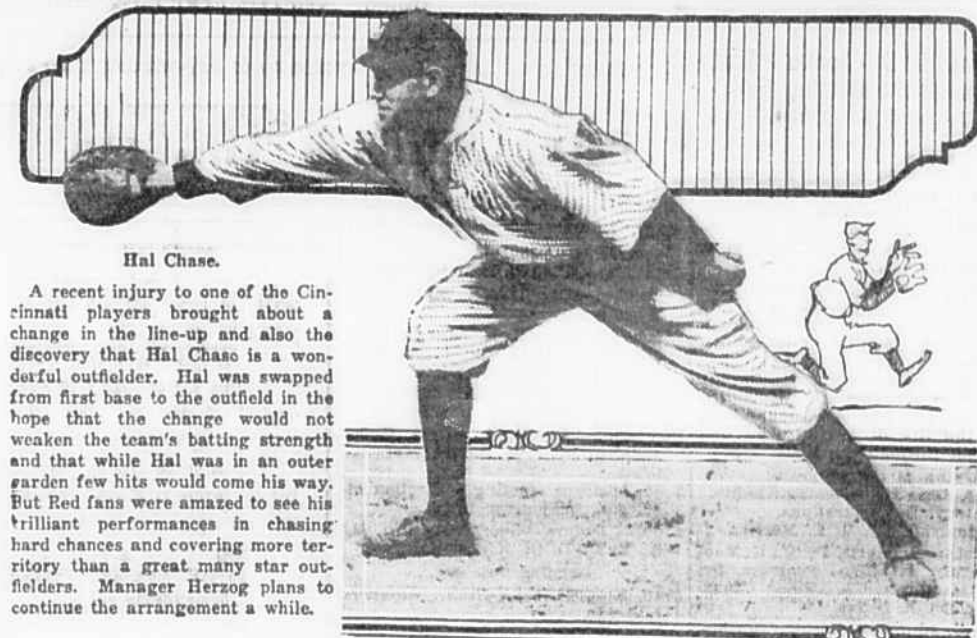

In Hard Fought Game Played at the Traction Park Sunday.

MONONGAH, June 12.—Sunday afternoon at Traction Park the Monongah baseball team defeated the strong Clarksburg aggregation in one of the most thrilling games that has ever been played at the local grounds. The game was exceedingly interesting and the fans were excited in all stages of the game.

From the beginning it was seen that the game was to result in a pitching battle between Trader and Heatwell. Only two hits were secured from Trader.

Clarksburg scored in the first upon McGraw's walk, an error by P. Spragg and a single by Burnett. From then on it looked as though Monongah was doomed to defeat. But after one man was out in the ninth, Toothman, for Monongah, walked, Brown singled,

HAL CHASE CAN SHINE ELSEWHERE THAN ON FIRST; HE PLAYS BRILLIANT GAME IN THE OUTFIELD FOR THE CINCINNATI REDS

Hal Chase.

A recent injury to one of the Cincinnati players brought about a change in the line-up and also the discovery that Hal Chase is a wonderful outfielder. Hal was swapped from first base to the outfield in the hope that the change would not weaken the team's batting strength and that while Hal was in an outer garden few hits would come his way. But Red fans were amazed to see his brilliant performances in chasing hard chances and covering more territory than a great many star outfielders. Manager Herzog plans to continue the arrangement a while.

Toothman going to second, P. Spragg walked, Wright sacrificed, Toothman to third, Spragg going to second, both scoring on Patton's single to center.

About six hundred fans were present, several being here from out of town. The score:

MONONGAH	A. B. R. H. P. A. E.
Fortney, 3b.....	3 0 0 2 0 0
H. Spragg, 2b.....	4 0 1 3 0 1

In the Wake of the News By Ring W. Lardner.

THE DIARY OF A SIREN.

June 4.
Diary I believe I have at last found a match for me in conversation and repartee and never did I believe a person could spend such a pleasant evening just doing nothing else only talking until last evening when Mr. Tanner came to call. At the close of the evening I realized that I had spent one of the most enjoyable evenings of my life and then suddenly I realized that I was engaged to Lennie and was it fair to him that I should be able to enjoy myself so thoroughly talking to another man when the man to whom I am betrothed is hundreds of miles away in the East. My conscience bothered me so that I could not sleep and finally I found refuge in the land of dreams by avowing that today I would write to Lennie and tell him about my acquaintance with Mr. Tanner. So I will write to Lennie and tell him all before I go to bed tonight. But first I want to record down here such bits of my conversation with Mr. Tanner as I can recall to read and laugh over them in future years.

He came about 8 o'clock and as my brother and sister-in-law was out to the nickle show I thought we could have a better time staying at home quietly and chatting so I did not make any proposal about going out somewhere.

"You are looking very cute tonight, Clara," said Mr. Tanner when I had asked him to take a chair.

"My name is Miss Meyers to strangers," I replied.

"I should worry," he said, and I could not help from laughing at his boldness.

"It would not be fair," I said. "If you was to call me Clara when I feel that I can only call you Mr. Tanner."

"I do not care what you call me as long as you don't call me down," he said, and we laughed as gayly as though we had known each other all our life.

"Where do you learn all that funny stuff?" I asked banteringly.

"I read the comic papers," he replied, and really it was all that I could do to keep from shrieking.

"They say it makes a person fat to laugh," I said. "I don't want to get fat and if you come here often I am afraid I will get fat."

"You could take on a few more ounces without any danger of them taking you to the stock yards," he said.

"Why, Mr. Tanner, or Lou," said I. "You talk like I was an animal of some kind."

"We are all animals," he replied. "Well, if we are all animals, you will have to tell me what kind of animal I am." I said banteringly.

"Well, kid, you're a bear," he replied.

I wish I could recall more of what was said, but it was all said so fast back and forth that I can only recall

been reading a great deal and sewing some, mending up my clothes so I can look nice for you when you come back. I have staid home every evening and gone to bed early. I hope you are enjoying the trip and that you are thinking of me. Why don't you write as you promised?

It seems a long time since you went away and I miss you very much. I must close now as I have writing to do for Mr. Weeghman.

Your own little girl.
I would have written a longer letter to him if I thought he deserved it but he has been neglecting me shamefully.

Diary since I wrote those last lines Lou called up and wants me to go out to one of the parks with him tonight. I refused, but he would not stand for it. What ever shall I do with such a persistent man?

NOTICE TO BROAD OAKS PROPERTY OWNERS.
Street Paving Assessments to Be Laid on the 28th Day of June, 1916.

Notice is hereby given to the property owners in Broad Oaks whose property abuts on Bridge street, Buchanan pike between Bridge street and Point street, Harrison street between Point street and Buchanan avenue, Delay street and Buchanan avenue, Delay Plaza and Industrial Bridge, and Marshall street between Main street and Buchanan avenue, that the common council of the Town of Broad Oaks will meet at the Council Chamber on North street on the 28th day of June, 1916, at 8:00 o'clock, P. M., to lay an assessment against the real properties abutting on the streets and parts of streets aforesaid, which streets and parts of streets have been recently paved and curbed, to pay for said paving and curbing and improvement. Any person or persons owning real property which abuts on the streets and parts of streets so paved as aforesaid has the right to appear before said council to correct any apportionment or assessment which is excessive or improperly charged and made. All persons who will be effected by the laying

of said assessment are requested to be at the meeting of the council on said day and date, as after then the assessments will be placed in the hands of the treasurer of the Town for collection, and will be recorded in the county clerk's office of Harrison county, as provided by statute.

Said assessments will be laid in pursuance of the ordinance for paving and curbing the streets and parts of streets aforesaid adopted by the council on the 15th day of April, 1915, and in pursuance of the statute in such case made and provided.

JOE N. CRADDOCK, Mayor.
Attest: C. J. COTTRILL, Recorder.

NOTICE OF DISSOLUTION.
Notice is hereby given that at a meeting of the stockholders of the Peerless Window Glass Company, a corporation created and organized under the laws of the state of West Virginia, held at its offices at Columbus, O., on the 16th day of May, A. D. 1916, the following resolutions were adopted:

"RESOLVED, FIRST, That the Peerless Window Glass Company, a corporation created and organized under the laws of the state of West Virginia, does hereby discontinue business as a corporation and surrender to the said state its charter and corporate franchises. The board of directors will proceed to convert any property, choses in action, and all assets of this corporation into cash, and pay off and discharge all its debts, liabilities and obligations; and after fully discharging all such debts, liabilities and obligations, divide the remainder among the stockholders pro rata with their several holdings of stock, but no such payment shall be made to any stockholder until after the publication of the notice hereinafter provided."

"RESOLVED, SECOND, That the president of this corporation cause notice of the adoption of the foregoing resolution to be published in some newspaper of general circulation, published near the principal office or place of business of this corporation, once a week for four successive weeks; and that he certify these resolutions to the secretary of state of the state of West Virginia, and deliver to him a certificate showing the publication of said notice, as provided by law."

Given under my hand this 16th day of May, A. D. 1916.

J. G. SAYRE,
President Peerless Window Glass Company.
Attest: WALTER A. JONES, Secretary.

There are two things which determine the properties of steel. First, the alloy which enters into its make-up; and second, the heat-treating or tempering process through which it must pass to fit it for its finished work. These forgings and heat-treating processes are developed in the Metallurgical and in the Chemical Analysis Divisions of the Engineering Laboratories, but the work itself is actually done according to laboratory specifications in the Studebaker factory under the hands of expert steel workers.

Then in the Physical Test Division the actual strength of steel is tested. Giant machines are used to break and pull apart pieces of steel, and the force necessary to bend or break the steel is measured to a pound.

Finally, it is not enough that every piece of material should be tested and tested, again and again. After it is placed in the car, the finished car is tested by actual road service in the Experimental Car Test Division.

Not only do the Studebaker Experimental Laboratories test and check raw material and finished parts, but they also do the most exhaustive and complete research work.

The development of the Studebaker spring is a most striking illustration of Studebaker research work. Four years ago, the average automobile spring would stand 30,000 vibrations in a machine which delivered 1,200 pounds pressure, eighty times a minute. After three years' research work, Studebaker engines were able to produce a spring steel which would withstand 120,000 vibrations in the same machine—and this is the spring which is today used under Studebaker cars.

In addition to testing raw material, and its own finished products, Studebaker laboratories also test tires, carburetors, electrical systems, and various pieces of car equipment.

The Electrical Division of the Studebaker Engineering Department is also complete.

This division after three years of experimental and research work in collaboration with the Wagner Electric Company's engineer in St. Louis, developed one of the most simple, compact, accessible and reliable electrical systems ever put on a car. This electrical equipment has attracted attention among automobile engineers in every part of the world.

There is also a division which concentrates entirely upon most car patents and inventions. There is nothing new which is not submitted to Studebaker—usually before it is submitted to any other manufacturer, because selling to Studebaker means the most dependable guarantee of permanent business.

It is only the great resources of Studebaker which make such research and experimental work possible.
