# New York Stock Market.

NEW YORK, Oct. 5 .- The stock market continued to show marked indifference to the dis-turbances in foreign markets on account of war Dist turbances in foreign markets on account of war scare and of money difficulties as well as to the continued stiffness of the local money rate. Prices dipped at the opening on the rumor of an invasion of Natal by the Boer forces and on the further advance in the Bank of Eng-land's official rate of discount. But the open-Prices dipped at the opening on the rumor of an invasion of Natal by the Boer forces and on the further advance in the Bank of England's official rate of discount. But the opening prices were for the most part the lowest and the market quite promptly set about retrieving its decline. The liquidation for London account was comparatively small in volume, sales not exceeding 15,000 shares. In fact, the foreign stock murkets seemed to take no very serious account of the strained condition of affairs and even the Kaffir mining stocks, which would be most vitally affected by the war, were quite firm.

The market for call money in New York showed further relief from the extreme stringency. To-day's maximum rate was 12 per cent, and it feil before the close below the legal rate.

The undertone of the market was very firm. This was rot due to any large demand, even in the case of stock which moved quite widely. But rather to the bladding model and the string of the control of the strained condition of affairs and even the Kaffir mining stocks, which would be most vitally affected by the war, were quite firm.

gency. To-day's maximum rate was 12 per cent, and it fell before the close below the legal rate.

The undertone of the market was very firm. This was not due to any large demand, even in the case of stock which moved quite widely, but rather to the bidding up of prices by those interested in seeing a higher figure for their holdings. This bidding up process, however, failed to bring out large offerings, which fact was significant of the market's firmness. Another was the large number of stocks how usually dealt in, which were brought into activity. The latter feature is always indicative of the presence of the bargain hunter who is buying stocks outright to hold as an investment, a class of buyers who do not depend on the money market for borrowed funds. There is undoubtedly a growth of confidence that the stringency for money is over. The demand from the interior for funds continues large and may encroach on the reserve of interior banks loaned to-day on call in New York. The rising discount rate in London caused an additional advance in the rate for sterling exchange here, in Paris and in Berlin, and the weak return of the Bank of France discourages the idea that either London or New York can hope for large relief from that center.

### London Market.

NEW YORK, Oct. 5.-The Commercial Adrotter's London financial cablegram says:
The advance in the bank rate to 5 per cent
caused little surprise on the Stock Exchange
here to-day, owing to the high rate yesterday.
Bank of England returns show that the resank of England returns show that the reserve has been reduced £250,000, pulling down the ratio of reserve liabilities to 25 per cent. That was due partly to the demand for money at the turn of the quarter year, but £250,000 worth of gold is expected to be sent to the

at the turn of the quarter year, but \$220,000 worth of gold is expected to be sent to the Cape to-morrow.

The market was erratic. An invasion of Natal by the Boers was reported, but that proved to be a signal for free buying of Africans. The large capitalists steadied all departments. The present interval of peace is regarded only as a postponement of war. The rise in the bank rate had little effect. Bears were active in closing accounts.

Consols opened at 102% and went to 103%, then relapsed to 103. On the rise in the bank rate they closed at 103%. Americans opened at parity, relapsed \$4.00\foxed no the bank's action, railied on receipt of New York prices and closed firm. Spanish 4's, 60%. Anacondas were 10%. The gold bought by the bank amounted to £168,000 in bars and £20,000 in French coins. All gold arrivals are now entering the bank at 9d.

There was less demand for money. The banks did a fair business at 5 per cent. The Austro-Hungarian and Bombay banks raised their rates from 5 per cent to 6 per cent.

WHEAT-Futures recovered some of the lost ground yesterday, but spot prices were easy with a dull market.

Chicago opened firmer on better foreign advices and war news, which gave the market a nervous undertone, but the feeling became weaker on small business and a disposition on weaker on small business and a disposition on the part of dealers to Ignore war cables, which have generally ended in smoke thus far. Liverpool was %d higher, and cargoes were strong on the London market. Consols were %d lower, and the Bank of England advanced its rate of discount to 5 per cent. Rumors of hostilities were not confirmed. Chicago dealers fought the advance, but New York continued strong, foreign acceptances were liberal and there was very little wheat offering, though thirty-seven loads were taken for export. A weaker Liverpool closing caused a decline and dealers were very bearish and short.
