## S.S.S. PERMANENTLY HEALS OLD SORES

If a quantity of normal blood is placed in a vessel and vigorously whipped with a bunch of twigs, a white, sticky substance is found clinging to the twigs and binding them together. This is a natural element of the circulation and is known as plasma, a fibrous constituent—and is the true healing quality of the blood. This plasmin property is frequently destroyed by impure accumulations in the blood, and this vital fluid not only loses its power to heal, but becomes a source of irritation to any wound or open sore or ulcer on the flesh. Continually the blood discharges the impurities into the place and gradually the infection spreads and the sore enlarges. The nutritive corpuscles are also weakened, and the blood has not sufficient nourishing power with which to stimulate the place. External applications cannot cure an old sore, because such treatment does not affect the blood; the most that can be expected from plasters, washes, salves, etc., is a cleansing, soothing effect on the ulcer.

S.S.S. heals old sores in a perfectly natural way. It goes down into the blood, and removes the impurities and morbid matters that are the means of keeping the ulcer open; then the sore is bound to heal. S.S.S. is the greatest of all blood purifiers, and not only does it cleanse the circulation, but it restores the healing, plasmin qualities and aids in promoting every necessary quality for good health. S.S.S. builds new flesh tissue from the bottom of the ulcer to the outer skin, and makes a permanent cure. Book on Sores and Ulcers and any medical advice free. S.S.S. is for sale at drug stores.
