GANDERBONE'S FORECASTS FOR DECEMBER

Copyright 1908 by C. H. Rieth

The shades of night were falling fast
As Paul Revere went dashing past.
"T. Roosevelt is dead!" he vowed,
But everybody laughed aloud.
And as he pushed upon the reins,
They cried, "Go tell it to the Danes!"

Whereat the herald winked his eye
And said, "I'll have to change the cry
"Prosperity returned!" he bawled,
The next town site he overhauled;
But this town, too, for all his pains,
Just smiled and said, "Go tell the
Danes."

Wherefore, Revere, still raising welts
Upon his mount planned something
else.

"Cook has confessed!" was his halloo
The next township he galloped
through;
But these were also knowing swains,
And yelled, "Go tell it to the Danes!"
At which rebuff he frowned a frown
And said "I'll try just one more town."
And, on the solemn truth resolved,
Cried, "Standard Oil has been dis-
solved!"

But this town said and shook its nog-
gin,
"Keep right on, Paul, to Copenhagen."

December was anciently the tenth
month, and its name is from the Latin
decem (ten). It has always been the
last month in every calendar. Like
ourselves, the ancients were not quite
sure whether they could afford it or
not, and it was always, therefore,
placed where it could be dropped with
the least disturbance to the calendar
year. Alexander the Great always
attacked his enemies immediately after
Christmas, when they didn't have a
cent, and Julius Caesar, who could
see farther than Jim Hill, repeatedly
warned Rome against the Goths and
Vandals, who, like the trusts, gave
each other no Christmas presents.

The cast for the annual Christmas
cantata will be as follows: Santa
Claus, Mr. Taft. Sled, Mr. Carnegie.
Reindeer, Mr. Kuhn. Mr. Loeb, Mr. Al-
drich and Mr. Payne. Bells, Mrs.
Green and Mrs. Sage. Whip, Mr. Law-
son. Snow, Chancellor Day. Moon,
Mr. Archbold. Roof, Mr. Ryan. Chim-
ney, Mr. Hill. Pack, Mr. Sherman.
Tree, Mr. Rockefeller. Sleeping child,
Mr. Morgan. The performance will be
given on the night of the 24th. Mr.
Morgan is said to be in the awakening
scene the most delightful child in the
history of the play.

The natural phenomena of the
month will be encouraging. On the
12th there will be a partial eclipse of
the sun, visible in the region around
the South Pole. During the eclipse
16 ounces of sugar will weigh a pound
at the New York custom house and
gas meters will run backwards. On
the 21st the Coal Trust will kick the
sun across the Tropic of Capricorn
for a field goal, and the winter solis-
tice will begin with the ball in the
possession of the trusts on our five-
yard line. This will be the shortest
day of the year, and Mr. Peary will be
the favorite in the North Pole dispute.

The dawn of winter will disclose
John Rockefeller with his toes
Wiggling with an upward thrust
And pieces of the Sugar Trust
Disseminated here and there.

With Uncle Samuel with his hair
Awry in angry little puffs
In looking for his coat and cuffs.

The breath of Boreas will blow, and
lo, the soft and flakey snow will lay
its mantle on the hill and look for
cubby holes to fill. The furry coat will
feel the fine on-come of winter down
his spine, the which will make him
buck and squeal and snap the cracker
on his keel. The chilly dog will sniff
the air and don his heavy suit of hair,
and in his ingloo made of snow the
blubber-eating Eskimo will twinge
with rheumatiz and gout and wonder
how the fight came out. The lusty
calf will bawl and bah and burrow
in the stack of straw, and Winter, with
its biting wind, will urge him inward
from behind. The rabbit hunter, red
of face, will prosecute the thrilling
chase, and the flying rabbit, frighten-
ed daft, will run like Roosevelt were
aft.

The cost of living, plump and stout,
Will dare the Christmas shopper out,
And chase him headlong through the
door

And here and there around the store;
And every time he shall spy
A present he would like to buy
The swift pursuer, fell and grim,
Will knock his pins from under him
And slap him smartly on the gills
With seven pounds of household bills.

At which the drums will sadly beat
and all the dollies fair and sweet
will weep in concert, and the toys will
make a thunder of a noise. The mel-
ancholy horns will toot, and the little
soldier in his suit will wave his trusty
haversack and stab the tyrant in the
back.

We must have Christmas in these
parts no matter who it is that smarts
or what the blooming tariff is, or any
man desires for his. We've got to fill
those empty socks no matter if the
planet rocks, or if the plutocrats we
rifle go round barefooted for a while.
We don't mind being made the goat
and wearing our old overcoat year in
and out and being spent, and sifting
ashes for the rent; but when the holi-
days advance and Fatty Morgan
hangs his pants upon the mantle with
the cuffs tied up with strings and other
stuffs, and tells the rest of us to
git, by thunder, we won't stand for it.

There will be something doing in
social and political phenomena. Con-
gress will assemble at Washington on
the fifth, and an emergency session
of the Standard Oil legal staff will
begin at Cleveland on the eighth. Mr.
Taft's ultimate conclusions as to golf
and other great issues will be read on
the sixth, and Mr. Rockefeller's an-
nual message will be made public on
the ninth. The insurgents will biv-
ouac across the Potomac from the
Capital, with Mr. LaFollette in com-
mand, Mr. Cummins as scout and Mr.
Beveridge as lookout.

On the 21st we shall pass under the
influence of the zodiacal sign of Cap-
ricornus the Goat. This will cause
Mr. Taft, who is going to go for Rip
Van Winkle's record, to turn over, and
the consumer will be the goat.

And then the new year will arrive
To swell the sum of years,
And the man from Elba will return
To set us by the ears.

SWITZERLAND ADVANCED IN PRACTICE OF FORESTRY

Switzerland recognized the benefits
of forest protection and development
600 years ago when the forest ordi-
nance of Bern was issued. The Shil-
wald of Zurich, one of the most per-
fectly managed and most profitable
forests in the world, has been handled
under a working plan since 1680. The
little Alpine republic still reports
progress in forest work, and the Am-
erican consul writing from St. Gall,
says:

"The government of Switzerland
has so carefully regulated the timber
output that it has never been permit-
ted to exceed the natural growth. The
thick growth of timber on the
mountain sides, purposely allowed to
become dense, has perceptibly lessened
the danger and frequency of ava-
lanches and landslides, which in for-
mer times were so frightfully de-
structive.

To control the spring floods in the
rivers and streams massive dams, for-
tified by thickly planted trees, have
been erected at exposed places. In
the extraordinary attention paid to its
timber lands the government has taken
into account also the necessity for
sheltering and pasturing cattle, the
maintenance of the soil, the roads,
and the natural springs, climate, and
the control of mountain streams.

"The actual forest area in Switzer-
land comprises 2,205,508 acres, 21.48
per cent. of the entire surface of the
country, 77,004 of which belong to the
state, and 2,128,504 to the cantons,
communes, municipalities, and pri-
vate corporations. Seven hundred
and eighty-one acres of the state for-
est are set aside as a nursery. From
this nursery in 1908 over 22,000,000
young trees were taken and trans-
planted in the various forests.

"Swiss forests are classed as 'pro-
tected' and 'non-protected.' The for-
mer are those which are situated on
mountain slopes where the imminence
of washouts, stone and ice chutes,
landslides and avalanches calls for
the constant exercise of extraordi-
nary care and attention. The 'non-
protected' are those on comparatively
level ground requiring only ordinary
attention to keep them in good con-
dition. Because of the character of the
country the great majority of the for-
ests are 'protected.'

"The law provides that 'the forest
area shall not be diminished' and that
all forests shall be maintained in a

fairly dense condition. Even in pri-
vate forests close cutting or clearing
up is strictly forbidden, especially in
exposed places, without the consent
of the federal authorities, and then
only in small areas and when prompt
reforestation is guaranteed. Trees
for cutting are carefully selected by
forestry experts.

"Through the forests are excellent
roads, made largely by the cantonal
authorities. The year 1908 was mark-
ed by such activity in road construc-
tion that the state, which bears a pro-
portion of the expense, paid to the
cantons the sum of \$46,634 on their
account alone.

"Spruce is the most important tree
in the Swiss forests, and then in order
of their importance come the white
fir, beech, larch, pine, cypress, and a
few other varieties.

"The principal revenue derived
from the Swiss forests is from the
lumber output, there being no manu-
factures of resin, turpentine, and sim-
ilar bi-products. To offset the cut-
ting there were planted in 1908
23,096,225 trees, of which 18,031,590
were conifer and 5,064,635 were de-
ciduous, and no less than seven tons
of seed were sown.

"Statistics of the receipts and ex-
penditures of all forestry work in the
country are not available, but a cou-
ple of cases may be cited which show
gratifying returns.

"The total receipts from the sale
of wood in 1908 from 2,421 acres of
state forests in the canton of St. Gall
are given as \$24,457.37 and the ex-
penditures as \$7,104.81, leaving a net
profit of \$17,352.56. In the forests of
the town of Winterthur, amounting to
2,833 acres, the receipts were \$51,174-
63 and the expenses \$21,634.50, leav-
ing a net profit of \$29,540.13, or an
average profit of about \$10.42 per
acre.

"It is not to be presumed that the
revenue from the entire Swiss forest
area can be approximated by taking
as a basis the earnings of the St. Gall
or Winterthur forests, which have for
many years been under the most in-
telligent and excellent management,
but the universal opinion among fore-
stry officials is that the jealous care
with which the Swiss timber lands
have been guarded has vastly bene-
fited both national and cantonal
treasuries from the financial point of
view."

THIS MAN HAS THE RIGHT IDEA ABOUT THE APPLE PACK

Dear Mr. Hardy:

All the fall I have watched with
interest the discussion regarding the
reputation which Canon City has
made for herself in the matter of
grade in apple pack. And it has been
with somewhat of shame that I have
realized that it was not what it ought
to be, so when my eyes ran upon the
article from which the following is
taken, I said, "if it has been done else-
where, why not here?"

This is the report of one small com-
munity, in the effort to improve their
own market.

"Some 17 years ago the peach grow-
ers of the Catawba Island, Ohio, be-
came greatly dissatisfied with the
methods in vogue in marketing their
crops." They were satisfied that
prices were low, and grading dishonest.
They were careful to establish
uniform grades, to ship in uniform
packages, nearer a common brand.
They have made that brand of peaches
stand for quality and grade in every
market, and succeeded in establishing
so high a reputation for their pro-
duct that Gypsum, the shipping point
has become one of the greatest peach
markets of the country." Every
year marketing seventy-five to one
hundred thousand bushels of peaches
at highly remunerative prices."

This is no peach market but the
principle applies to our apple mar-
ket.

Now, I don't think that it may be
necessary to form any more associa-
tions for the handling of our crop—
but what I do want to emphasize is
that by some system of uniform grad-
ing and packing, there can be a rep-
utation made that will mean many

Neither do I believe that the rank
thousands of dollars profit each year
to the fruit growers of this valley.
And file of packers of Canon City are
wifely dishonest in their pack, but
because of the absence of any com-
mon understanding, or established
grade, every man has to pack to his
own judgment, resulting in anything
but uniformity.

Now let the fruit growers associa-
tion and the shippers get together, es-
tablish a grade, adopt a uniform pack-
age, and by rigid and impartial in-
spection insist upon the requirements.

Let every fruit grower rally to the
standard and do his portion in up-
holding the good name, and it won't
be many seasons before Canon City
apples will occupy the place in the
markets, to which they are justly en-
titled, among the front ranks.

The time to do this is at once, for
the next pack of apples must be larger
and increasing with each year as
more and more land is brought into
cultivation and new orchards come in-
to bearing—meaning more and more
and increasingly more profit to the
section—and it will be easier now to
establish a grade than when the mem-
ber of growers has been doubled—Ex-
cuse me if I take up to much of your
valuable space but the subject seems
so important to me that I venture to
say my say.

"A. READER."

A Thrilling Rescue

How Herbert L. Lean, of Cheny,
Wash., was saved from a frightful
death is a story to thrill the world:
"A hard cold," he writes, "brought on
a desperate lung trouble that baffled
an expert doctor here. Then I paid
\$10 to \$15 a visit to lung specialists
in Spokane, who did not help me.
Then I went to California, but with-
out benefit. At last I used Dr. King's
New Discovery, which completely
cured me and now I am as well as
ever." For Lung Trouble, Bronchitis,
Coughs and Colds, Asthma, Croup
and Whooping Cough its supreme. 50c
and \$1.00 a bottle. Trial bottle free. Guar-
anteed by Hunter Palmer.

Dr. K. C. Saper

The Denver eye, ear, nose and throat
specialist, will again be at the St.
Cloud hotel, Friday and Saturday,
Dec. 10 and 11, Consultation free.

From Arctic to Tropics in Ten Minutes

No oil heater has a higher
efficiency or greater heating
power than the

PERFECTION Oil Heater

(Equipped with Smokeless Device)

With it you can go from the
cold of the Arctic to the warmth
of the Tropics in 10 minutes.

The new

Automatic Smokeless Device

prevents smoking. There is no possible question about it.
This means greater heat-power, a more rapid diffusion of heat
and a sure conversion of all the heat-energy in the oil.

In a cold room, light the heater and in 10 minutes you'll have a
glowing heat that carries full content.

Turn the wick up as high as it will go—no smoke—no odor.
In everything that appeals to the provident and the fastidious, the
Perfection Oil Heater, with its new automatic smokeless device, de-
cisively leads. Finished in Nickel or Japan in various styles.

Every Dealer Everywhere. If Not At Yours, Write for Descriptive Circular
to the Nearest Agency of the

CONTINENTAL OIL COMPANY
(Incorporated)

AERIAL TRAMWAY ESTAB- LISHED ON WOLF PARK FOR TRANSPORTATION OF COAL

Littell Brothers of Colorado Springs
—owners and operators of the Wolf
Park Coal mine, a couple of miles
south of town, after having an aerial
tramway built for the transportation
of their product from the mine to the
Santa Fe railroad spur, running out
to the Empire Zinc plant, a distance
of nearly two miles. It is a somewhat
unique piece of engineering construc-
tion, there being nothing quite like it
anywhere in southern Colorado. It
is nothing more or less than two par-
allel lines of tightly stretched, three-
quarter inch, steel cable, varying in
height from two to twenty feet above
the ground, on which cars carrying
about a ton of coal, or other merchan-
dise, are operated by means of pulleys
—The installation of the enterprise
will be completed next week when the
output of the mine will be carried
from the shaft to the railroad track
in the manner we have described.

Thirty cars have been ordered by
the company and it is intended ulti-
mately to have fifty of them in com-
mission.

A few months ago a somewhat sim-
ilar tramway was erected by one of
the mining companies in the Cripple
Creek district, the first of its charac-
ter in the Rocky Mountain region, and
was the prototype of the line being
put up by Littell brothers.

There are two tracks, one for the
loaded cars and the other for the em-
pty one going back to the mine. The
cables are securely fixed to heavy
posts, set in groups, at intervals of
a hundred feet and sag but very lit-
tle under the loads they carry.

The cables are cut in lengths of 500
feet in order that the slack resulting
from expansion during the hot weather
may be taken up, which is accom-
plished by means of set screws.

These traveling cars loaded with
coal and moving forward without vis-
ible power will present an interesting
spectacle. Along the railroad tracks
capacious platforms are being con-
structed for the storage of the coal.

The Wolf Park mine is 1,100 feet
deep, but, in spite of that fact, is no
more expensive to operate than those
in which the coal measures are much
nearer the surface.

Thomas Knowles is the pit boss at
the Wolf Park mine and John Munster
has supervision of affairs at the sur-
face.

MASS MEETING FOR MEN AT THE CHRISTIAN CHURCH SUNDAY AFTERNOON

On Sunday afternoon at 3 o'clock a
special meeting for men will be held
at the Christian church to which all
men of the city are cordially invited.
Rev. Dean, the evangelist, who is con-
ducting a series of meetings at the
Christian church, will speak on the
subject, "Five Kinds of Fools." Rev.
Dean is not a sensationalist, but he

will have some splendid things to say,
in an interesting manner.

Prof. Arthur L. Haley of Butler, In-
diana, will sing and have charge of
the special music of which there will
be a fine program.

Special meetings at the church at
the regular services both morning and
evening to which all are welcome.
Subject for morning sermon, "Our
Father;" for the evening discourse,
"The Church of the New Testament."

A Daily Record want ad does the
work. Only 5c line.

The man on the farm can rightfully
be numbered among the country's
most careful investors. The Colorado
fruit farmer, especially, is seldom en-
snared by fake schemes. He is sat-
isfied to place his earnings where they
earn a consistent rate of interest and
are absolutely safe.

For this reason an interest account
in this bank has, for nearly eighteen
years, been the choice of Colorado
farmers and ranchmen.

Its Banking-by-Mail department is
the largest and most modern in the
west. No matter where you live, you
can deposit with this bank, and your
funds will earn four per cent. interest.
Send today for Booklet "F," which
explains our system.

—THE—
INTERNATIONAL TRUST
COMPANY-BANK
"The Oldest and Largest in Colorado."
D. H. MOFFAT, President, DENVER.
ASSETS OVER FIVE MILLIONS.

They Win in a Walk
