L consideration and close examination on the parts hose wishing to purchase a Feed Mill. Its mechanical construction and adaptation to the purposes designed, to crush and grind ear corn. Its great ca-pacity, while doing an immense work with extraordinary case, its durability is amply provided for. The complete and entire portableness of the Little Giant, rendering its greater convenience for plantation and farm use impossible. It requires no mechanical aid or bill of expense to put it op; any farm hand or servant can put up and set or e running in half an hours time. The convenience with which the sweep may be applied to tun borisontal—as is most usual—or over head, and the mill may be easily attached where stram or water is used. The power it takes, requiring one and two horses. The quantity and quality of product, 10 to 30 hushels of good feed meal per hour, according to the degree of fineness ground, and the size mill. It is the cheapest mill, all things considered, there is before the pub-

tent, and worthy of note, is the fact that there has been no Patent Right speculating or buckstering about the country, as is usual with the thousand bungling make-shift implements that are got up as a trade—merely to get money by seiling or painting off the patent right upon the credulous then the machine to be abandoned by all parties as a hom-bug; on the other hand the Patentee and Proprietors of the Little Giant Mills, b-lieving that they can—and determined that they will supply the Agriculturalists and Stock raisers of our country with a superior Mill, are permanently engaged in the business, and have over one hundred thousand dollars invested in the manufacture of these mills, in the East, West and South, some of these establishments as playing 60 men solely in this business. So highly are these mills appreciated, that four thousand have been sold within the most stehters, monthly and the learnest and the root the past eighteen mouths, and the heaviest and the rost extensive Manufacturers of Agricultural implemens in the United States have eagerly sought an interest in their manufacture and sale.

No implement has been more thoroughly tested; no one of the kind has received so numerous and high testimonials from M-chanics' Institutes and Agricultural Associations, and none, by reason of substantial, practical utility and merit have more fairly ground their way into every days use and popular favor than Scott's Little Giant Corn and Cobb Mill.
