SPEAKING OF obelisks. They are becoming fashionable. England has one, and New York, of course, must not be outdone by England.

The Hon. E. C. BREARLY, the newly elected Delegate from the proposed Territory of Lincoln, which includes the Black Hill country, is in town, urging its early organization upon the attention of Congress.

Repeal of the Resumption Act. We have not participated in this measure on either side for the reason that it is our desire that the wisest and best course toward the business interests of the country shall be pursued.

A Merited Compliment. Our readers will remember that on the 23d of February last the French bark Peabody was stranded on Ship Island, in Mississippi Sound, and that the vessel and crew, composed of sixteen persons, were saved by the skill and intrepidity of the officers and men of the United States revenue steamer Dix, commanded by Lieut. D. F. TOZIER.

The attention of Col. HOOKER, Congressman for the sea-coast district in Mississippi, was recently called to the matter by Gen. HUNT, the efficient and popular collector of customs, under whose observation the gallant act was performed, and he at once introduced a joint resolution authorizing Lieut. TOZIER to receive the medal.

The Government of the United States has to-day, unless we are mistaken, a larger percentage of coin in relation to its paper than the Bank of England has had for years.

The public life of a public man is a proper subject for criticism. This is all that the South has done in the case of MORTON. It was a right and a duty. It violated none of the principles of human conduct.

PROVIDENCE in its mercy hath seen fit to scourge the people of India with famine. From time to time the press of this country has given full accounts of the sufferings of these people with this terrible affliction.

After Senator MORTON entered the Senate of the United States, he invariably insisted that the South should respect and observe the terms and laws of reconstruction. He never demanded more at the hands of the Southern people, nor would he consent to accept

less. He denounced, as every humane person everywhere has done, the brutalities and outrages practiced at the South to secure political control of the late insurgent States in the hands of the Democratic, which is numerically the minority, party in that section.

WHAT is there in the nature of the scientists that make them, as a rule, so cold to all that portion of the human race outside of their own charmed and enlightened circle? It does seem as if they took delight in giving information that ever sends a cold thrill through the less enlightened.

PERSONS complain bitterly of the frequent suspension of their quarterly pay, as if the Government did not, for the sake of giving employment to clerks, starve the poor soldiers.

There is a system of "CONTROLLED LABOR" which Judge Cooke is now determined to enforce. Under it Charleston land-owners fondly and confidently look for a return of that prosperity which they once enjoyed as the result of their system of slavery.
