U SED in all the eastern cities with unparal-leled success. The effect produced in the use of this instrument is wonderful: it cures the Falling of the Womb; the sinking, all-gone feel-ing of the Lungs, Stomach or Sides; it helps the Whites, prevents Miscarriages, strengthens weak Lungs, weak Voice, &c.; harrenness gives place to fruitfulness, the constitution is improved, and restoration to health is the final result. m23

Cancers and Ulcerous Affections OF EVERY GRADE TREATED BY DR. GILBERT.

TREATED BY DR. GILBERT.

TREATED BY DR. GILBERT.

DR. GILBERT. formerly of Gilbert's Infirmary, Memphis, Tenn., has selected New Orleans as his future and permanent residence, and offers his professional services to such as desire his aid. He treats the following chronic diseases with great success, without the use of the knife: Cancers, Carbuncles, Fistula in Ano, Wens, Tumors, Dropsy, Servelula, White Swellinga, Ulcers, or Sores of long standing, (thousands of limbs are amputated that could be cured.) Mercurial Rheumatism, and Venerial Diseases of every grade, he cures in all its horid forms, when the nose is gone and the throat a mass of ulcers, and gives no mercury in any case. Scall Head, Malignant Tetters, Leprosy, Diseases of the Blood or Skin; Warts and Moles he removes from the face, which often become cancerous. He Straightens Crooked Limbs, cures Lockjaw, and Mortification. He has, as yet, never failed to relieve Piles, Diarrhoz, chron ic and acute Ulceration of the Bowels, Sore eyedids, Coughs, and all Diseases of the Breast. Consumption proper, he cannot cure. Dr. G. would not be understood that he never fails to cure any of the above diseases, without regard to the situation of the patient, for all diseases may reach a point beyond which no remedy can reach. He is prepared to give the Vapor Bath proper, which has all the medical properties of the Hot Springs. Dr. G. owns the largest Infirmary in the South-West, (at Memphis, Tenn.) which has been crowded with persons from all parts, with every form of Chronic Diseases that flesh is beir to, for the last seven years, and he pledges himself that he cured nineteen out of every twenty who gave, him a fair chance, after they had been abandoned by others as incurable. He has not removed to New Osleans for the want of business; he wishes to live further South. He expectfully invites the public to his office to examine his testimonials in favor of his success of the most respectable certificates, by the quantity, and prove the correctness of them all. In h

He offers the following certificate from the hyperians of Memphis:

After we had helph hopes of relief from any means mar as, we heard of a physician of great skill in an extreme Southern city; we repaired to him, and he frankly acknowledged that he could not cure such a case, and told us there was not a physician in the city who gould relieve her. Thus physician then stated that he had been himself afflicted with a chronic disease that he could not cure, and had toapply to Dr. Gilbert himself; and unged us to return to Memphis, and place Mrs. Myers under his care.

By this times my wife's eyeballa had become spected would read fusions, which would matter and break. In this state, almost, despairing of her ever souing the light of day again, we started to Memphis. We reached the infirmary, and presented the case to Dr. Gilbert, and told our tale of two. Dr. G. examined the case. No one can judge our fears and anxiety about his decision! There was in us a strife between hope and despair.

NOTICE TO SUGAR PLANTERS.

A PATENT has been issued by the United
A States Patent Office, at Washington, to
Louis Frederic Henry Melsens, of Louvaine, in
Belgium, as inventor of the improved process of
making sugar by means of Bisulphate of Lime,
or other alkali. And the specification embraces
all articles which in their separate or collective
use operate upon the juice of sugar-cane, so as
to form a Bisulphate of Lime, Baryta, Strontian,
Alumina or other alkali, during the process.

In the trials of Melsens' process made by Mr.
Thes. A. Morgan, and others of this State, it has
been found to improve the quality materially and
increase the quantity of the sugar.

The undersigned as Assignee of said Melsens,
is now prepared to sell licenses under said patent,
at the following prices and terms:

1. A license to take off the crop of this year
only, at \$1 a hhd., payable the lat February,

One of the finest plantations in Attakapas, situated in the parish of St. Mary, and three mites distant from Franklin, measuring on one side of the Teche, 20 arpents front by 40 deep, the whole arable land and containing a planter's dwelling two stories high, a sugar house steam engine of the best description, a corn house stables, &c.;—and on the other side, 20 arpents front by 72 deep, extending to the lake, high land throughout its entire depth, and of the first quality for culture, after clearing—in all 2800 superficial arpents, of which 2000 at least are of good land.

On this property three fine sugar farms might be established, and profitable employment found for 150 negrees. It is generally acknowledged to be one of the most productive in the parish.—On the upper and lower ends as well as on the lake there is an almost untouched cypress swamp, capable of supplying a saw-mill for ages.

The amateurs of fine estates are invited to visit this. Possession may be had en the 1st of January, 1851, together with the necessary plant-cane, indisputable titles, and on very liberal terms. Apply to.

STRAUB'S PATENT PORTABLE CORN AND FLOURING MILL, MANUFACTURED BY JAMES TODD & Co., Cincinnati, Ohio.

Cincin wati, Ohio.

A MONG the many advantages of this mill and the season of the grain, which the eye passes being at rest, there is nothing to obstruct the passage of the grain, which falling freely upon the lower stone, is instantly distributed by its centrifugal motion: whereas, in all other mills, the whirling and rapid motion of the driver, rind and stone obstructs the passage of the grain, and piles it against the side of the eye, until it descends in a body and chokes the mill. This serious difficulty is wholly obviated by running the lower stone; nor is the grinding of this mill affected by any irregularity in the speed; it grinds uniformly well, whether driven at allow or high speed, and will never be injured by running empty, as the lower stone is the one in motion, and cannot come in contact with its follow. It is easily understood, not liable to get out of order, and can be managed by negroes, or persons who have but a very slight knowledge of milling.

For further particulars address the undersigned through the Frankin Post Office, who will give every information respecting it.
