To chronic sufferers they are invaluable. When taken as directed, they relieve the distress and save the weakening influence of pain, which so frequently prostrates. Many sufferers use them whenever occasion requires with the greatest satisfaction, why not you? They do not derange the stomach nor create a habit. Why not try them? Get a package from your druggist. Question of Precedence.

Recently a dispute was raised as to whether a certain lawyer or a certain doctor was to have precedence at a function at which both were to play prominent parts. It was impolitic to allow either of these two men to be offended. While the discussion was under way as to which was to be seated next the speaker, an old politician in the room said the discussion was one which he thought he could settle by giving them the words of the great Diogenes, who had said upon an ancient occasion, "Let the thief go before; let the executioner follow after."

The politician said he thought that meant the lawyer should have first place and the doctor come next—Milwaukee Free Press.
