Mystery in Footprint.

Tradition has it that the first Spaniards to land in Hawaii were wrecked on the southeast coast in 1575; but the clear imprint of a Spanish shoe has been discovered in the surface of an ancient lava flow on the west coast near Honanau, the "City of Refuge." Since the lava flow must antedate the building of the city in 1100, how the footprint got there is a mystery that will probably never be solved.

It's toasted. This one extra process gives a delightful quality that can not be duplicated

Watch Out, Carlsbad!

Carlsbad, the famous health resort. Is built on a crust, underneath which is a subterranean lake of boiling water, and all the hot sulphur springs have to be ceaselessly watched and the pressure kept down lest the town be destroyed.

Didn't Enjoy It.

Young Harley was home for a few days from a cruise with the merchant marine. "Well," said the man from the home town geniality, "how have you been enjoying maritime life?" "I haven't been enjoying it at all, sir," answered the youngster, blushing, "she broke the engagement."—Pioneer Enterprise.

Check the Costs

Know How Much You Save by Painting Now to Save Repairs

COMPARE the prices of lumber and paint. They will show you how expensive it is to let buildings rot for lack of the protection of paint.

Hundreds of thousands of dollars worth of valuable buildings are wasting today at a rapid rate, because they have not been painted when they needed it. Paint now. Save repairs.

The utmost economy in painting results from the use of a high quality product at the time it is needed. The best paint spreads easily—it saves labor cost. It covers a larger area per gallon than "cheap" paint. But most important, the best paint serves five or more years longer than "cheap" paint. It's economy, then, to paint when

your property needs it—without delay—and to use the best paint.

The best paints are scientific in formula and preparation. We've made them for 75 years—to meet the weather conditions in the West.

The best materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc and pure colors—are combined in Fuller's Paints in scientifically exact proportions with long-time skill.
